

finny

AA journey: what the UI looks like for each circular line item

All 47 rows of “Finny AA Journey: Changes vs New Circular”, each shown with the screen(s) that implement the proposed solution. Screens marked **New UI** were designed for this review from the “Possible Solution” column; the rest come from the Finny AA flows prototype.

Overview

Every line item, its action from the CSV, and the screens shown on its page. **Bold** screen names are new UI designed for this review.

Change Add Keep To check Frontend / Backend

#	ITEM	ACTION	SCREENS
Before linking (Finny intro)			
01	Why Finny needs the data	Change	One consent per FI type, Consent: 8 mandatory fields
02	Redirect notice	Keep	Hand-off to Account Aggregator, You're on Finvu notice
03	Finny login OTP vs AA 2FA	Keep	2. Verify mobile (SIM binding)
Registration and login (AA)			
04	Existing AA account check	Add	Already linked with Finvu (discovery) , 3. Existing Finvu account
05	Two-factor authentication	Frontend	Biometric + OTP login , 2. Verify mobile (SIM binding)
06	PIN / OTP entry	To check	OTP masked (default), OTP unmasked on tap
07	AA name and logo	Change	2. Verify mobile (SIM binding), 1. Intro
08	Tagline	Keep	6. Choose accounts to link
09	"You're on the AA's platform" notice	Change	You're on Finvu notice , Hand-off to Account Aggregator
10	VUA (Finvu ID)	To check	3. Existing Finvu account, Profile & VUA
11	Language	To check	Language
12	Notification preferences	To check	Notification preferences
13	Account recovery	To check	Recover account / reset PIN
14	Re-login after inactivity	Frontend	Session timed out
Account discovery			
15	Supported institutions list	Keep	5. Discovering accounts, Institutions on Finvu
16	Identifiers used for discovery	Change	"Missing accounts?" with more identifiers
17	Account types shown	Keep	6. Choose accounts to link
18	Search progress and errors	Keep	5. Discovering accounts, 12. No accounts found, 13. Partial failure
Account selection and linking			
19	Account selection	Change	6. Choose accounts to link
20	Tick control accessibility	Add	6. Choose accounts to link
21	Account linking OTP	Keep	6b. Confirm with bank OTP, 16. OTP failed
Consent screen			
22	Approve / Reject buttons	Change	Consent: 8 mandatory fields
23	Number of consents	Change	One consent per FI type
24	Revoke line	Change	Consent: View more
25	Word "Consent"	Keep	Consent: 8 mandatory fields, One consent per FI type
26	Voice read-out	Keep	7. Consent (summary)
27	Consent fields: main screen + View more	Change	Consent: 8 mandatory fields, Consent: View more , 7b. What does this field mean?
After Approve / Reject			

#	ITEM	ACTION	SCREENS
28	All approved	Keep	10. Connecting accounts, 11. Success
29	Rejected or cancelled	Keep	9. Reject confirmation, 9b. Consent rejected
30	Errors	Keep	13. Partial failure, 14. Bank unavailable, 16. OTP failed
Notifications			
31	Alert on every data fetch	Add	Push on each data fetch
32	Data-fetch summary	Keep	Notification preferences
33	Link / approve / revoke alerts	To check	Finvu SMS: alerts & monthly summary
34	Monthly consent summary	To check	Finvu SMS: alerts & monthly summary, Notification preferences
Revoke, pause, account closure			
35	Revoke, pause, resume, delink / close AA account	To check	17b. Consent details & controls, 17c. Pause consent, 17e. Revoke consent
36	Consent dashboard	To check	17. Your consents (dashboard), 18. Consent activity (audit trail)
Help and grievance			
37	Complain-to-Finny page	Add	Consent: View more
38	AA grievance	Add	Consent: View more, Help & complaints
39	What a consent means	Keep	7b. What does this field mean?
Consent request settings (backend)			
40	Fair Use template ID	Backend	No UI change
41	Pull size	Backend	No UI change
42	Insurance data frequency	Keep	No UI change
43	Older consents	Backend	No UI change
44	Profile sent to AA	Keep	No UI change
Only if the Finvu SDK is used			
45	SIM binding	Frontend	SIM binding permission priming, 2. Verify mobile (SIM binding)
46	Rooted / jailbroken device	Frontend	Linking isn't available on this device
47	SDK paperwork	Frontend	No UI change

WHAT THE UI SHOWS

After selecting accounts, the user sees how many consents Finny is asking for (one per FI type), the FIRE objective up top, and each consent with its own purpose code (101) and full details.

CIRCULAR

ReBIT Std 3.1(iv): "FI-U and AA shall ensure that the purpose for all the consents is clearly informed to the customer. Further, the FI-U and AA shall ensure that each consent is displayed as separate consent component to the customer and are not merged in a single consent. A single purpose code shall be displayed to user with each consent."

FINNY'S CURRENT FLOW

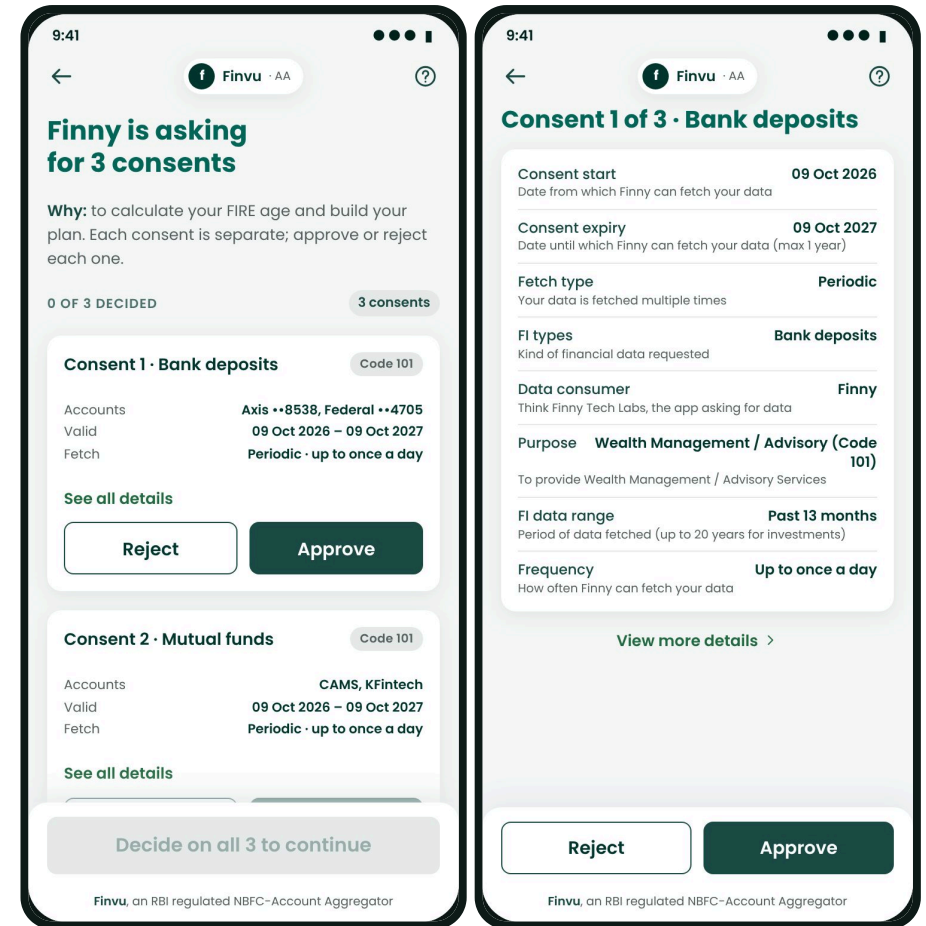

All consents are taken as one bundled consent for each account.

RT'S INFERENCE

Mandatory. Need to move a consent template with details for each account.

POSSIBLE SOLUTION

The consent after selecting accounts should give them a view of number of consents and this template should have all the details about the consent. Main objective FIRE and then details of consent as in "know more" today in live product

**NEW UI** One consent per FI type**NEW UI** Consent: 8 mandatory fields

WHAT THE UI SHOWS

Hand-off screen explains the move from Finny to Finvu, with both marks and a promise to return automatically.

CIRCULAR

ReBIT Std 4.2(i): "Display of redirection message to user: FI-U may explicitly inform users that they are being redirected to the AA Client to complete the discovery process, linking, and approving consent to share data for the product and service the user has shown interest in . (O)"

FINNY'S CURRENT FLOW

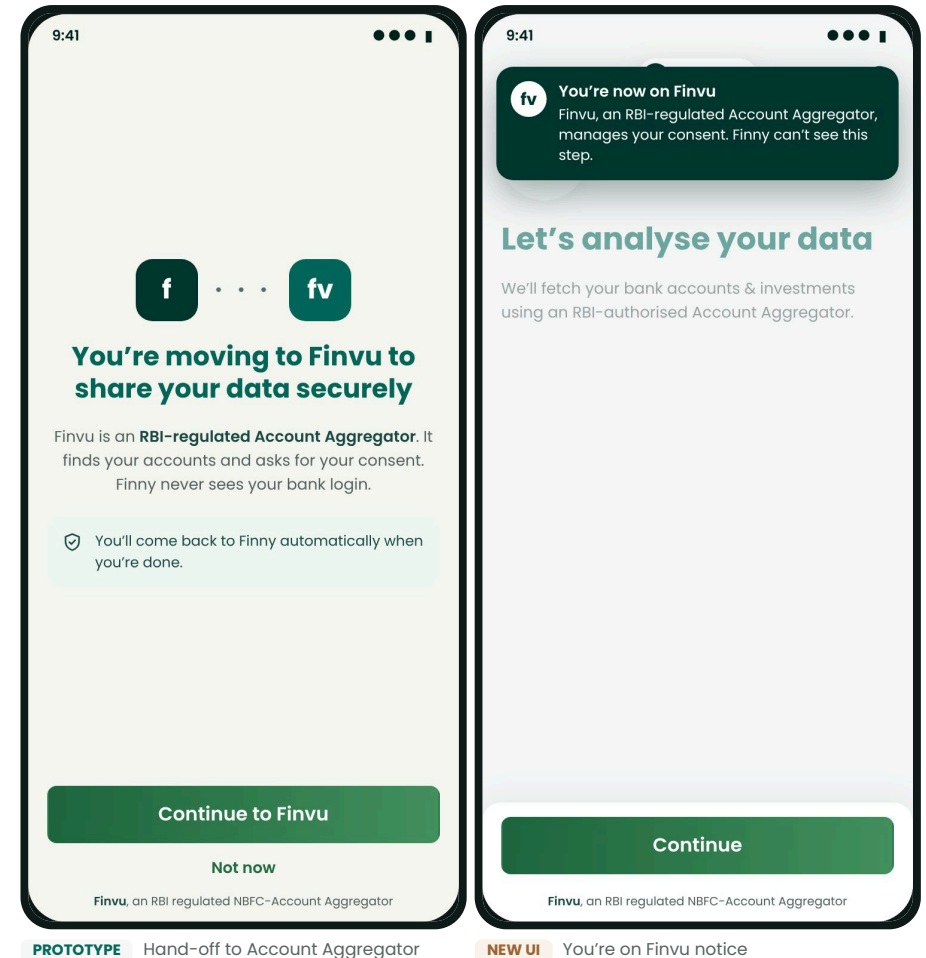

Already being done using animation and showing the AA logo.

POSSIBLE SOLUTION

NA

RT'S INFERENCE

Redirection to AA with clear visual clue.

WHAT THE UI SHOWS

Finvu's own OTP step sits inside the journey; Finny's login OTP is never reused as the AA's second factor.

CIRCULAR

ReBIT Std 5.1(i): "AA Client shall implement robust Two-Factor Authentication (2FA) to enhance security during customer registration and each login."

Sahamati webinar 30 Sep 2026 slide 13: "FIU: In Customised journeys, build the AA's 2FA step into the journey. FIU-performed 2FA cannot be used as proxy by the AA Client."

FINNY'S CURRENT FLOW

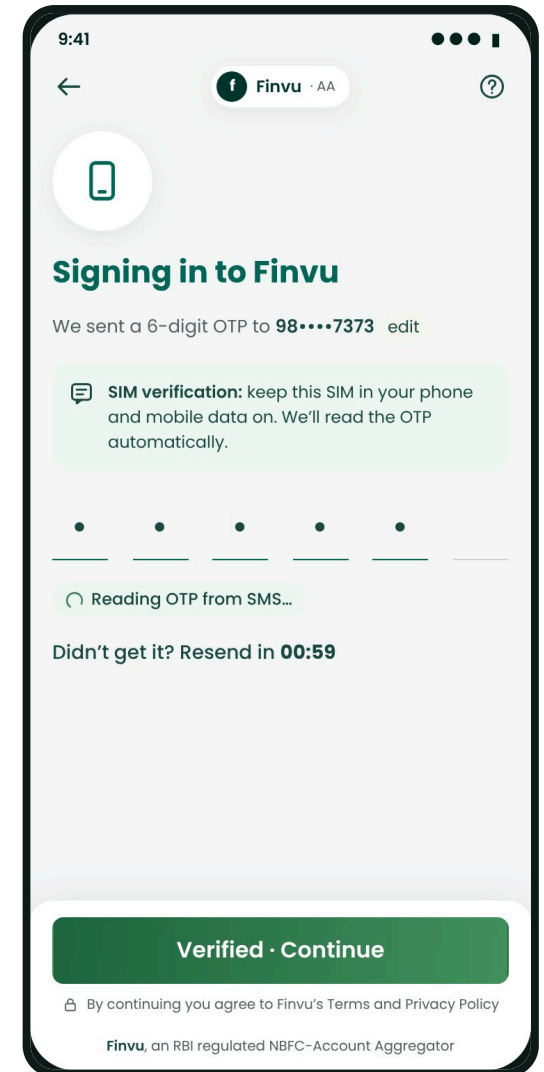

AA OTP screen contains the 2FA

RT'S INFERENCE

Mandatory. Step already being done in our redirection + OTP to AA

POSSIBLE SOLUTION

NA

PROTOTYPE 2. Verify mobile (SIM binding)

WHAT THE UI SHOWS

Discovery shows "You already have a Finvu account (mayank@finvu)" and tags accounts that are "Already linked". Returning users also see a welcome-back screen with their Finvu ID.

CIRCULAR

ReBIT Std 2.2(ii): "AA Client shall check if the user's AA account exists and highlights the same before onboarding the user so that the user is aware of its previously created accounts."

FINNY'S CURRENT FLOW

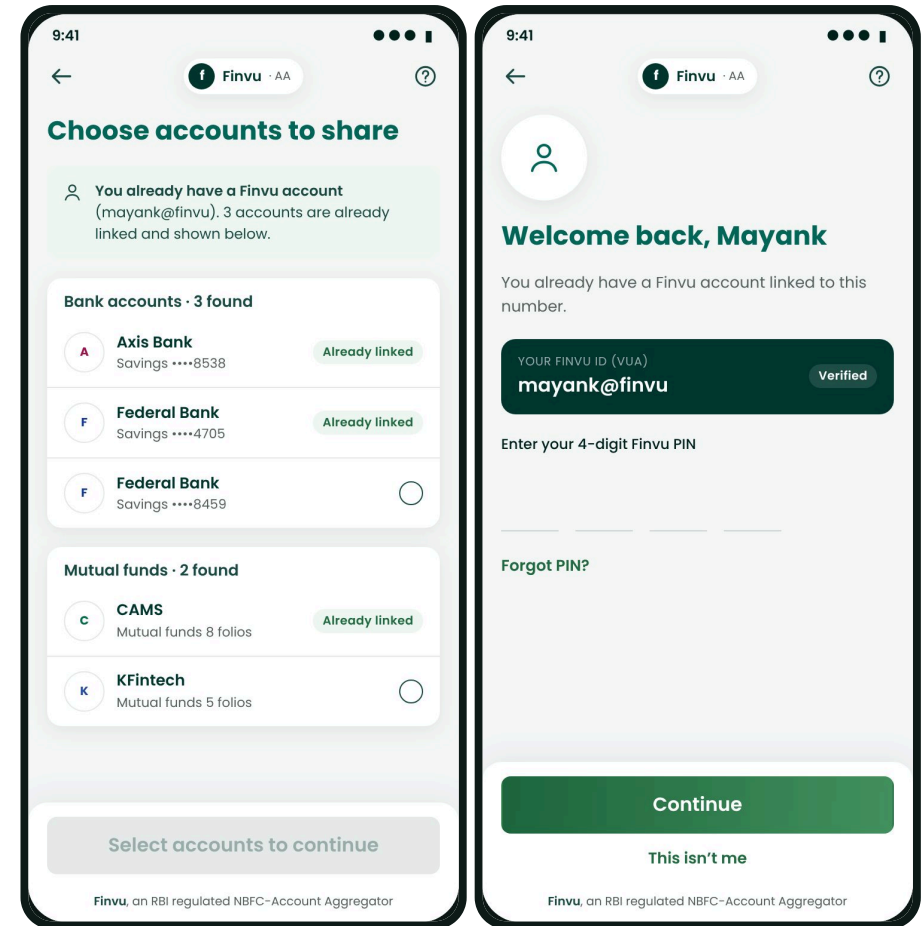

Doesn't exist

RT'S INFERENCE

If a user's account exists on Finvu, we need to tell them that it already exists

POSSIBLE SOLUTION

Show "already linked with Finvu" on discovery

NEW UI Already linked with Finvu (discovery)

PROTOTYPE 3. Existing Finvu account

WHAT THE UI SHOWS

Two factors on every login: OTP first (step 1 of 2), then fingerprint or face (step 2 of 2), with PIN as fallback.

