

finny

Account Aggregator flows

Design review

Every screen and edge case for discovering, linking and consenting through Finvu, rebuilt on the Finny design system and checked against the ReBIT "Standards to enhance customer protection and user experience within the AA framework" v1.0 (30 Apr 2026).

Prepared 08 Oct 2026 · Interactive version: [finny-design-system/aa-flows.html](#)

Flow map

Screens are numbered in the order a user meets them. Numbers in the current design (1–19) are kept in titles so you can compare side by side.

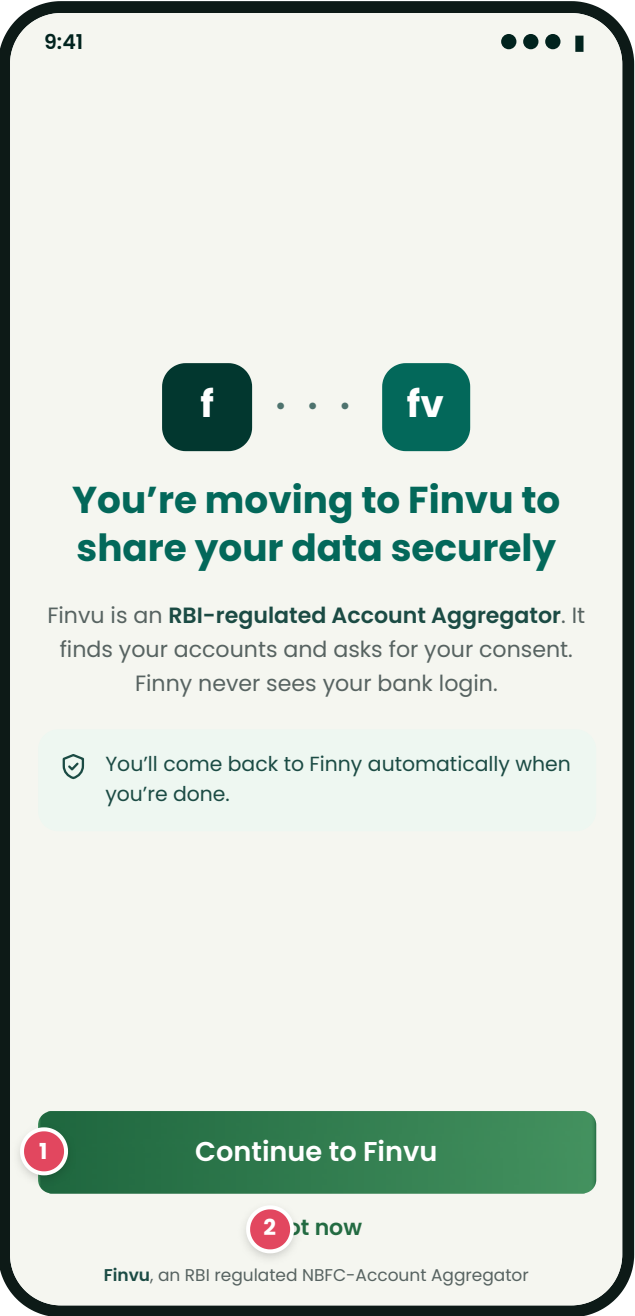

1 Numbered pin = tappable element, explained on the right

Improved exists in current design

New added for the standard

§3.2.iv ReBIT clause

Edge cases & states to verify

NEW SCREEN

Hand-off to Account Aggregator

- New
- §4.2.i
- §4.2.ii
- §4.2.iii

INTERACTIONS

- 1 Continue to Finvu → 1. Intro
- 2 Not now → Previous screen

WHAT CHANGED & WHY

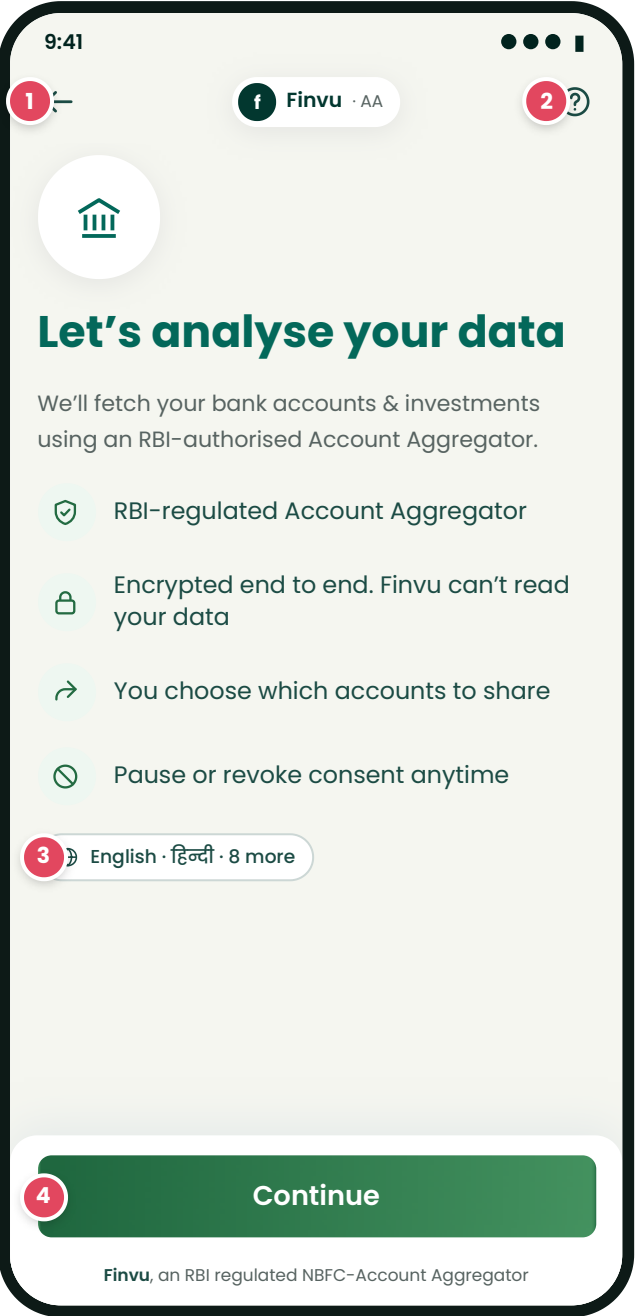