CIRCULAR

ReBIT Std 5.1(i): "AA Client shall implement robust Two-Factor Authentication (2FA) to enhance security during customer registration and each login. This may combine a credential (e.g., password, PIN or biometric) with another factor, such as a One-Time Password (OTP) sent to a registered mobile number, or a Time-based One-Time Password (TOTP) generated by an authenticator app."

FINNY'S CURRENT FLOW

Need to check with Akash

RT'S INFERENCE

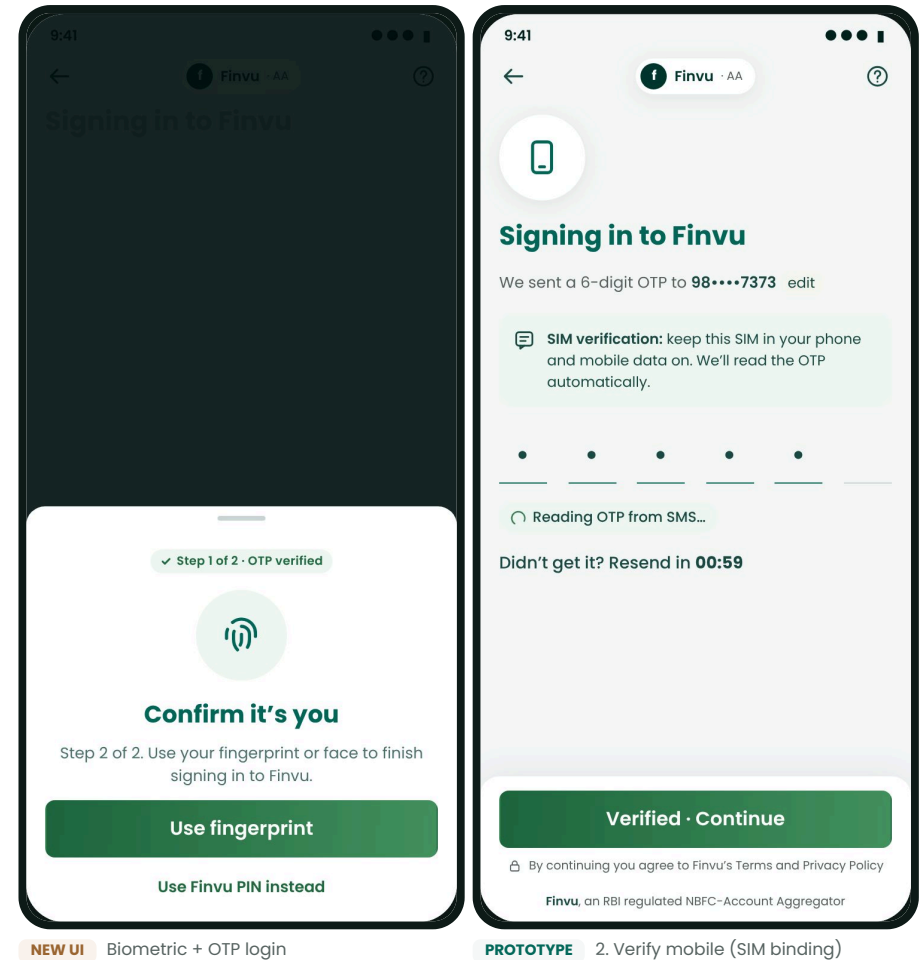

Mandatory.

Make the screen biometric or pin as the flows. Some places where pin doesn't exist will fail in 2FA, ok for now, should bypass

POSSIBLE SOLUTION

We do have biometric-based login, but don't know if we have an onboarding flow for that. Need to check with Akash. and act

Create biometric + OTP in the flow on every login

WHAT THE UI SHOWS

OTP and PIN digits show as dots by default. A “Show OTP” control reveals them on tap and switches to “Hide OTP”.

CIRCULAR

ReBIT Std 5.1(ii): “AA Client shall use password format (****) for all the passwords/OTPs/PINs entered by user.”

FINNY’S CURRENT FLOW

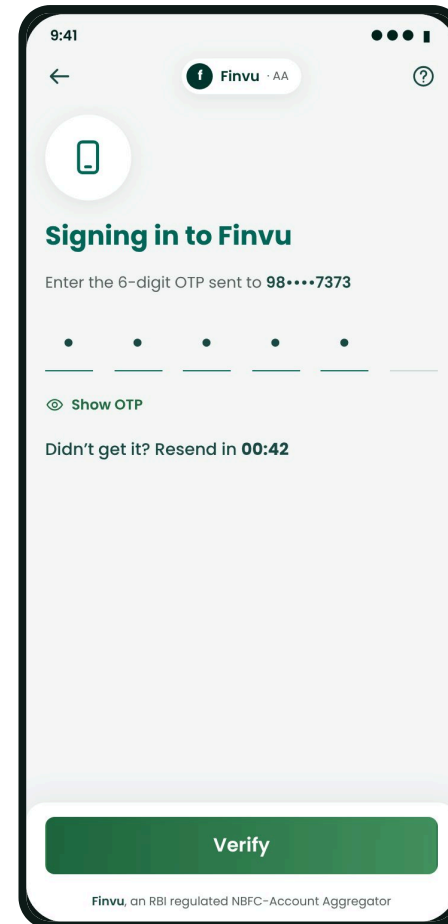

Doesn't exist

RT’S INFERENCE

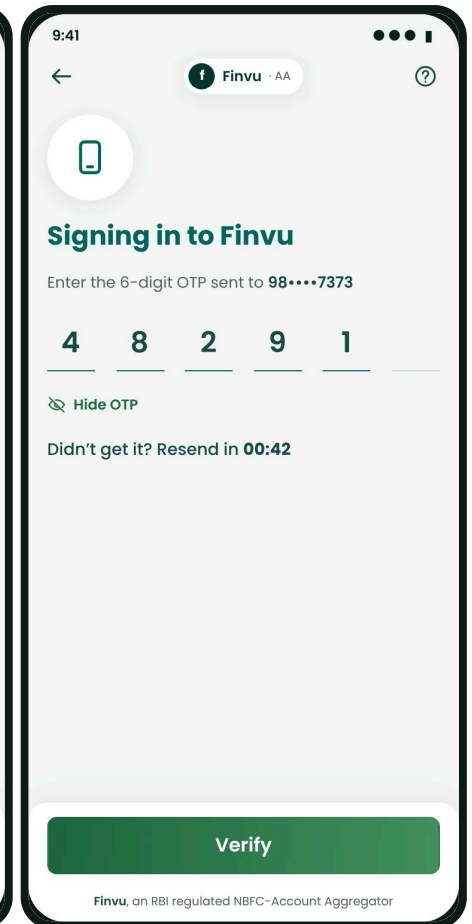

Mandatory. Need to create a masked view and an option to unmask

POSSIBLE SOLUTION

Need to create a masked view and an option to unmask for OTP and screen pin

NEW UI OTP masked (default)

NEW UI OTP unmasked on tap

WHAT THE UI SHOWS

Finvu name and mark sit top-centre on every AA screen, including registration and login. Replace the text chip with Finvu's official logo at a clearly legible size.

CIRCULAR

ReBIT Std 4.2(iii): "Display of AA Name and Logo: AA Client shall clearly display its name and logo in all its applications during user registration and each login. The AA logo shall be placed at top left or top centre of the AA Client screen to establish its identity. AA shall ensure that logo is large enough to be clearly visible and legible and shall be scaled proportionally to the available screen space."

FINNY'S CURRENT FLOW

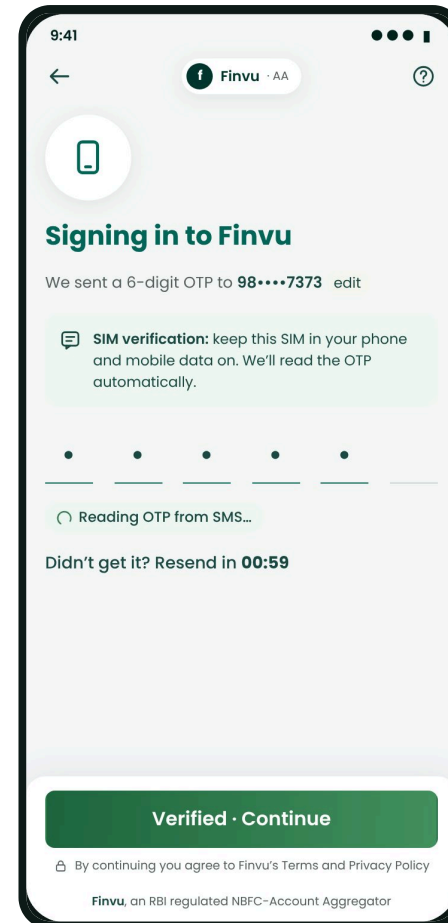

Small AA logo in the footer only

RT'S INFERENCE

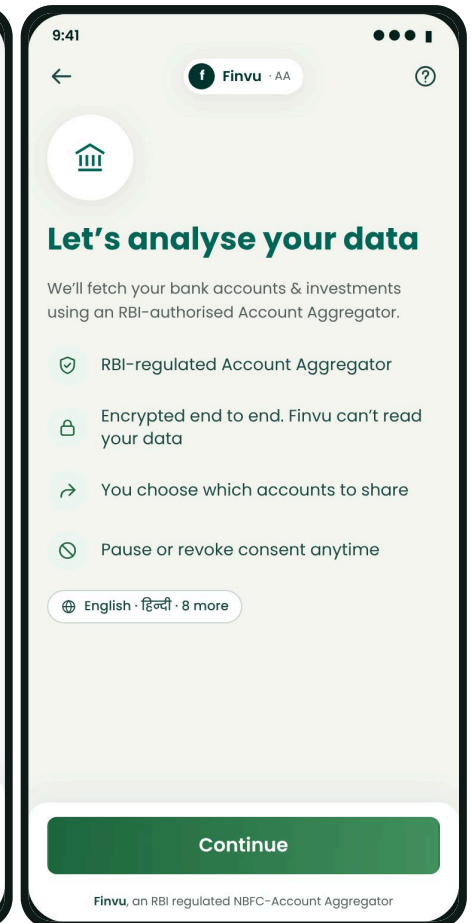

Mandatory. Recommended on every AA screen, required at registration and login to show AA logo and name.

POSSIBLE SOLUTION

Move Finvu's name and logo to the top of AA screens

PROTOTYPE 2. Verify mobile (SIM binding)

PROTOTYPE 1. Intro

WHAT THE UI SHOWS

Footer on every AA screen: "Finvu, an RBI regulated NBFC-Account Aggregator".

CIRCULAR

ReBIT Std 4.2(iv): "Use of tagline: AA shall display a title or tagline at the bottom of the screen to further enhance trust and credibility. Such tagline may be "<AA Name>, an RBI Regulated NBFC-Account Aggregator"."

FINNY'S CURRENT FLOW

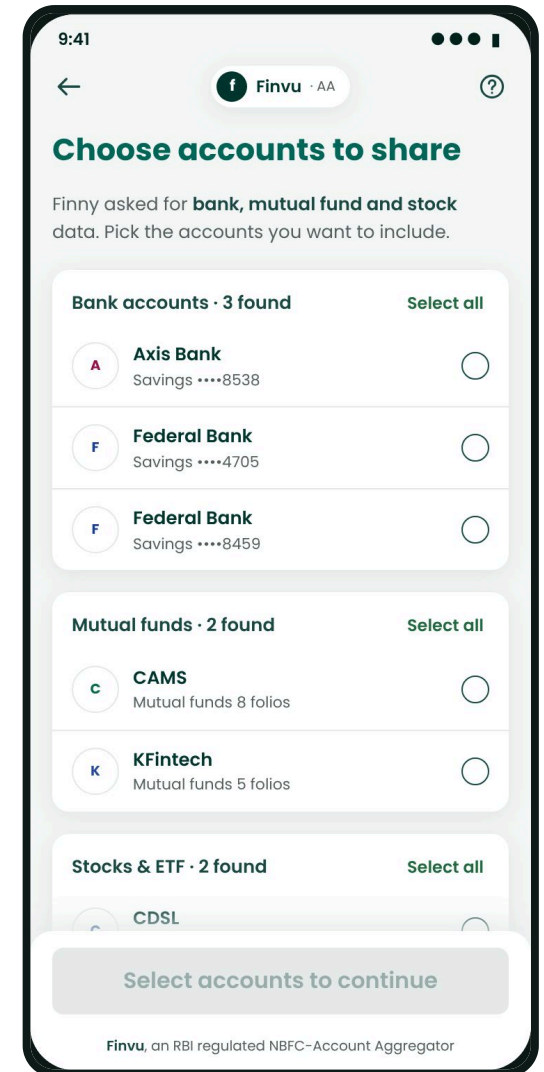

"Powered by RBI regulated account aggregator" + logo in footer

RT'S INFERENCE

Report form marks it Optional; the standard's wording says 'shall display'. Cheap to do.

POSSIBLE SOLUTION

NA

WHAT THE UI SHOWS

As the transition animation lands on Finvu, a pop-up notice says "You're now on Finvu" and that Finvu manages the consent.

CIRCULAR

ReBIT Std 4.2(ii): "AA Client shall also make the user aware through pop-up notifications that they are on AA's platform for consent management."

FINNY'S CURRENT FLOW

Not present on the screens shared

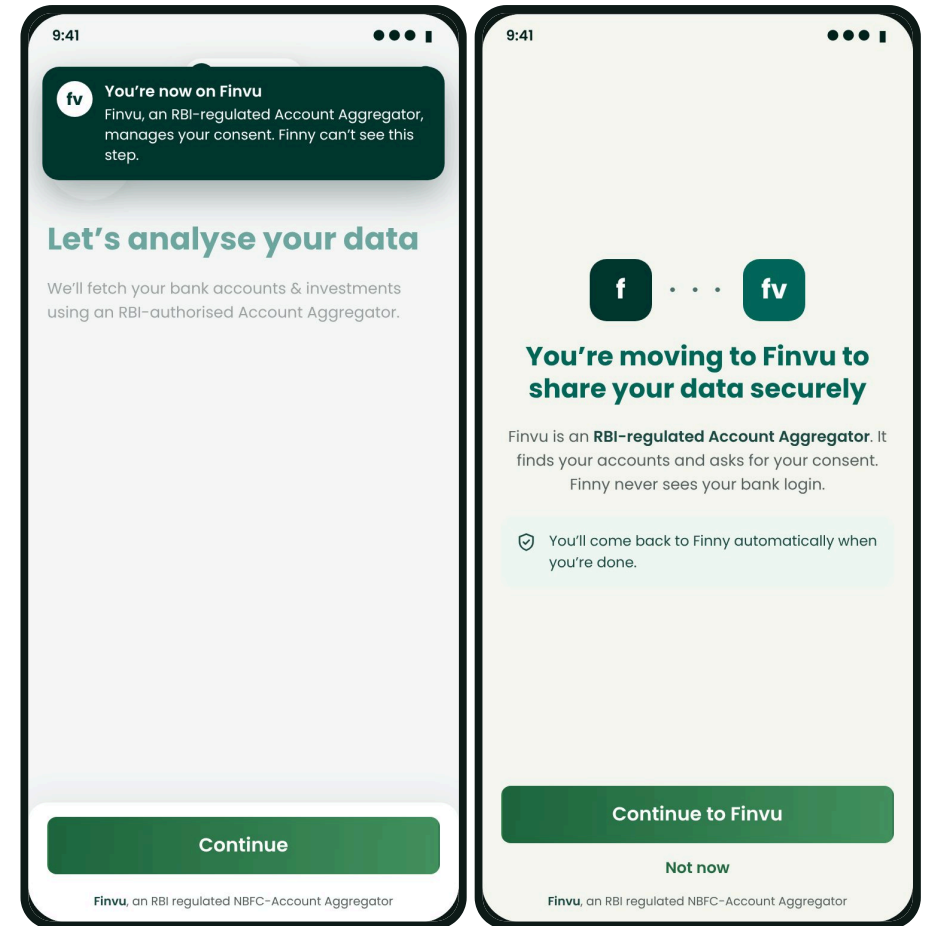

RT'S INFERENCE

Mandatory.

Can be part of the animation while moving to account aggregator

POSSIBLE SOLUTION

Animation while transferring to AA

**NEW UI** You're on Finvu notice**PROTOTYPE** Hand-off to Account Aggregator

WHAT THE UI SHOWS

Finvu ID (VUA) shown prominently on the welcome screen and in profile with a copy action. Personalisation depends on Finvu (to check).

CIRCULAR

ReBIT Std 2.2(i): "the AA shall provide a Virtual User Address (VUA) to the user as a unique identifier. ... Users shall be allowed to create their own VUA for convenience."

ReBIT Std 4.2(vi): "Display of Virtual User Address: AA shall ensure that user's Virtual User Address (VUA) is displayed prominently in the profile section or on welcome/ landing page of the AA Client."

FINNY'S CURRENT FLOW

Doesn't exist

RT'S INFERENCE

Mandatory.

VUA personalisation should happen on Finvu

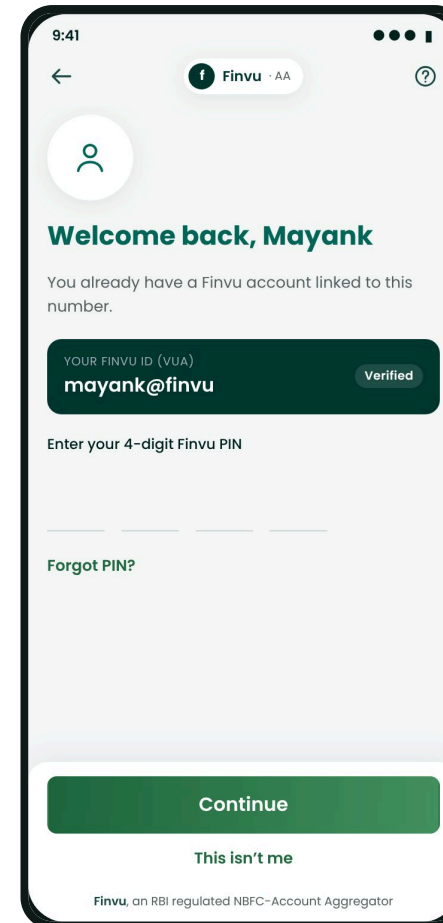

VUA display should happen in response when the client is created.

need to check with Vinay.

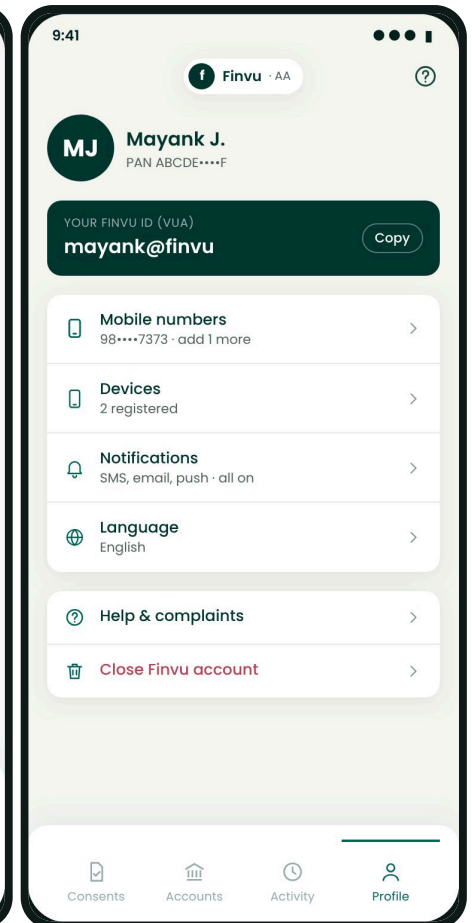

POSSIBLE SOLUTION

Check with Vinay on VUA if received.

Check with Finvu if they have personalisation of VUA

PROTOTYPE 3. Existing Finvu account

PROTOTYPE Profile & VUA

WHAT THE UI SHOWS

Language picker in native scripts, reachable from the AA intro and profile. Depends on Finvu support (to check with Sahamati).

CIRCULAR

ReBIT Std 4.1(vi): "AA shall provide multi-language support to cater to users in specific regions by offering language options tailored to the target audience in those regions."

FINNY'S CURRENT FLOW

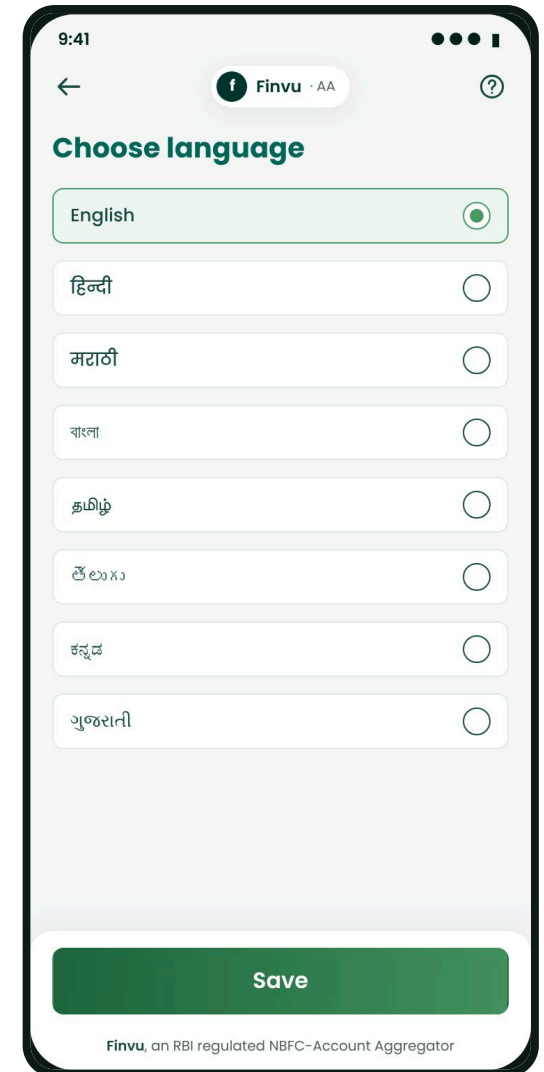

Doesn't exist

POSSIBLE SOLUTION

Check with Sahmati

RT'S INFERENCE

Mandatory. Becomes Finvu's job but client can choose not to use

WHAT THE UI SHOWS

Notification preferences with all alerts on by default; channels and summary frequency adjustable. Can sit under consent “View more” or FAQ depending on Finvu’s API.

CIRCULAR

ReBIT Std 4.3(vi): “AA shall allow users to customize their notification preferences within the AA client, either during the onboarding process or at any time after logging in. This customization may include selecting preferred communication channels, setting the frequency of notifications, etc. However, by default, all notifications shall remain enabled to ensure users are fully informed.”

FINNY’S CURRENT FLOW

Doesn’t exist

RT’S INFERENCE

Mandatory.

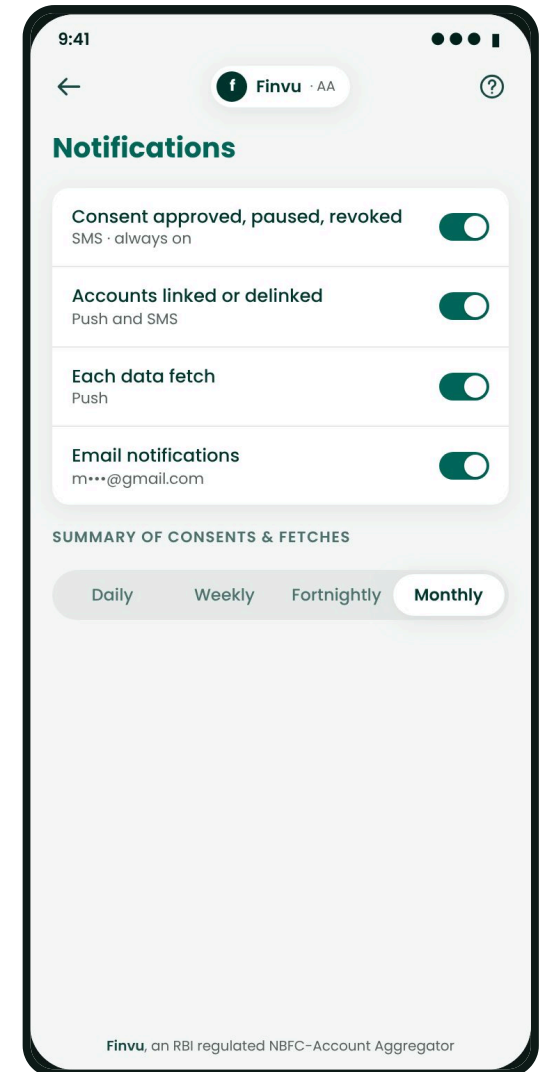

Needs to be provided either through API or if Finvu has. link

Need to check with Finvu

POSSIBLE SOLUTION

Check with Finvu

Accordingly add on the view more screen in consent or FAQ

**PROTOTYPE** Notification preferences

WHAT THE UI SHOWS

Recovery via the registered mobile, with a manual support route. Likely Finvu-owned (to check with Sahamati).

CIRCULAR

ReBIT Std 2.2(iv): "Account recovery: AA shall allow customers to recover their account credentials if they lose access to the account. Account recovery process shall include verification of mobile number provided by the user during registration. User shall be allowed to initiate account recovery requests both digitally (using AA Client) or manually (by contacting AA Customer Support Team)"

FINNY'S CURRENT FLOW

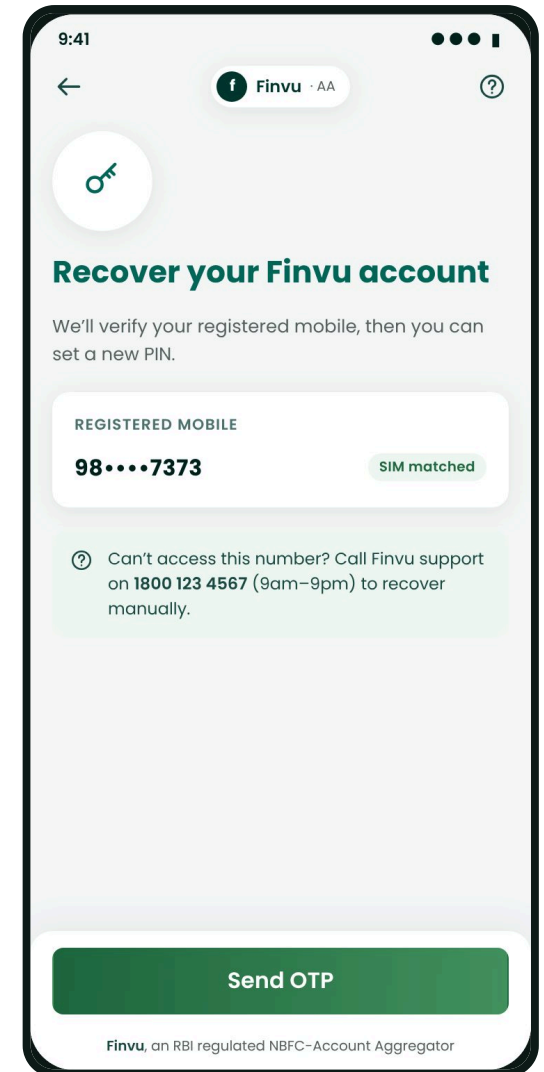

NA

RT'S INFERENCE

Mandatory. Should be on Finvu, can be ignored

POSSIBLE SOLUTION

Check with Sahmati

WHAT THE UI SHOWS

After inactivity the AA step locks and asks for PIN or biometric, resuming where the user left off. Timeout value to confirm with Akash.

CIRCULAR

ReBIT Std Annex 1.2.1(v): "The mobile application shall require re-authentication whenever the AA Client remains unused for a designated period to prevent unauthorized access of the application."

FINNY'S CURRENT FLOW

Already exists

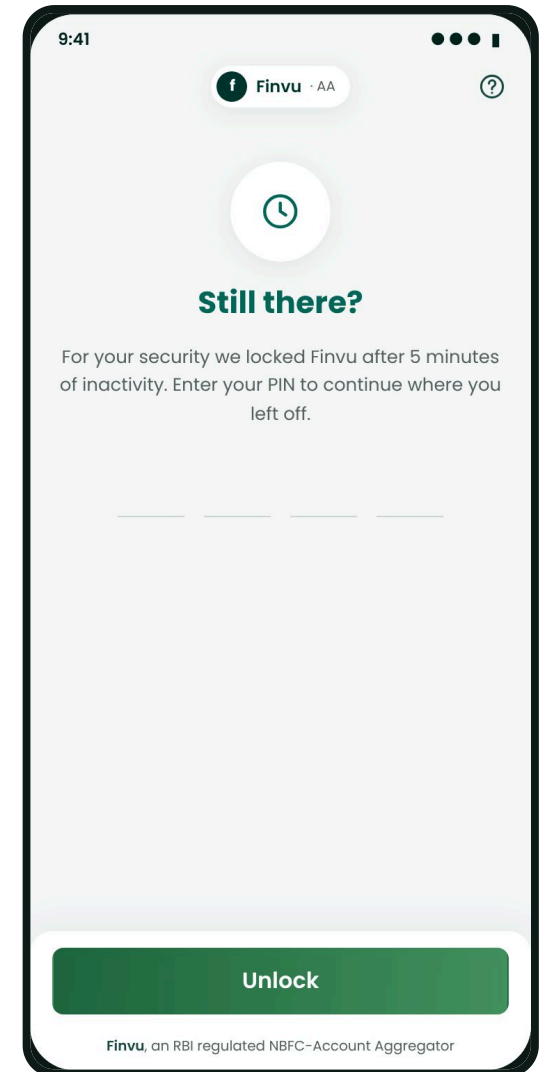

RT'S INFERENCE

Mandatory.

Confirm with Akash

POSSIBLE SOLUTION

Check with Akash on the timeout

PROTOTYPE Session timed out

WHAT THE UI SHOWS

"See all institutions" from discovery opens the searchable list of supported FIPs with live status.

CIRCULAR

ReBIT Std 4.1(vii): "In order to improve transparency, the AA shall make the list of available FI-Ps clearly visible to the user in AA Client."

FINNY'S CURRENT FLOW

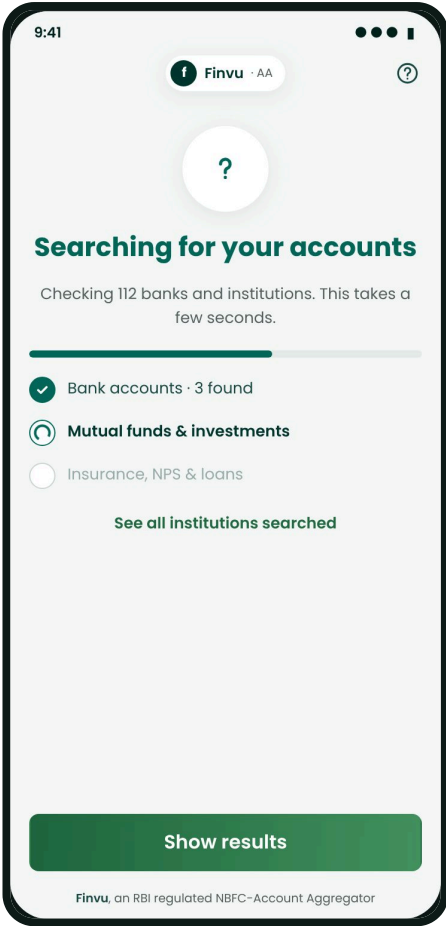

"Missing accounts?" link on the discovery screen

RT'S INFERENCE

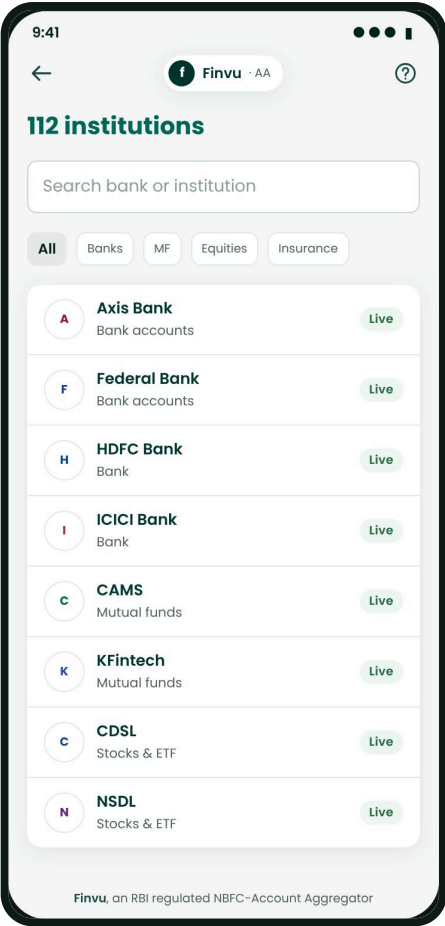

Mandatory. The standard only says the FIP list must be "clearly visible"; it prescribes no placement or wording.