- Missing in the current flow. Before leaving Finny, tell people they are moving to Finvu, an RBI-regulated AA, and why.
- Shows Finny → Finvu so the change of app is expected, not alarming.

EDGE CASES & STATES TO VERIFY

- Finvu app not installed: fall back to the SDK or web flow (deep-link fallback, Annexure 2.1.e).
- User taps Not now: return to the Finny screen they came from, with no consent created.

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

1. Intro

- Improved
- §4.2.iii
- §4.2.iv
- §4.1.ii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **English · हिन्दी · 8 more** → Language
- 4 **Continue** → 2. Verify mobile (SIM binding)

WHAT CHANGED & WHY

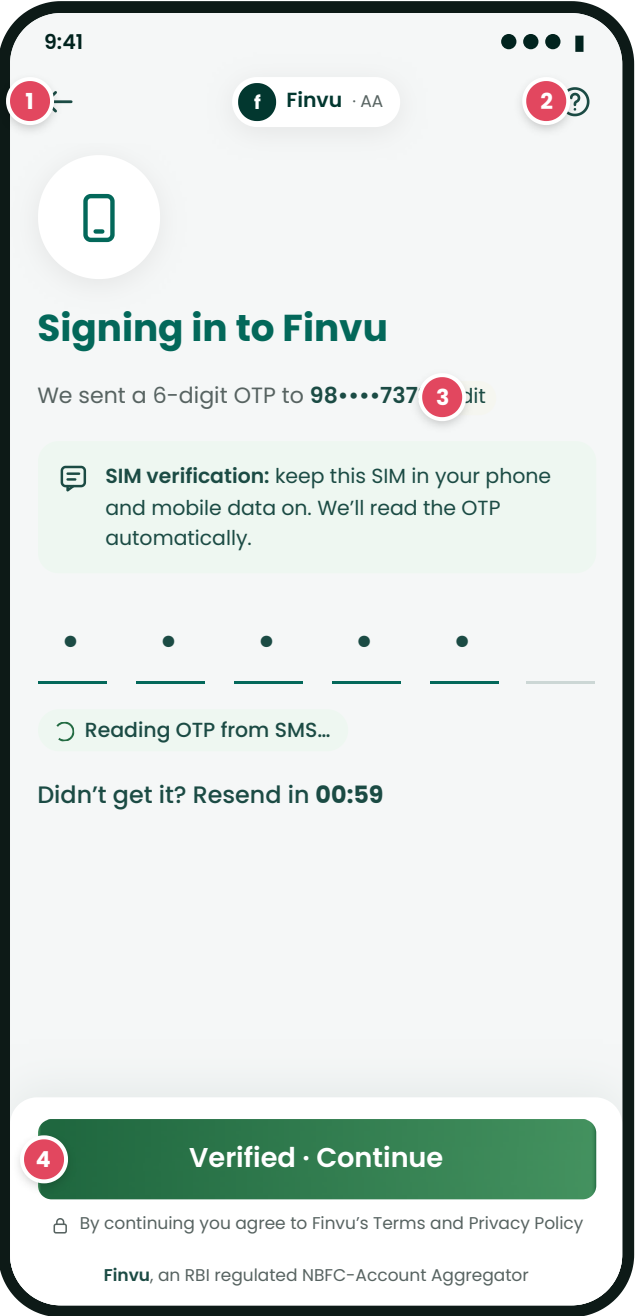

- AA name at the top and the RBI tagline at the bottom on every AA screen.
- Four trust points reduced to short, scannable lines with a clear “revoke anytime” promise.
- Language switcher in reach on the first screen.