POSSIBLE SOLUTION

NA

PROTOTYPE 5. Discovering accounts

PROTOTYPE Institutions on Finvu

WHAT THE UI SHOWS

"Missing accounts?" sheet shows the number used for search and lets the user add a second mobile, PAN or DOB, then search again.

CIRCULAR

ReBIT Std 2.1(i): "AA can allow a customer to link up to two mobile numbers in its AA Client as identifier for account discovery. The account discovery shall be performed using at least one mobile number linked with the AA Client."

ReBIT Std 2.1(ii): "Further, to improve the account discovery process, the AA shall give optional fields to the customer for using PAN or Date of Birth as additional identifiers during the account discovery or linking process along with the mobile number."

FINNY'S CURRENT FLOW

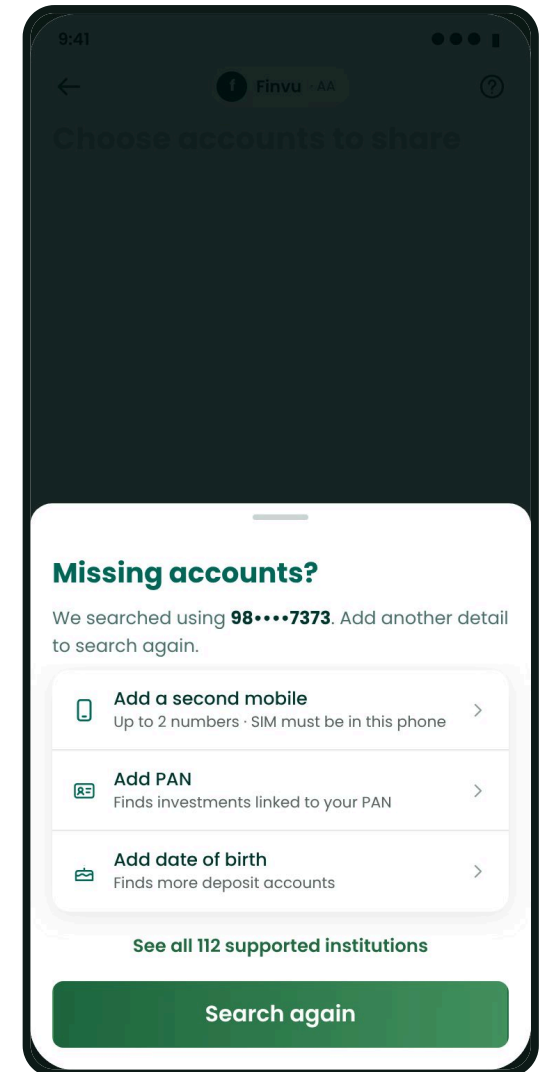

We only use a single number to discover the accounts. There is no option to add more details

RT'S INFERENCE

Mandatory. "Missing accounts?" is the natural place.

POSSIBLE SOLUTION

Show the number used; in "Missing accounts?" let the user add a second mobile, PAN or DOB for a re-research with another number

NEW UI "Missing accounts?" with more identifiers

WHAT THE UI SHOWS

Only the FI types Finny requests are listed: bank accounts, mutual funds, stocks & ETF (and NPS).

CIRCULAR

ReBIT Std 3.2(viii): "If the consent request is raised by FI-U for specific FI Types, only the related accounts shall be displayed to the customer for attaching with the consent during consent approval."

FINNY'S CURRENT FLOW

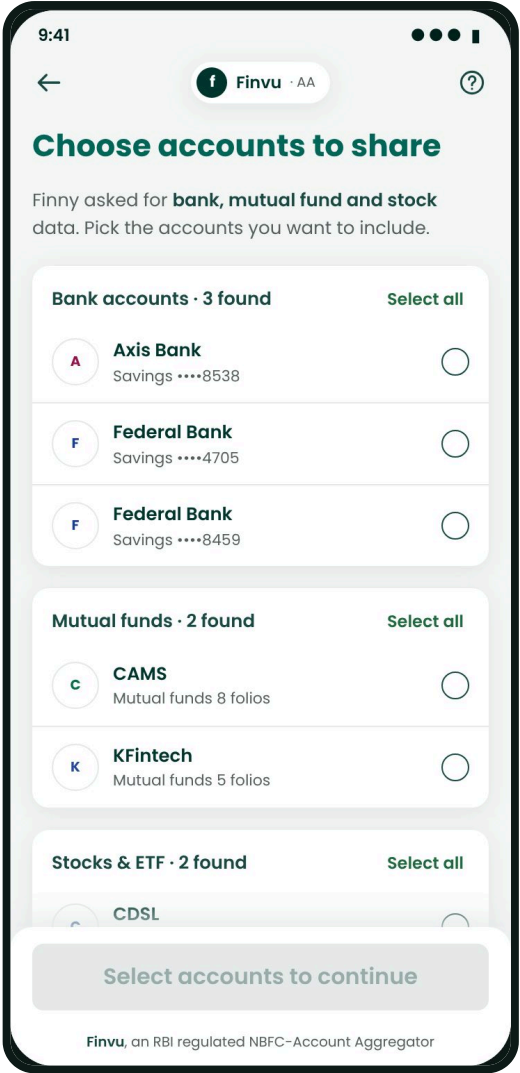

Bank accounts, Mutual funds, Stocks & ETF, NPS

RT'S INFERENCE

Mandatory. ok for now

POSSIBLE SOLUTION

NA

PROTOTYPE 6. Choose accounts to link

WHAT THE UI SHOWS

Live progress per institution type, plus clear outcomes for no accounts found and partial failures.

CIRCULAR

ReBIT Std 4.1(viii): "AA Client shall provide timely and meaningful feedback to users during interactions. It shall use visual cues, progress indicators, and notifications to keep users informed about the status of their actions. It shall also validate user inputs in real-time and provide clear error messages to assist in error resolution."

FINNY'S CURRENT FLOW

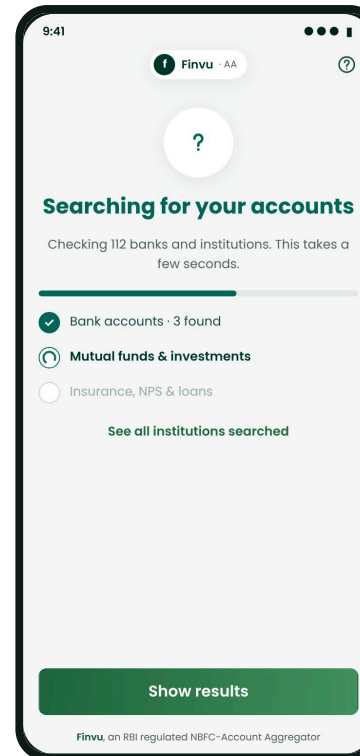

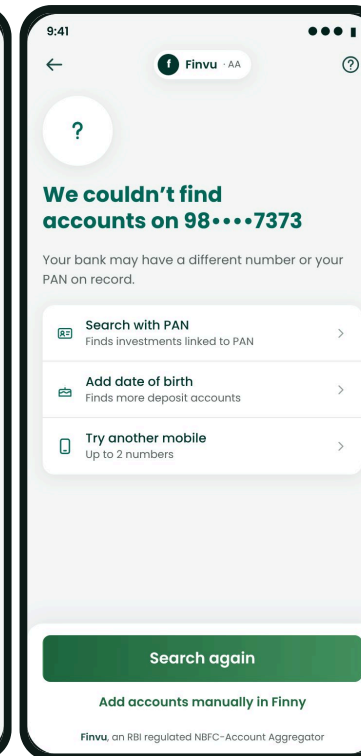

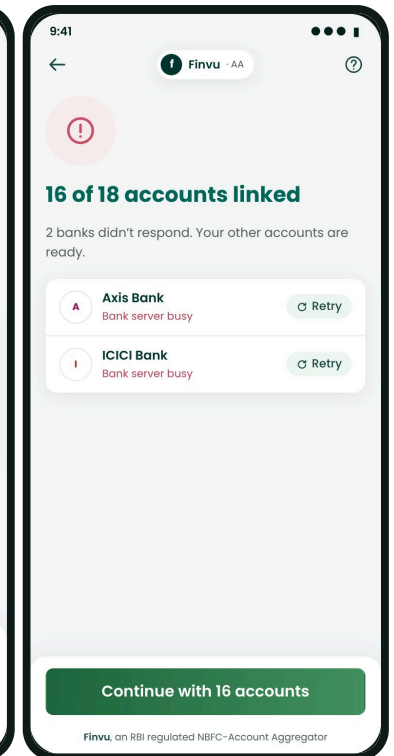

Feedback on non-connection, OTP failures, and non-discovery

POSSIBLE SOLUTION

NA

RT'S INFERENCE

Already handled all error flows for new searches, existing searches, and OTP failures

**PROTOTYPE** 5. Discovering accounts**PROTOTYPE** 12. No accounts found**PROTOTYPE** 13. Partial failure

WHAT THE UI SHOWS

Every account starts unticked. “Select all” per group for speed; the CTA counts what was picked (“Continue with 3 accounts”).

CIRCULAR

ReBIT Std 3.2(ix): “In case of users having multiple FI-P accounts, the AA Client shall provide the users the ability to explicitly select the FI-P accounts they wish to link or attach to their consent prior to approving it. This functionality shall include an opt-in mechanism, such as checkboxes, which must not be preselected, ensuring voluntary and informed consent.”

FINNY’S CURRENT FLOW

Every account ticked by default

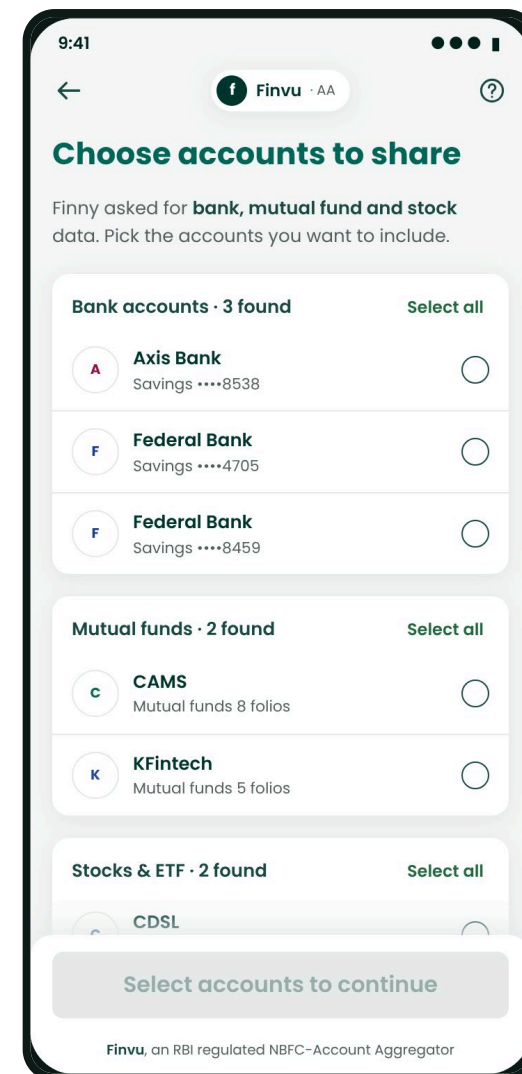

RT’S INFERENCE

Mandatory. One of the clearest violations on the current screens.

POSSIBLE SOLUTION

All accounts start unticked; user ticks each one

Can also look at a new visual of selection, as right now it was more of an unselection.

PROTOTYPE 6. Choose accounts to link

WHAT THE UI SHOWS

Checkboxes and icons carry accessible labels, text meets AA contrast, and targets are 44px+. Remaining: alt text on illustrations and logos, screen-reader pass.

CIRCULAR

ReBIT Std 4.1(iv): "AA shall consider making its applications accessible by individuals with disabilities. It may follow accessibility standards such as ISO/IEC 40500:2012 Web Content Accessibility Guidelines (WCAG) 2.0 ... alternative text for images, support keyboard navigation, and ensure sufficient colour contrast for visually impaired users."

FINNY'S CURRENT FLOW

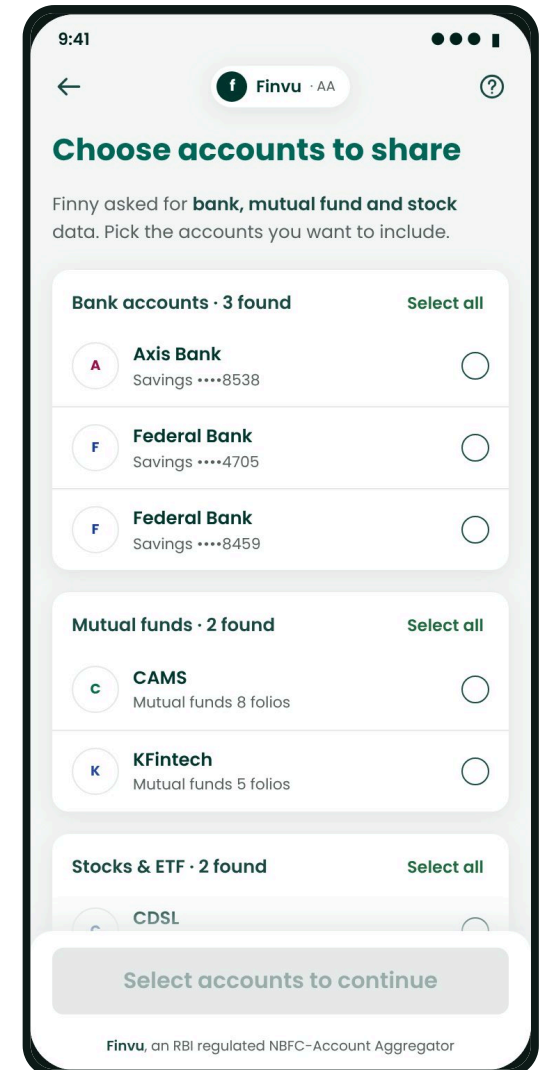

Doesn't exist

RT'S INFERENCE

Wording is soft: "shall consider" making screens accessible, "may follow" WCAG 2.0. Full WCAG is not required; minimum to report Yes: alt text for images and icons, keyboard navigation on web, sufficient colour contrast.

POSSIBLE SOLUTION

Find out the non-intrusive way for this compliance standard without compromising the UI/UX

WHAT THE UI SHOWS

Bank linking OTP shows a queue (“Linking 1 of 2”), masked digits, inline errors with attempts left and a resend timer.

CIRCULAR

ReBIT Std 4.1(viii): “AA Client shall provide timely and meaningful feedback to users during interactions. It shall use visual cues, progress indicators, and notifications to keep users informed about the status of their actions. It shall also validate user inputs in real-time and provide clear error messages to assist in error resolution.”

FINNY’S CURRENT FLOW

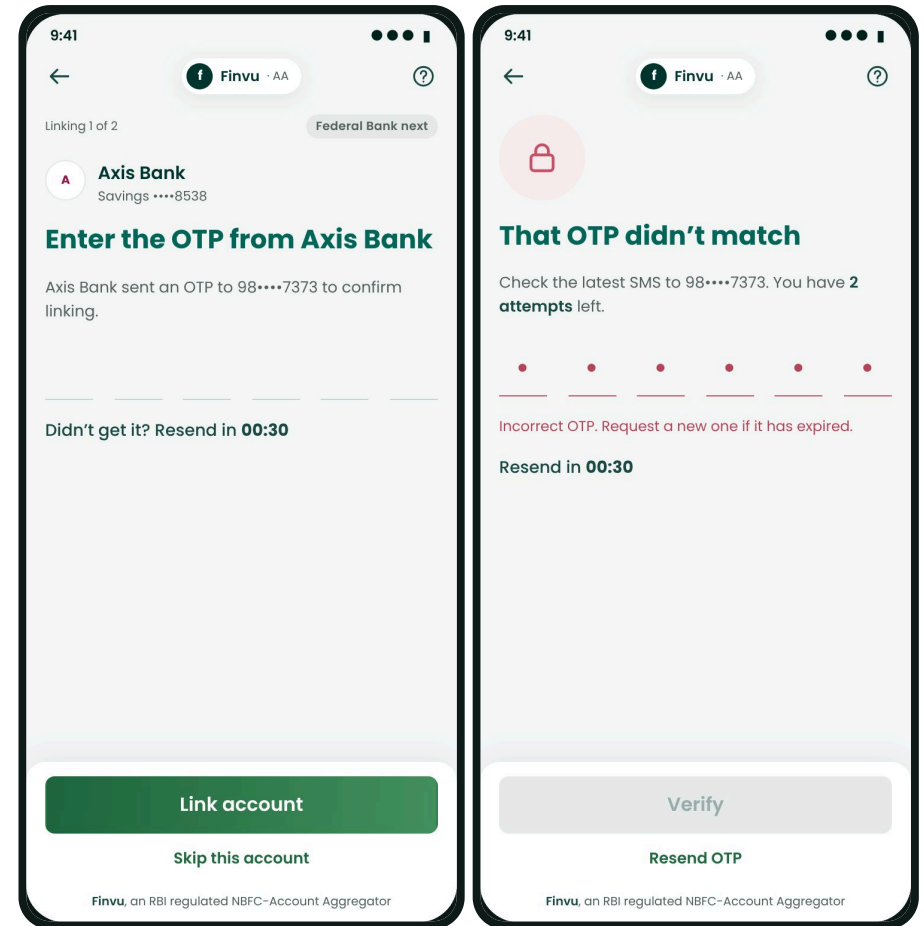

Feedback on errors, actions etc. are provided

RT’S INFERENCE

Mandatory. Already exists, no change required

POSSIBLE SOLUTION

NA

PROTOTYPE 6b. Confirm with bank OTP

PROTOTYPE 16. OTP failed

WHAT THE UI SHOWS

Approve (dark green) and Reject (white, outlined) side by side at the same size, matching Finny's primary/secondary pattern; neither is pre-selected.

CIRCULAR

ReBIT Std 3.2(iv): "The consent approval screen shall clearly specify the button names as "Approve" or "Reject". The Approve and Reject button shall be of same size and visibility."

ReBIT Std 3.2(v): "The Approve button shall not be the default option for the user. Consent approval/ rejection shall be taken from user on the "Click" action of respective buttons."

FINNY'S CURRENT FLOW

Large "I allow to fetch my data" button + small "don't allow" text link

RT'S INFERENCE

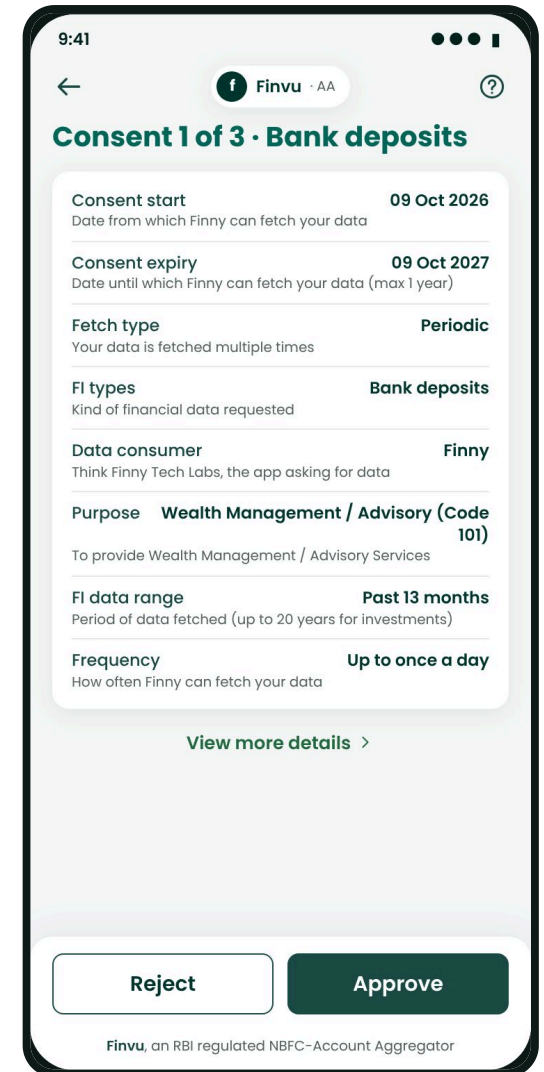

Mandatory.

Need to include approve and reject of the same visibility

POSSIBLE SOLUTION

Two equal buttons side by side: "Approve" and "Reject"

OR
probably can still be on primary and secondary action points like in our app with dark green and white of same size

NEW UI Consent: 8 mandatory fields

WHAT THE UI SHOWS

One consent card per FI type (bank deposits, mutual funds, stocks), each with its own Approve and Reject. Continue unlocks only when all are decided.

CIRCULAR

ReBIT Std 3.2(vi): "In case of multiple consents, AA shall provide the "Approve" and "Reject" button for each consent separately."

FINNY'S CURRENT FLOW

One consent for all asset types and accounts

RT'S INFERENCE

Need to have one consent screen for each account since it's at consent level. and not just FIP

POSSIBLE SOLUTION

New consent template for each FI type with details on field below in S.no 27.

Confirm with Vinay on the approval at account or FIP level for consent. My understanding is account and not FIP. Though for stocks, we should keep at FIP level else the folio level selections would become too much

9:41

← Finny · AA ?

Finny is asking for 3 consents

Why: to calculate your FIRE age and build your plan. Each consent is separate; approve or reject each one.

0 OF 3 DECIDED 3 consents

Consent 1 · Bank deposits Code 101

Accounts	Axis ··8538, Federal ··4705
Valid	09 Oct 2026 – 09 Oct 2027
Fetch	Periodic · up to once a day

See all details

Reject Approve

Consent 2 · Mutual funds Code 101

Accounts	CAMS, KFinTech
Valid	09 Oct 2026 – 09 Oct 2027
Fetch	Periodic · up to once a day

See all details

Decide on all 3 to continue

Finny, an RBI regulated NBFC-Account Aggregator

NEW UI One consent per FI type

WHAT THE UI SHOWS

Withdrawal line reads: "You can revoke consent anytime by going to your Profile page and deleting your account", with an optional "How it works" link.

CIRCULAR

ReBIT Std 3.1(vi), consent field table: Consent withdrawal: "Information on how to withdraw consent."

FINNY'S CURRENT FLOW

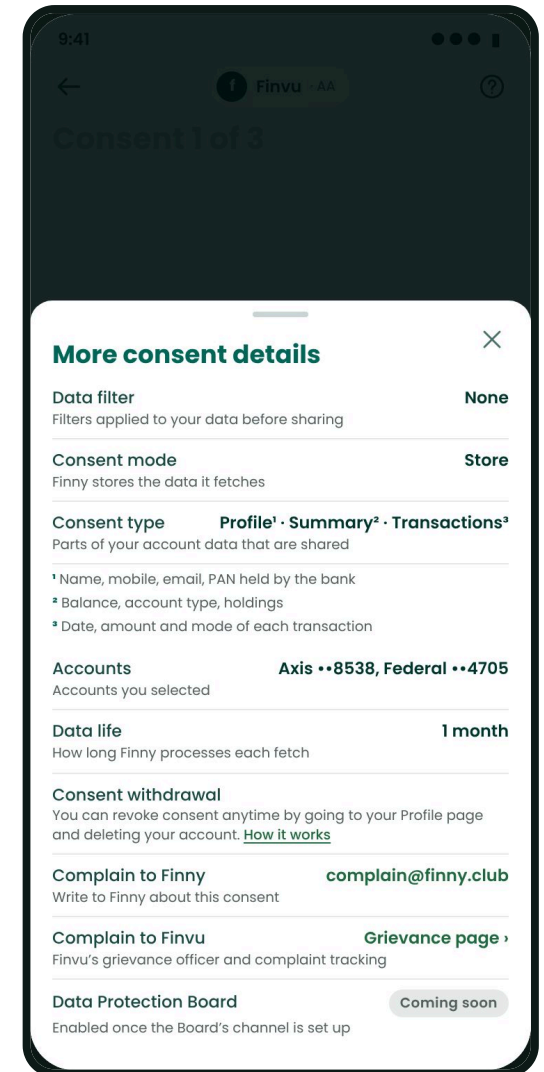

"You can revoke the consent anytime" (no link)

RT'S INFERENCE

Mandatory. We don't tell them how, need to have change of text

POSSIBLE SOLUTION

the text needs to change, you can withdraw your consent by deleting the account under the profile tab on the app's main screen or similar message.

NEW UI Consent: View more

WHAT THE UI SHOWS

Screen titles use the word "Consent" ("Consent 1 of 3 · Bank deposits").

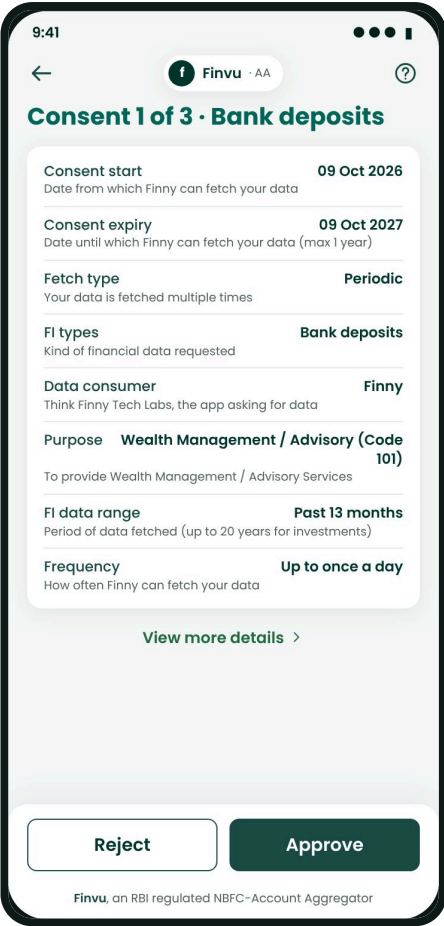

- CIRCULAR

ReBIT Std 3.2(i): "The consent management screen shall contain the word "Consent"."
- FINNY'S CURRENT FLOW

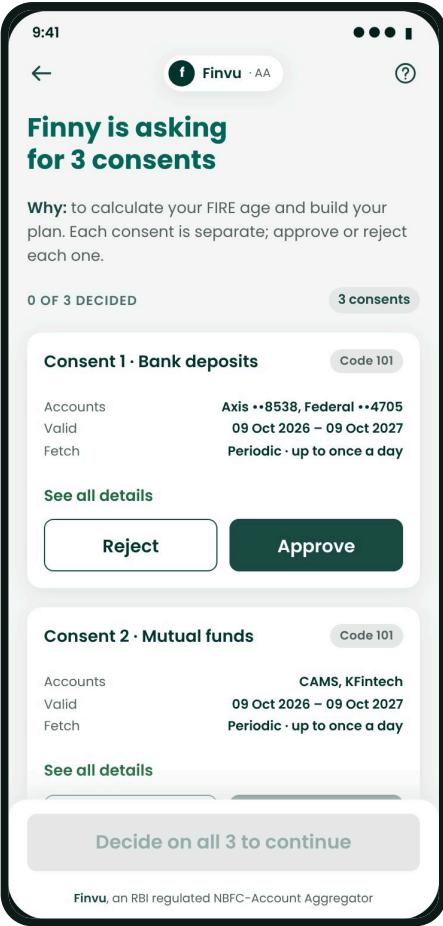

Present ("Consent overview")
- RT'S INFERENCE

Mandatory. Already met.
- POSSIBLE SOLUTION

No change

NEW UI Consent: 8 mandatory fields

NEW UI One consent per FI type

WHAT THE UI SHOWS

Optional “Listen” control reads the mandatory fields aloud. Consider later.

CIRCULAR

ReBIT Std 3.1(v): “AA Client may have voice-based feature for reading out mandatory consent parameters on consent screen while approving the consent for enhancing user experience and accessibility. (O)”

FINNY’S CURRENT FLOW

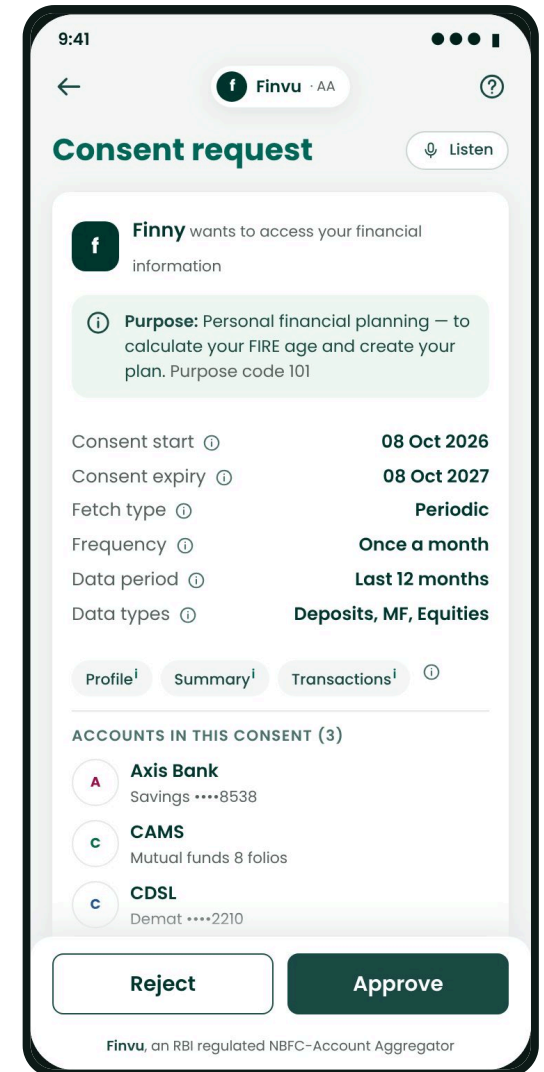

None

RT’S INFERENCE

Optional.

POSSIBLE SOLUTION

Consider later

WHAT THE UI SHOWS

Main screen lists all 8 mandatory fields with one-line meanings (CT004 values: code 101, 13 months / 20 years, up to once a day, max 1 year). "View more" holds filter, mode, consent type with superscripts, accounts, data life, withdrawal and complaint links.

CIRCULAR

ReBIT Std 3.1(ii): "In case all the consent fields cannot be fully displayed on the mobile device screen, AA Client shall at least display the following fields in the screen where the user gives consent: a. Consent Start b. Consent Expiry c. Fetch Type (One-time/ Periodic) d. FI Types (Deposit, Mutual Fund etc.) e. Data Consumer (FI-U name) f. Purpose (purpose for which data is fetched) g. FI data range (period for which data is fetched) h. Frequency of data pulls"

ReBIT Std 3.2(vii): "AA shall implement consent expiry mechanisms to ensure that consents have a defined validity period."

ReBIT Std 3.1(iv): "A single purpose code shall be displayed to user with each consent."

Sahamati CT004 template CT004: "Purpose Code: 101 ... Purpose Text: To provide (Wealth Management / Advisory) Services"

ReBIT Std 3.1(ii): "a. Consent Start b. Consent Expiry ... shall be in a font which is legible and clearly visible to user before he/ she acts on the consent request. ... The remaining fields shall be shown with a 'view more' section in the same screen."

ReBIT Std 3.1(iii): "Additionally, AA Client shall inform the customer briefly (as a superscript) regarding the type of information shared under the 'Profile', 'Summary' and 'Transactions' section of the financial information."

ReBIT Std 3.1(vi): "The consent parameters shall be given meaningful descriptions which specifies purpose of the field and is easily understood by the user."