EDGE CASES & STATES TO VERIFY

- Language chosen here persists for the rest of the AA flow.
- Help (?) is reachable on every AA screen and opens complaints and grievance contacts.

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

2. Verify mobile (SIM binding)

Improved §5.1.i §5.1.ii §1.6.1 §1.6.3

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **edit** → otp-change
- 4 **Verified · Continue** → 3. Existing Finvu account

WHAT CHANGED & WHY

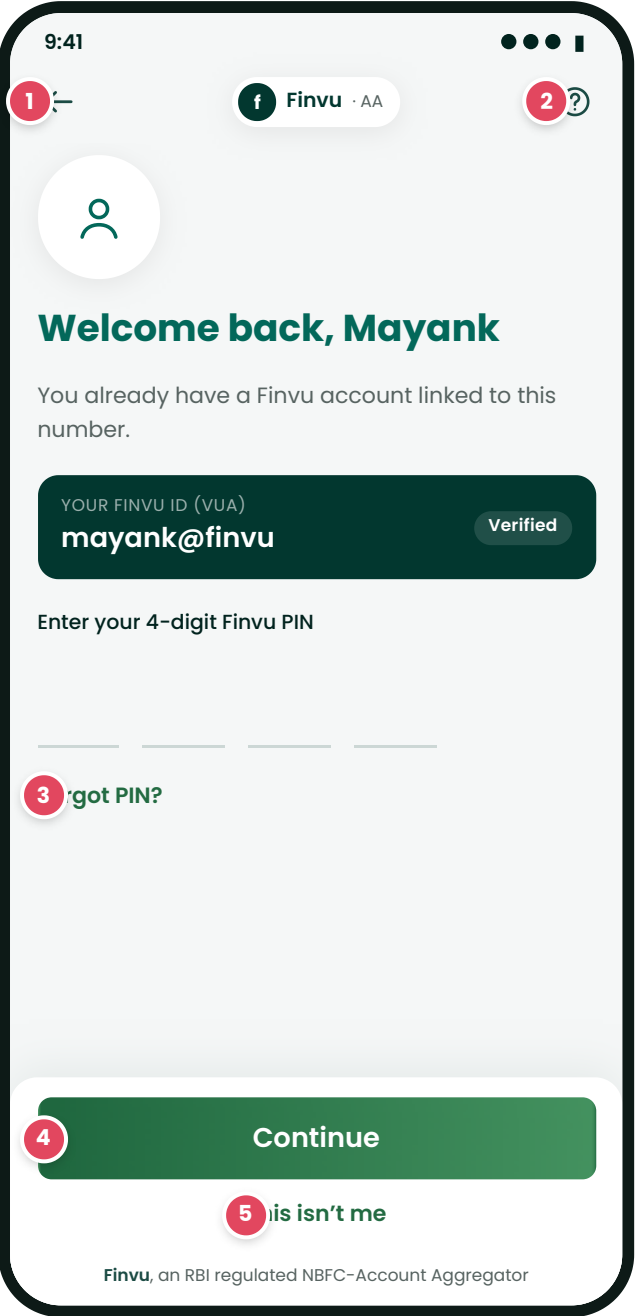

- OTP is read automatically from the SMS sent from this SIM; manual entry is disabled during SIM binding.
- Digits are masked (●) as required for OTPs and PINs.
- Clear status: reading → verified, with a countdown instead of a dead “Verify” button.

EDGE CASES & STATES TO VERIFY

- SMS not received in 59 s: Resend becomes active; after 3 resends show support contact.
- Mobile data off or second SIM active: SIM binding cannot run, so show a blocking message with steps.
- Manual typing is disabled while SIM binding runs (§1.6.1).

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

3. Existing Finvu account

Improved §2.2.i §2.2.ii §4.2.vi

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Forgot PIN?** → Recover account / reset PIN
- 4 **Continue** → 4. Add identifiers (optional)
- 5 **This isn't me** → Recover account / reset PIN

WHAT CHANGED & WHY

- Detects an existing AA account before creating a new one and shows the VUA prominently.
- Second factor (PIN) is asked on the same screen for returning users: 2FA = SIM-bound OTP + PIN.
- Clear alternative: "This isn't me" leads to recovery, not a dead end.