ReBIT Std 3.1(vi), consent field table: Data Life: "Duration within which the data received from FI-P will be processed by the FI-U for the specific purpose for which consent has been given by the customer. ... The data can be retained by the FI-U as per its internal guidelines in compliance with the applicable law."

ReBIT Std 3.1(vi), consent field table: "Information on how to withdraw consent. ... Information on how to register a complaint with the FI-U. ... Information on how to register a complaint with the AA. ...

Information on how to register a complaint with the Data Protection Board. ... (Keep a provision to be enabled when the Data Protection Board is set up and reporting channel is clearly laid out)"

Sahamati CT004 template CT004: "Maximum FI Data Range: 13 Months for other FI Types; 20 years for SEBI FI Types ... Maximum Frequency: 31 per month ... Maximum Consent Validity: 1 Year ... Maximum Data Life: 1 month"

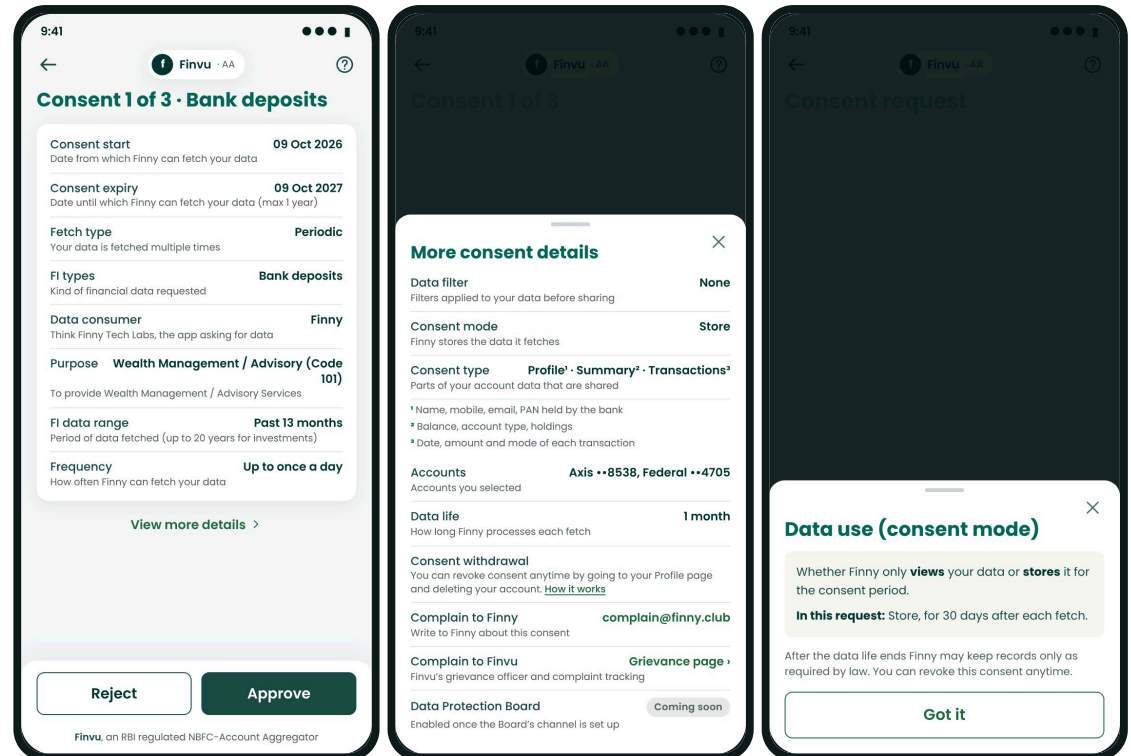

Sahamati webinar 30 Sep 2026 slide 18: "101 CT004 Wealth Management and/or Advisory Services Periodic 31 per month 13 mts / 10 yrs"

FINNY'S CURRENT FLOW

Main screen shows only 2 of 8 fields: Data updated (Daily) and Validity ("1 year", no start or expiry dates). Purpose shown as "Calculate your FIRE age" with no purpose code. Separate "Know more" sheet. "Approval requested on <today's date>" instead of start and expiry dates; data range shown as 13 months banks / 20 years investments; "Data access period: 1 month"; "Profile, Summary,

RT'S INFERENCE

Mandatory. The consent has mandatory and view more fields (details in solution). We need to create one template so it can serve for each consent type. CT004 caps validity at 1 year.

NEW UI Consent: 8 mandatory fields

NEW UI Consent: View more

PROTOTYPE 7b. What does this field mean?

Transactions" with no explanation; field labels only, no descriptions; Fetch type, FI types, Data consumer, Consent mode, Data filter, Accounts and the withdrawal / complaint links are not shown

POSSIBLE SOLUTION

Main consent screen (all 8 visible, "View more" expands in new screen/pop up):

- a. Consent Start: date from which Finny can fetch your data
- b. Consent Expiry: date until which Finny can fetch your data (max 1 year)
- c. Fetch Type: Periodic, data is fetched multiple times
- d. FI Types: bank deposits, mutual funds, stocks & ETFs, NPS
- e. Data Consumer: Finny (registered entity name)
- f. Purpose: To provide Wealth Management / Advisory Services (code 101)
- g. FI data range: past 13 months for banks, up to 20 years for investments
- h. Frequency: up to once a day

View more:

Data Filter: filters applied to your data, if any (none)

Consent Mode: Store, Finny stores the data it fetches

Consent Type: Profile, Summary, Transactions, each with a one-line superscript on what it shares

Accounts: the accounts you selected, masked

Data Life: 1 month, how long Finny processes each fetch

Consent withdrawal: "You can revoke consent anytime by going to your Profile page and deleting your account." (Account deletion must also revoke the consent at Finvu. Optional: make the line a link to a short help note, as the standard's example suggests a link.)

Complain to FI-U: link to Finny's complaint page

Complain to AA: link to Finvu's complaint page

Complain to Data Protection Board: placeholder until the Board is set up

WHAT THE UI SHOWS

Progress steps after approval, then a success summary with counts and consent status.

CIRCULAR

ReBIT Std 4.1(viii): "AA Client shall provide timely and meaningful feedback to users during interactions. It shall use visual cues, progress indicators, and notifications to keep users informed about the status of their actions. It shall also validate user inputs in real-time and provide clear error messages to assist in error resolution."

FINNY'S CURRENT FLOW

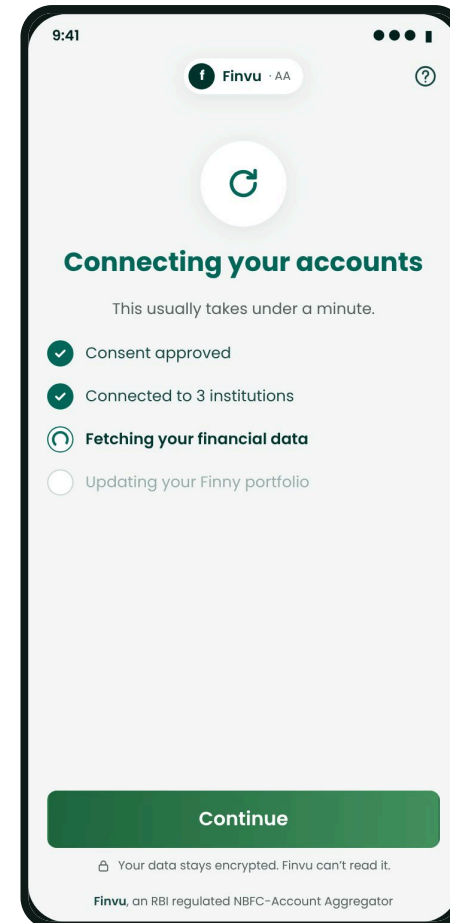

Confirmation screen with progress after approval

RT'S INFERENCE

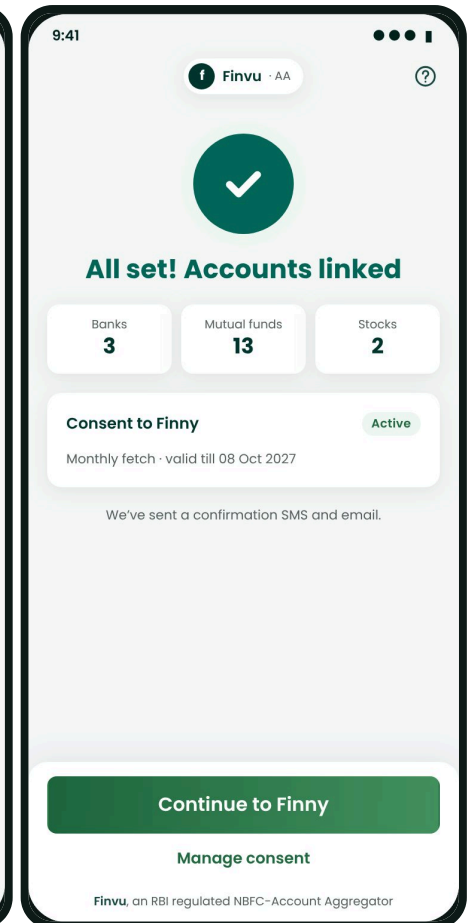

Mandatory. Already exists, no change required

POSSIBLE SOLUTION

NA

PROTOTYPE 10. Connecting accounts

PROTOTYPE 11. Success

WHAT THE UI SHOWS

Separate reject confirmation and an outcome screen; approval is never clubbed with another action.

CIRCULAR

ReBIT Std 3.2(iii): "The consent approve action shall be a separate interaction with user and shall not be clubbed with any other interaction."

FINNY'S CURRENT FLOW

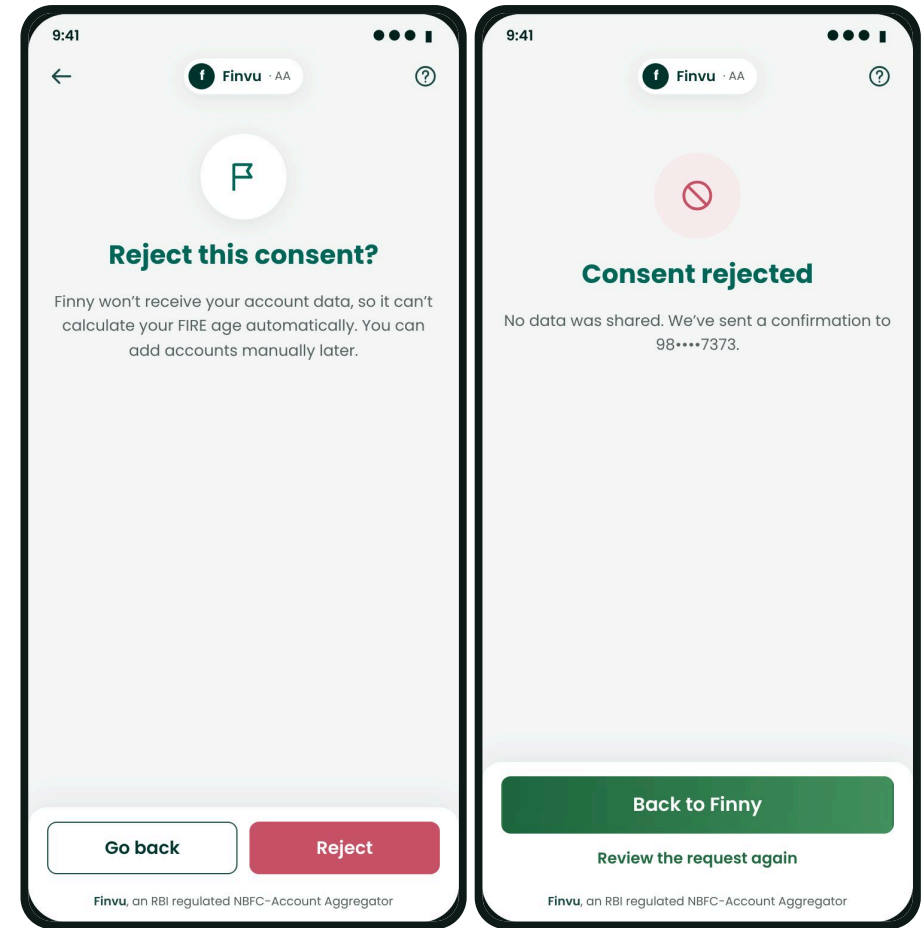

Outcome screens for reject / cancel

POSSIBLE SOLUTION

NA

RT'S INFERENCE

Mandatory. Already exists, no change required

PROTOTYPE 9. Reject confirmation

PROTOTYPE 9b. Consent rejected

WHAT THE UI SHOWS

Plain-language error states with next steps; no codes or stack traces.

CIRCULAR

ReBIT Std Annex 1.1.5(i)-(ii): "Robust error handling mechanisms shall be implemented to provide meaningful error messages and handle exceptions effectively. ... Errors shall be designed in such a way that no internal errors such as debug log, stack traces, etc., are displayed to the user."

FINNY'S CURRENT FLOW

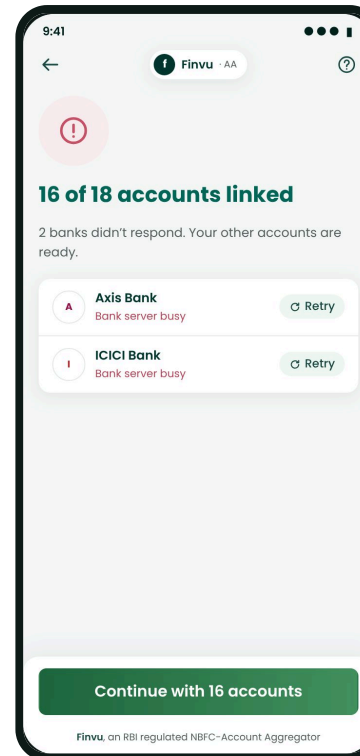

Error screens with clear messages for each failure

POSSIBLE SOLUTION

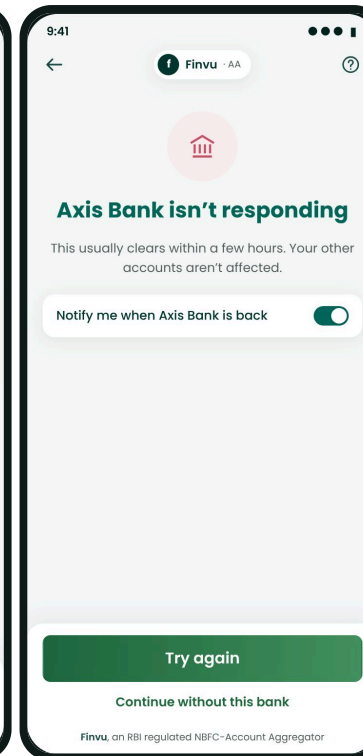

NA

RT'S INFERENCE

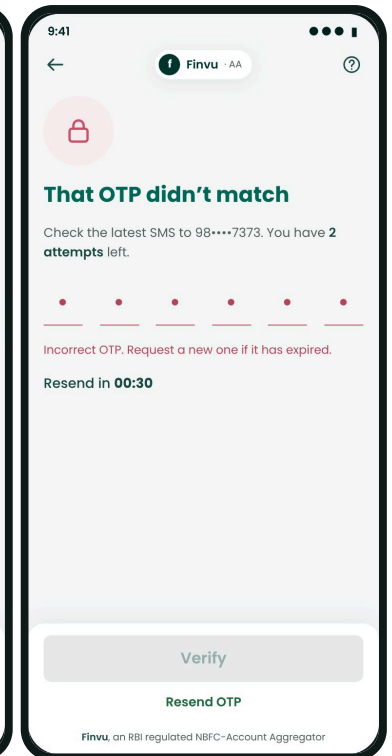

Mandatory. Already exists, no change required

PROTOTYPE 13. Partial failure

PROTOTYPE 14. Bank unavailable

PROTOTYPE 16. OTP failed

Alert on every data fetch

Add

WHAT THE UI SHOWS

Push notification from Finny after every successful fetch: “Your data was refreshed”, naming the accounts.

CIRCULAR

ReBIT Std 4.3(ii): “FI-U or AA Client (in case customer is acting as FI-U) making the FI data fetch request, shall provide notifications on the mobile or web application (as available) to the customer for each successful data fetch.”

FINNY’S CURRENT FLOW

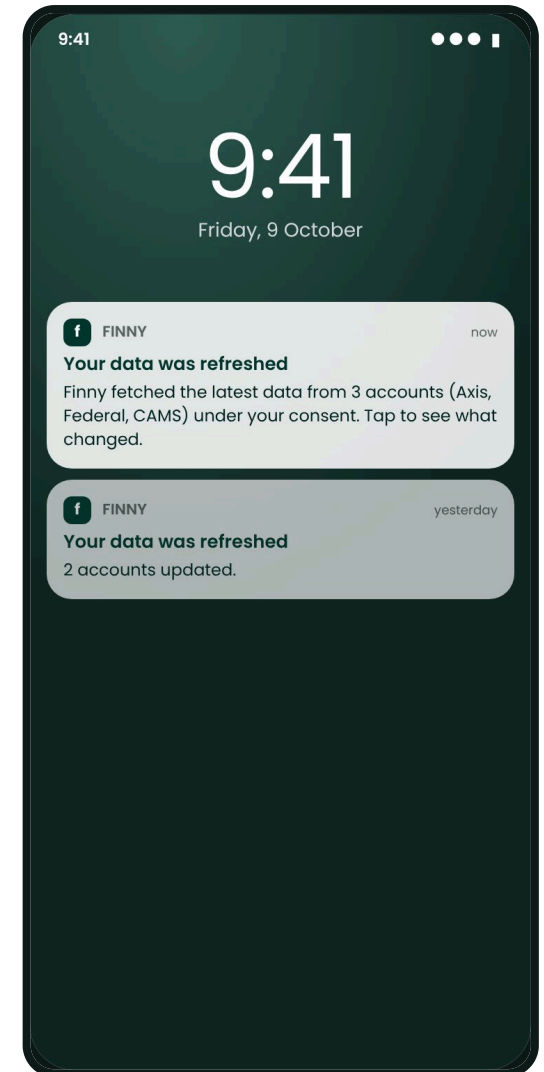

Doesn't exist

RT’S INFERENCE

Push notification on your data has been refreshed

POSSIBLE SOLUTION

PN on data fetch

NEW UI Push on each data fetch

WHAT THE UI SHOWS

Optional. Summary frequency (monthly default, up to daily) can reuse the preferences pattern. Consider later.

CIRCULAR

ReBIT Std 4.3(v): "FI-U may send SMS or e-mail notification regarding summary of data fetches ... at least once a month with option to the customer to increase the frequency to once a fortnight/ week/ day. (O)"

ReBIT Std footnote 10: "The details may include number of fetches in a period, name of FIPs accessed, purpose for which data accessed, nature of data accessed etc"

FINNY'S CURRENT FLOW

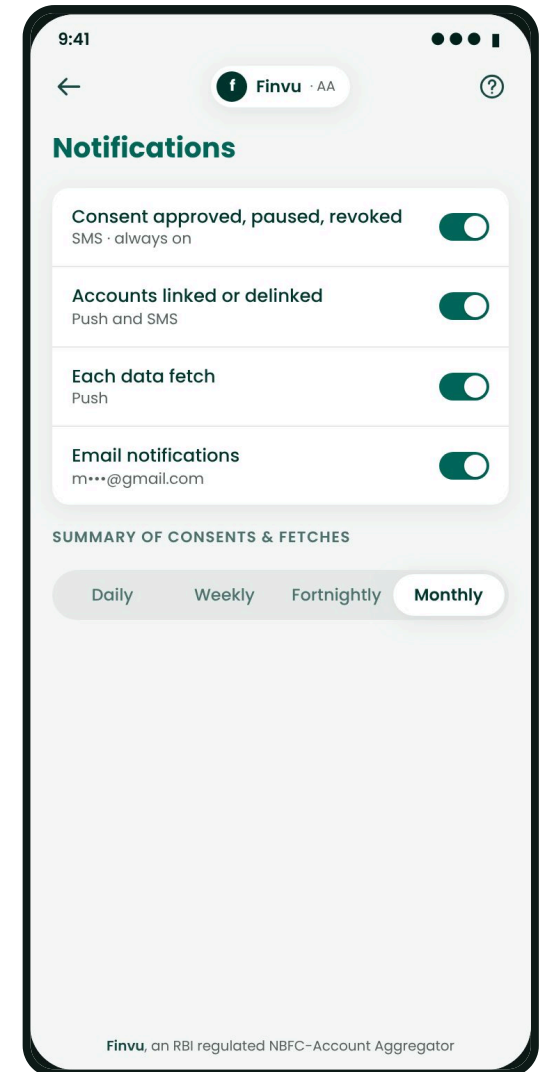

Doesn't exist

RT'S INFERENCE

Optional.

POSSIBLE SOLUTION

Consider later

PROTOTYPE Notification preferences

WHAT THE UI SHOWS

Reference of Finvu's real-time SMS for approval and linking. Finvu sends these; confirm.

CIRCULAR

ReBIT Std 4.3(i): "AA shall send real-time notifications on its mobile or web application to users about various activities such as linking of accounts, approved consents, revoked consents, on the mobile or web application."

ReBIT Std 4.3(iii): "AA shall send real-time SMS or e-mail notification to the user for activities such as consent approval, revocation, resumption and pause for awareness."

FINNY'S CURRENT FLOW

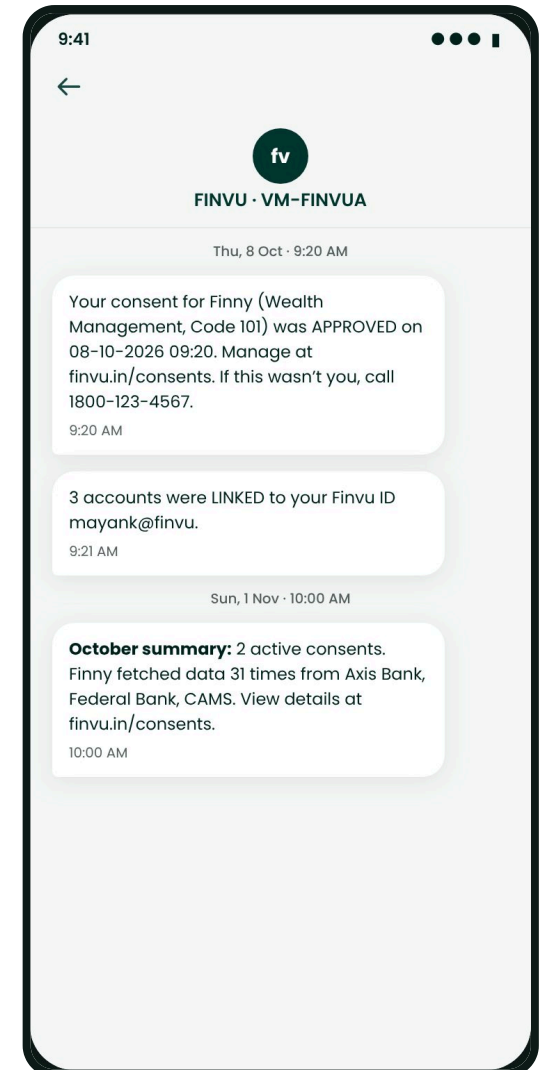

Sent by Finvu

RT'S INFERENCE

Finvu's job.

POSSIBLE SOLUTION

Confirm Finvu sends them

NEW UI Finvu SMS: alerts & monthly summary

WHAT THE UI SHOWS

Reference of Finvu's monthly summary SMS. Finvu sends these; confirm.

CIRCULAR

ReBIT Std 4.3(iv): "AA shall send SMS or e-mail notification to the customer regarding the active consent details and data fetches once a month."

FINNY'S CURRENT FLOW

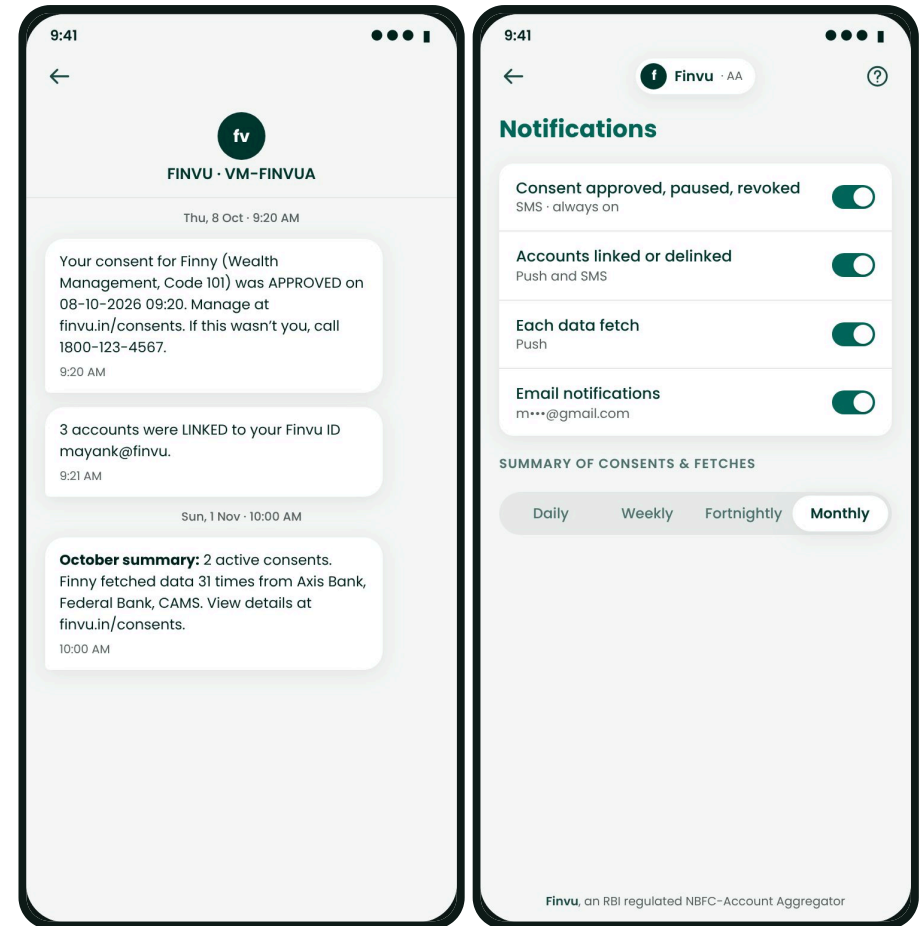

Sent by Finvu

POSSIBLE SOLUTION

Confirm Finvu sends it

RT'S INFERENCE

Finvu's job.

NEW UI Finvu SMS: alerts & monthly summary

PROTOTYPE Notification preferences

Revoke, pause, resume, delink / close AA account

To check

WHAT THE UI SHOWS

Reference for Finvu's consent page: pause, resume and revoke with confirmation. Finny links out if Finvu owns it (to check with Sahamati).

CIRCULAR

ReBIT Std 3.2(ii): "The users shall be provided with necessary control over their consents, including the ability to Approve, Reject, Revoke, Pause and Resume consents."

ReBIT Std 2.1: "In case the user desires to delink his/ her account, user authentication shall be performed by the AA before initiating the account delink request. ... AA shall ensure that all active consents linked to the account have been revoked by the user prior to delinking the account."

ReBIT Std 2.2(iii): "Account closure: In order to improve the user control on their AA account, AA shall allow its customers to close his/ her account at any point in time. During the closure of the account, AA shall ensure that all active consents linked to the account are revoked and all linked accounts are delinked."

FINNY'S CURRENT FLOW

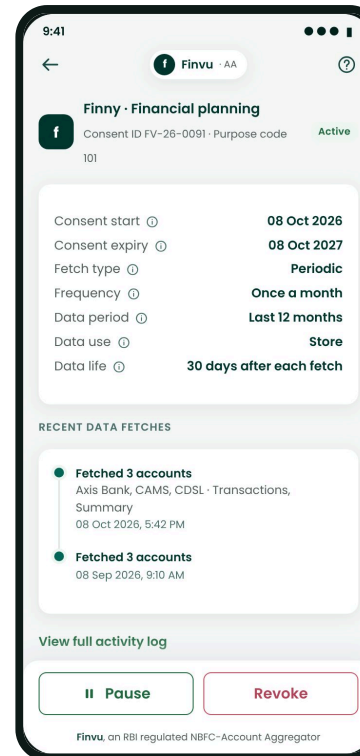

Revoke or Reject exists. Pause / resume not available in Finny (available on Finvu's page). Delink and AA account closure handled by Finvu

POSSIBLE SOLUTION

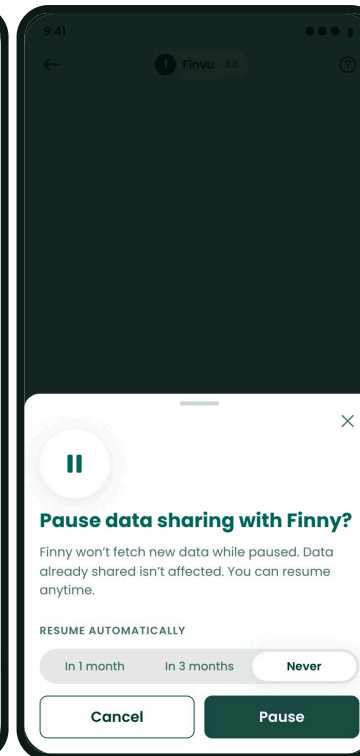

Confirm with Sahmati.

RT'S INFERENCE

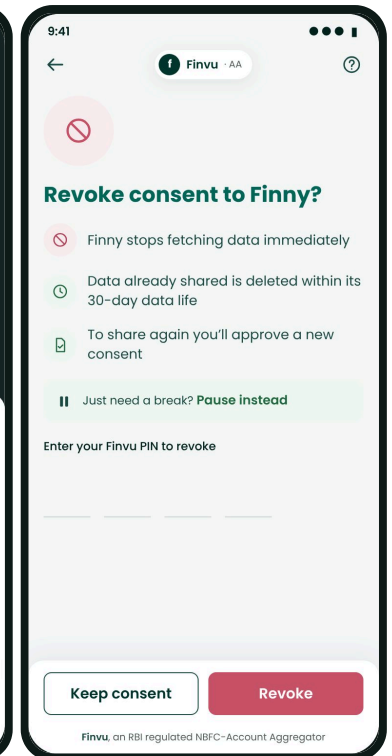

Can be Finvu's job as that exist on their page.

PROTOTYPE 17b. Consent details & controls

PROTOTYPE 17c. Pause consent

PROTOTYPE 17e. Revoke consent

WHAT THE UI SHOWS

Reference for Finvu’s consent dashboard and fetch history. Finvu-owned (to check).

CIRCULAR

ReBIT Std 3.2(x): “In order ensure that users have the ability to review their past consents, AA shall maintain a record of all the consents approved by the user. It shall provide an easily accessible “Consent Dashboard” which may improve transparency in the eco-system. The dashboard shall provide snapshot of active consents with meaningful descriptions and details of FI data fetches that occurred based on those consents.”

FINNY’S CURRENT FLOW

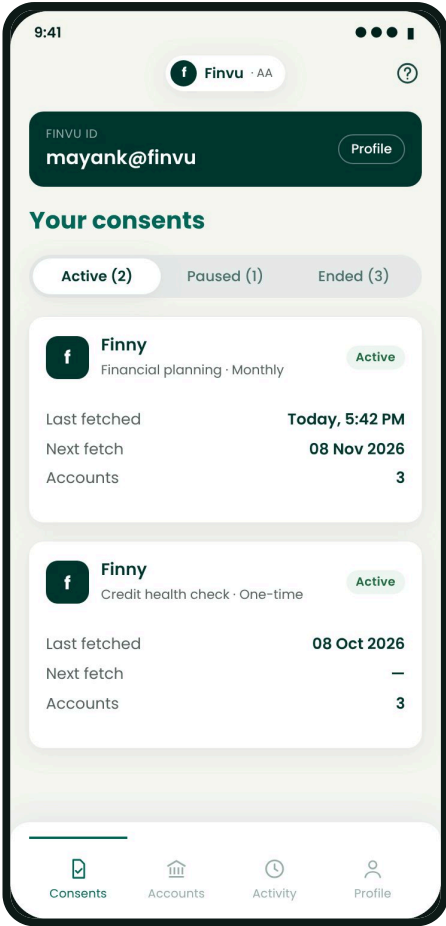

Exists on Finvu

RT’S INFERENCE

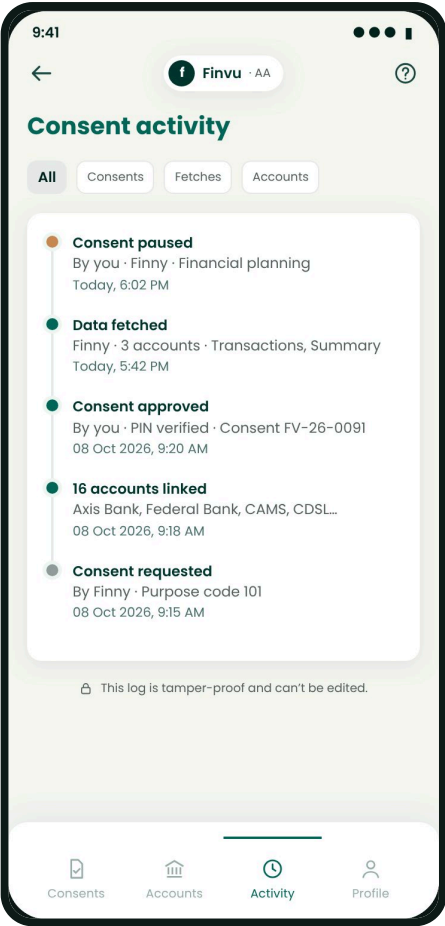

Can be Finvu's job as that exist on their page.