EDGE CASES & STATES TO VERIFY

- Wrong PIN: show attempts left; lock for 30 min after 5 failures.
- Account belongs to someone else: 'This isn't me' leads to Recovery.

Create your Finvu ID

Your ID (VUA) is how banks and apps identify your Account Aggregator account.

Finvu ID

mayank.j

@finvu

✓ Available

Full name (as on PAN)

Mayank Jain

Email (optional)

you@example.com

Set a 4-digit PIN

3

Create account

Finvu, an RBI regulated NBFC-Account Aggregator

NEW SCREEN

3b. New user: create Finvu ID

- New
- §2.2.i
- §2.2
- §5.1.i

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Create account → 4. Add identifiers (optional)

WHAT CHANGED & WHY

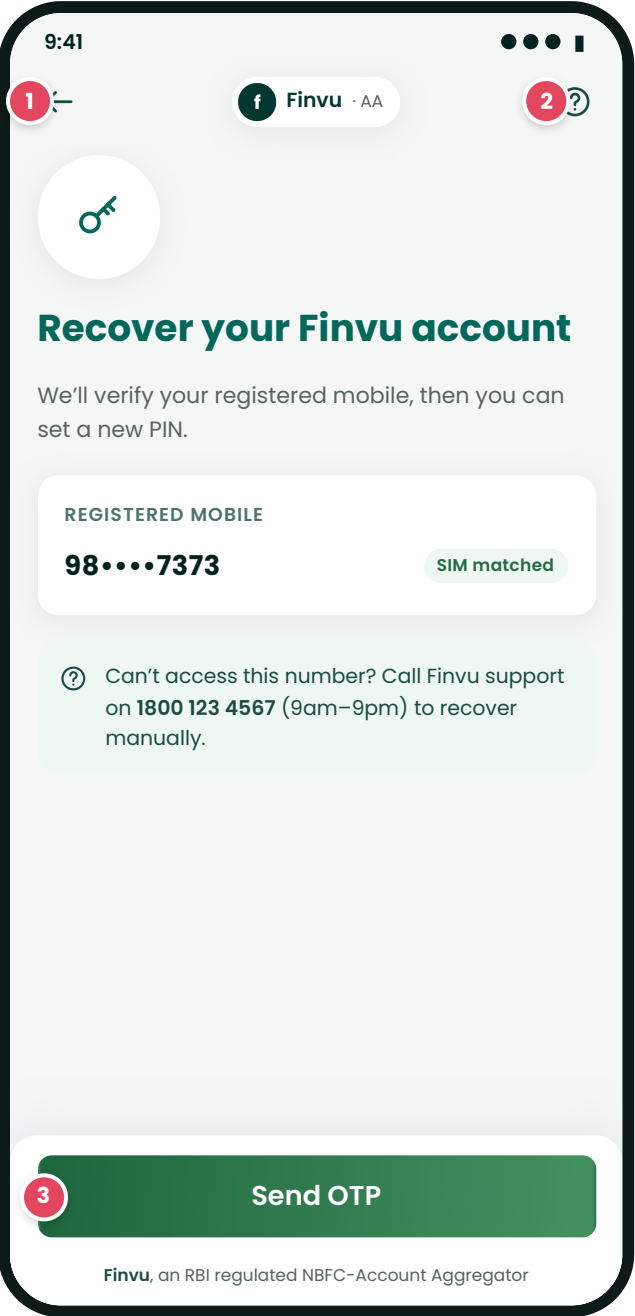

- For first-time users: suggest a VUA, let them edit it, check availability live.
- Collects only the minimum profile (name, optional email); PIN set here completes 2FA.

EDGE CASES & STATES TO VERIFY

- VUA taken: show 2 available suggestions inline.
- Name doesn't match PAN: warn but allow (verification happens at the FIP).

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK

NEW SCREEN

Recover account / reset PIN

New §2.2.iv

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Send OTP** → 2. Verify mobile (SIM binding)

WHAT CHANGED & WHY

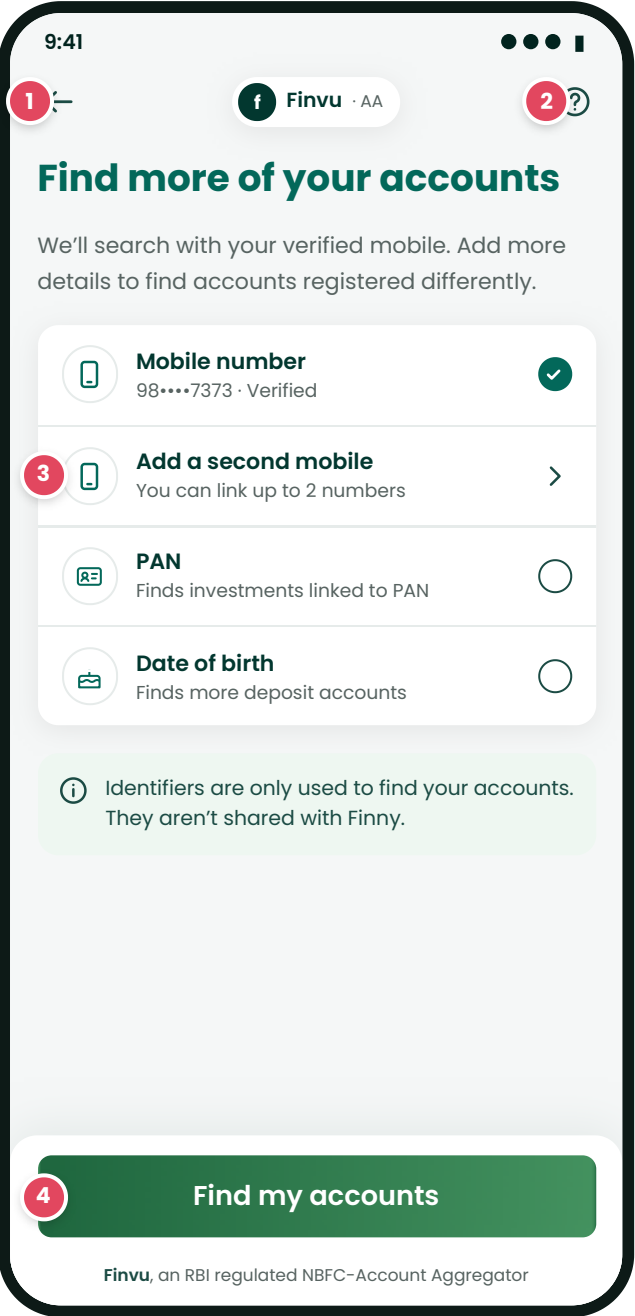

- Recovery by verifying the registered mobile, available in-app or through support.
- Support contact shown as selectable text.

EDGE CASES & STATES TO VERIFY

- Registered SIM not in phone: only manual recovery through support is possible.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

4. Add identifiers (optional)

Improved §2.1.i §2.1.ii §3.2.ix

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Add a second mobile** You can link up to 2 numbers → 4b. Add a second mobile
- 4 **Find my accounts** → 5. Discovering accounts

WHAT CHANGED & WHY

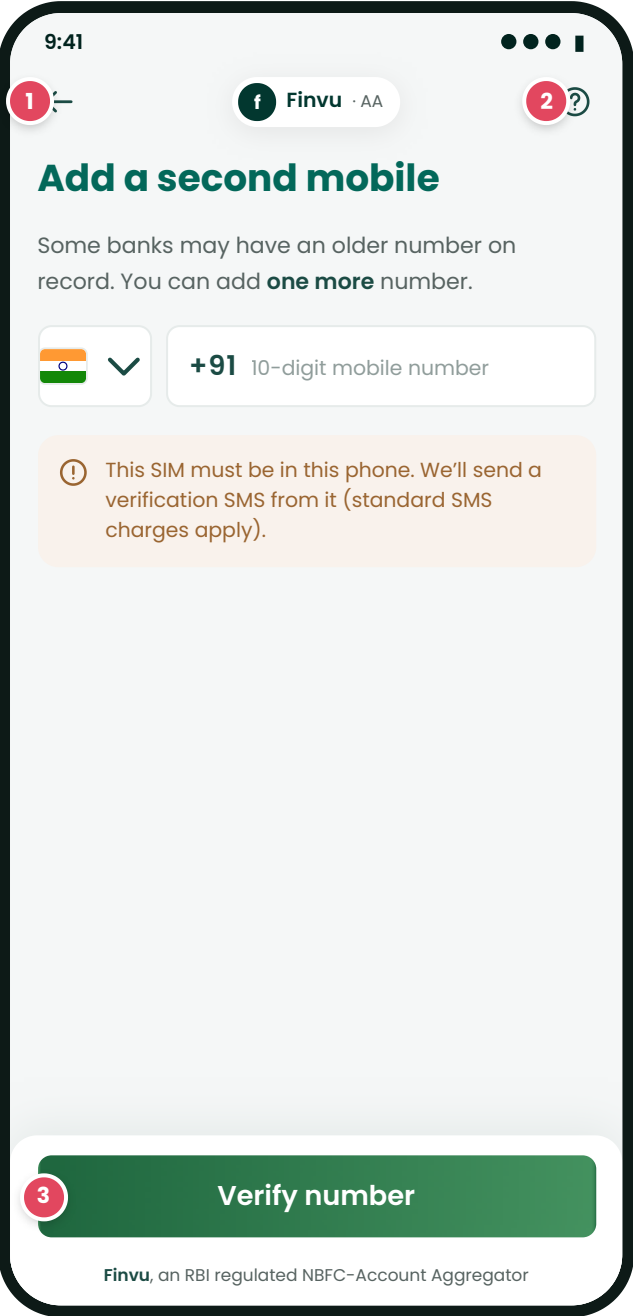

- Up to two mobile numbers; PAN and date of birth are optional and unticked by default.
- Each identifier says what it unlocks (“finds accounts not linked to your mobile”).
- Primary action changes to “Find accounts” and works with just the verified mobile.