POSSIBLE SOLUTION

Confirm with Sahmati

PROTOTYPE 17. Your consents (dashboard)

PROTOTYPE 18. Consent activity (audit trail)

WHAT THE UI SHOWS

"Complain to Finny: complain@finny.club" inside View more.

CIRCULAR

ReBIT Std 3.1(vi), consent field table: Complain to FI-U: "Information on how to register a complaint with the FI-U."

FINNY'S CURRENT FLOW

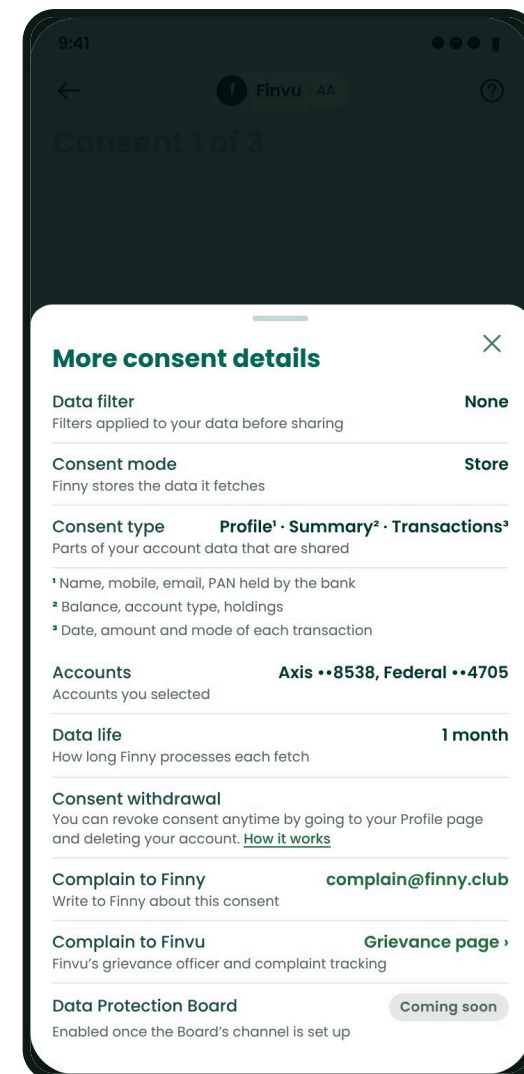

Doesn't exist

RT'S INFERENCE

Mandatory.

POSSIBLE SOLUTION

Show in view more as write to complain@finny.club

NEW UI Consent: View more

WHAT THE UI SHOWS

"Complain to Finvu" links to Finvu's grievance page (officer, contacts, tracking).

CIRCULAR

ReBIT Std 4.2(viii): "Details of grievance redressal matrix shall be displayed prominently to the user. AA Client shall display the name and contact details of the Grievance Redressal Officer. Further, in order to enable the customer to lodge complaints smoothly and track the same, AA shall provide an easily accessible platform in its client application."

FINNY'S CURRENT FLOW

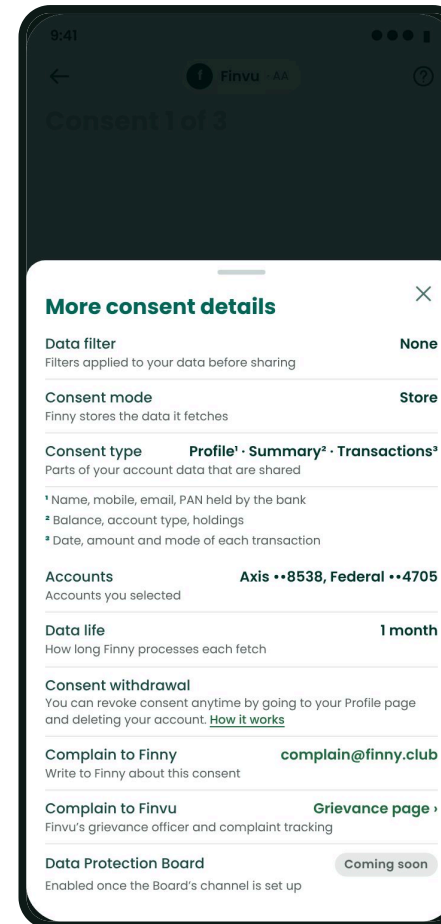

Doesn't exist

RT'S INFERENCE

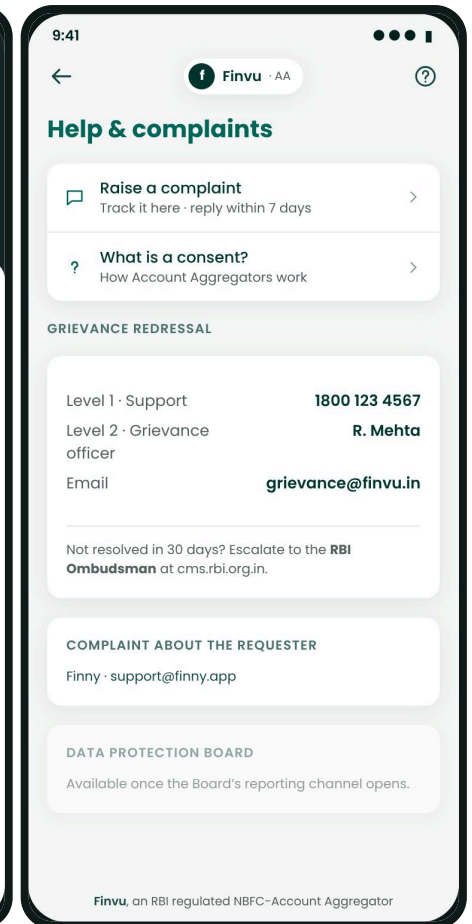

Mandatory. Finvu's grievance page; Finny only links to it.

POSSIBLE SOLUTION

Link to Finvu's grievance page on the consent screen under view more details.

NEW UI Consent: View more

PROTOTYPE Help & complaints

WHAT THE UI SHOWS

"Know more" / FAQ explains each consent term in plain language.

CIRCULAR

ReBIT Std 4.2(vii): "AA Client shall provide easy access to customers for general information such as the significance of consent artefact, consent management process, etc. to understand the implications of actions taken during consent management operations."

FINNY'S CURRENT FLOW

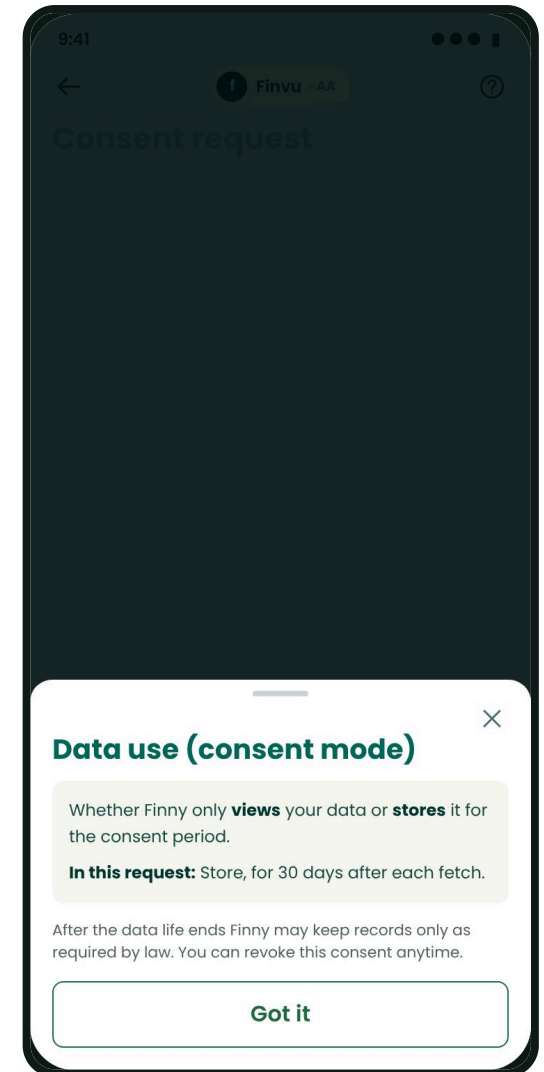

"Know more"

RT'S INFERENCE

Mandatory. Already met by "Know more". FAQ

POSSIBLE SOLUTION

NA

PROTOTYPE 7b. What does this field mean?

WHAT THE UI SHOWS

Only if the SDK is used: priming screen asks for mobile data and SMS permission, shows SMS charges, picks the SIM and tells the user to stay on screen; the OTP is then auto-read.

CIRCULAR

ReBIT Std Annex 1.6.1(i): "To verify the authenticity of the SIM card, the app shall initiate outgoing SMS from registered number containing SIM binding alphanumeric string to AA server and after that OTP shall be triggered from AA server to registered number which shall be auto read in AA Client (Manual entry shall be disallowed)."

ReBIT Std Annex 1.6.3(ii)-(iii): "Mandatory Mobile data: The mobile data must be mandatorily available during the device binding process. ... Restriction on app toggle: User must not be allowed to toggle between the apps during device binding process except to see notification regarding SMS charges if applicable."

FINNY'S CURRENT FLOW

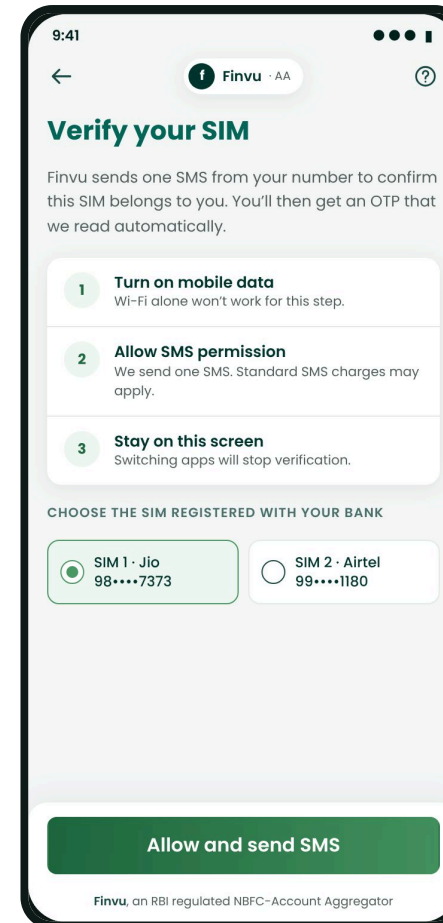

Doesn't exist

RT'S INFERENCE

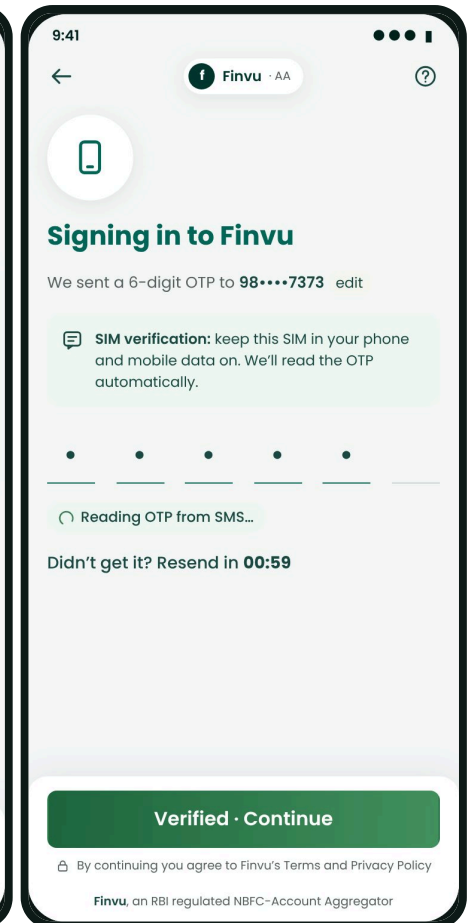

Since we don't use SDK, shouldn't apply. Need to check

POSSIBLE SOLUTION

Permission priming screen; iOS equivalent from Finvu

NEW UI SIM binding permission priming

PROTOTYPE 2. Verify mobile (SIM binding)

WHAT THE UI SHOWS

Only if the SDK is used: "Linking isn't available on this device" blocks rooted or jailbroken phones and offers manual entry.

CIRCULAR

ReBIT Std Annex 1.4.3(iii): "Rooted or jailbroken devices shall not use the AA Client to ensure the integrity and security of user data. AA shall implement necessary device integrity checks during app installation and runtime to detect and block access from compromised devices."

FINNY'S CURRENT FLOW

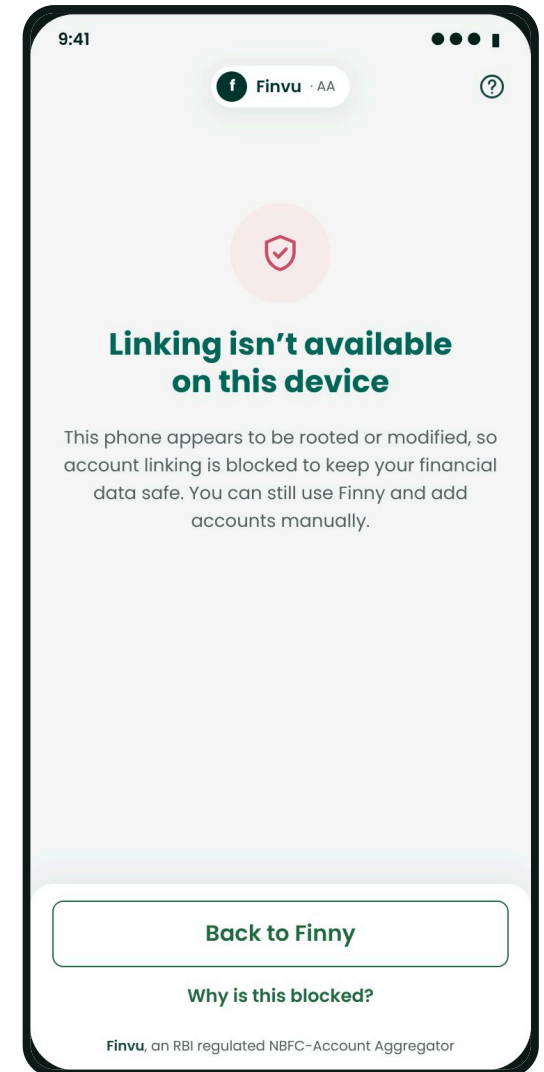

Doesn't exist

RT'S INFERENCE

Since we don't use SDK, shouldn't apply. Need to check

POSSIBLE SOLUTION

"Linking isn't available on this device" screen

NEW UI Linking isn't available on this device

Items with no UI change

Backend and paperwork items. Nothing changes on screen; listed here so the review covers all 47 rows.

#	ITEM	ACTION	UI IMPACT	POSSIBLE SOLUTION (CSV)
40	Fair Use template ID Consent request settings (backend)	Backend	No UI change. Backend passes the Fair Use Template ID in Purpose refUri (by 30 Nov 2026).	Check with Vinay and then act.
41	Pull size Consent request settings (backend)	Backend	No UI change. Backend keeps fetches incremental.	Check with Vinay and then act.
42	Insurance data frequency Consent request settings (backend)	Keep	No UI change today; apply the no-daily-fetch rule when insurance is added.	NA
43	Older consents Consent request settings (backend)	Backend	No UI change. Backend validates older consents against Fair Use limits.	Check with Vinay and then act.
44	Profile sent to AA Consent request settings (backend)	Keep	No UI change. Only minimum masked profile details are sent.	NA
47	SDK paperwork Only if the Finvu SDK is used	Frontend	No UI change. Paperwork: responsibilities and SDK due-diligence documents.	Prepare the documents