EDGE CASES & STATES TO VERIFY

- Second number already linked to another AA account: block with explanation.
- PAN and DOB stay unticked unless the user opts in.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

4b. Add a second mobile

New §2.1.i §5.1.iii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Verify number → 4. Add identifiers (optional)

WHAT CHANGED & WHY

- Second number must also be SIM-bound, so the user is told to insert that SIM first.
- Hard limit of two numbers stated upfront.

EDGE CASES & STATES TO VERIFY

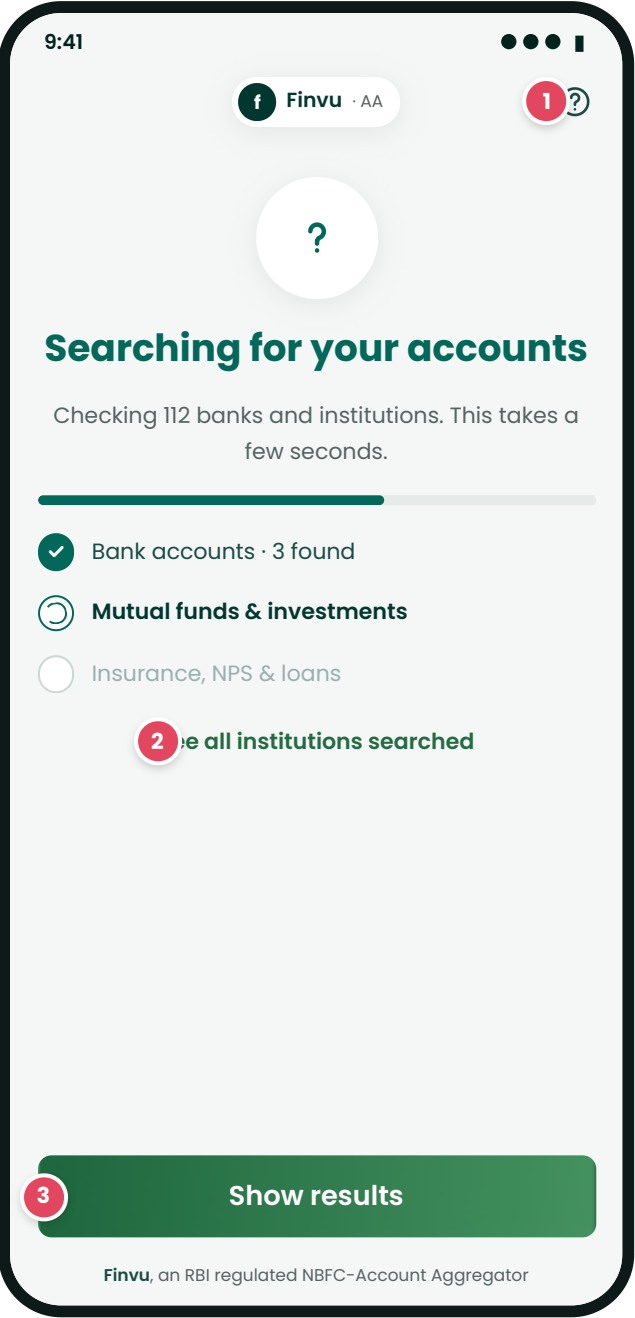

- Limit reached (2 numbers): the entry is hidden and the reason shown.
- SIM for the new number not present: SIM binding fails, so show retry.

REVIEW

☐ Design OK

☐ Copy OK

☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

5. Discovering accounts

Improved §4.1.viii §4.1.vii

INTERACTIONS

- 1 **Help and complaints** → Help & complaints
- 2 **See all institutions searched** → Institutions on Finvu
- 3 **Show results** → 6. Choose accounts to link

WHAT CHANGED & WHY

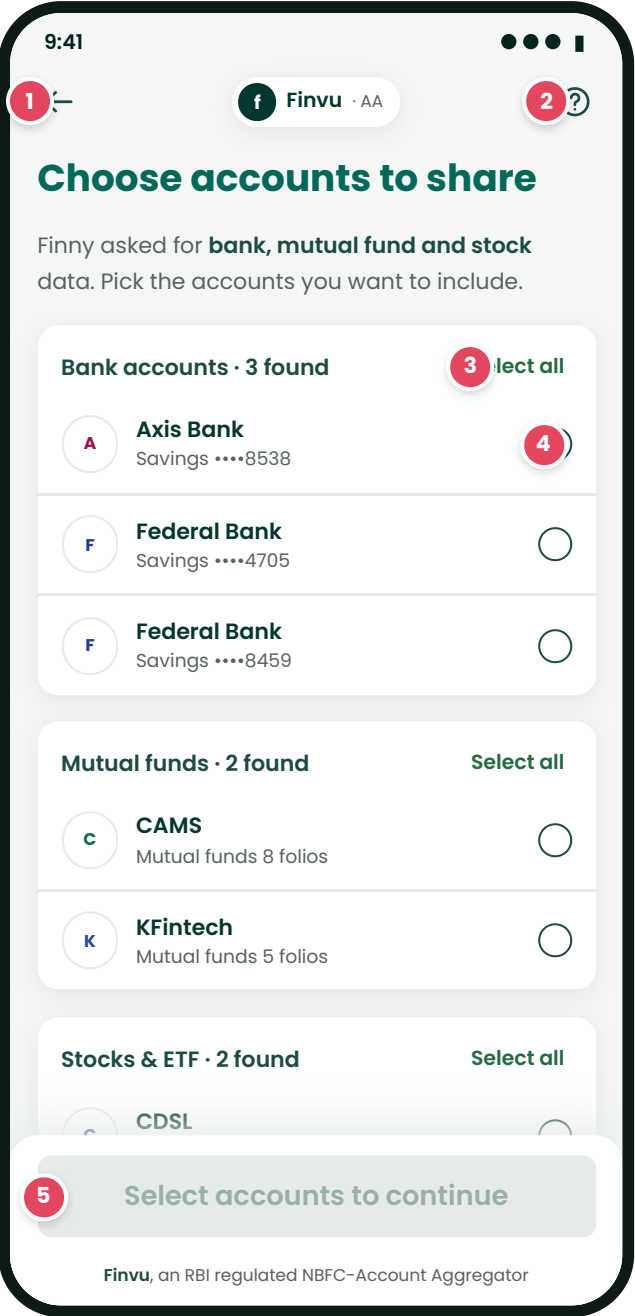

- Live progress with counts per institution type instead of a static list.
- The list of institutions being searched is visible (transparency on FIPs).
- Auto-advances; nothing to tap.

EDGE CASES & STATES TO VERIFY

- Search takes over 30 s: keep progress and offer to notify when done.
- Network drops mid-search: resume from the last finished step.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

6. Choose accounts to link

Improved §3.2.ix §3.2.viii §4.1.ii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Select all** Selects or clears every account in the group
- 4 **Select Axis Bank ****8538** Opt-in checkbox, never pre-selected
- 5 **Select accounts to continue** → 6b. Confirm with bank OTP

WHAT CHANGED & WHY

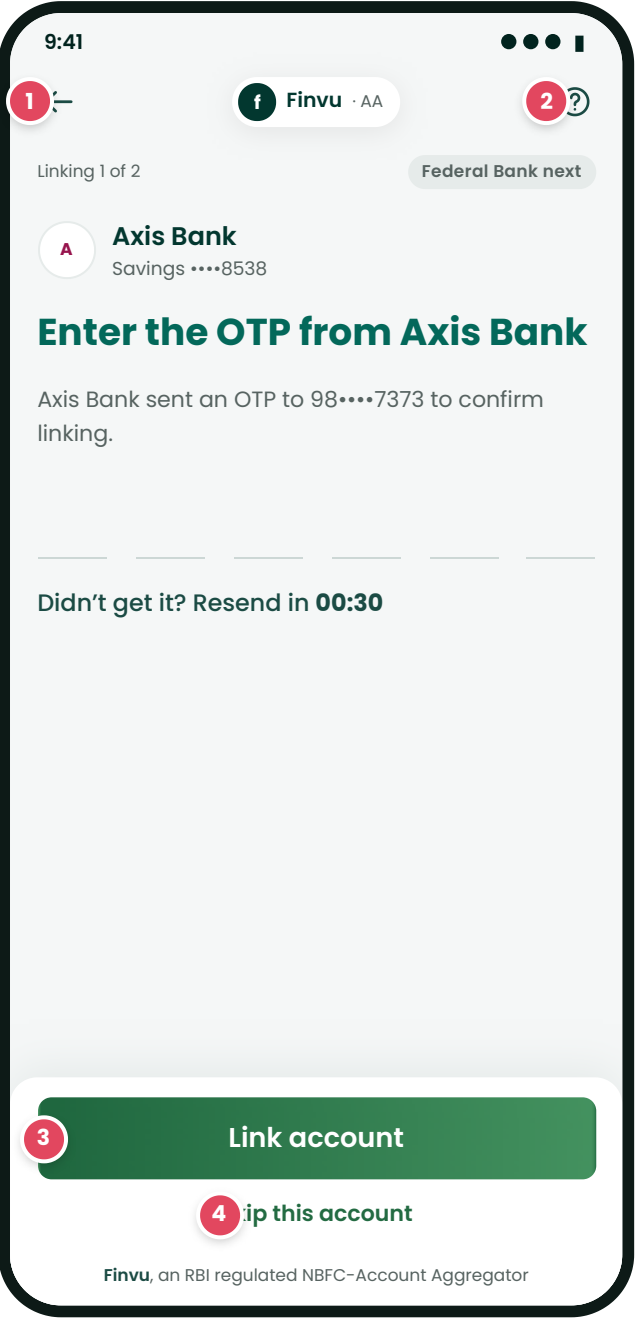

- Fixed: no account is pre-selected. The current design pre-ticks Axis Bank, which the standard disallows.
- “Select all” per group for speed, and the button counts what you picked.
- Only FI types Finny asked for are shown (deposits, MF, equities).

EDGE CASES & STATES TO VERIFY

- Zero accounts selected: CTA stays disabled ('Select accounts to continue').
- FI types not requested by Finny are not shown (§3.2.viii).
- Accounts already linked show a 'Linked' tag instead of a checkbox.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

6b. Confirm with bank OTP

New

§5.1.ii

§4.1.viii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Link account** → 7. Consent (summary)
- 4 **Skip this account** → 7. Consent (summary)

WHAT CHANGED & WHY

- Some banks need their own OTP to link. Shown as a queue ("1 of 2") so people know how many are left.
- Masked digits, inline error and resend.

EDGE CASES & STATES TO VERIFY

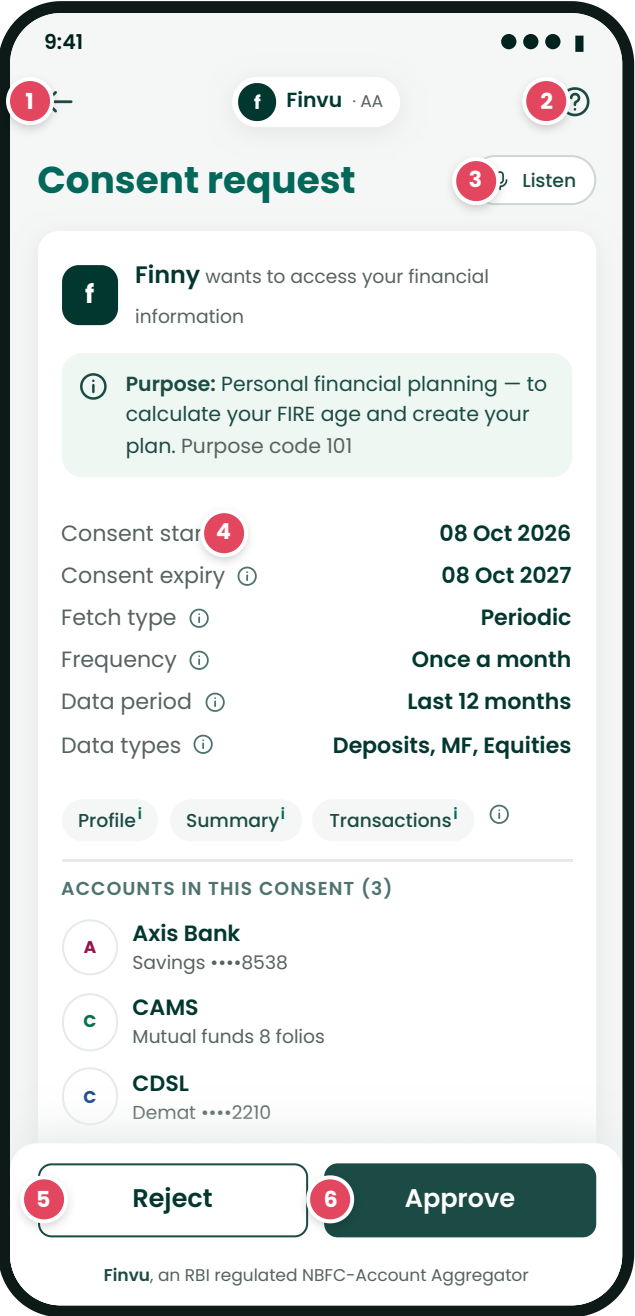

- Bank OTP wrong: inline error plus attempts left.
- User skips a bank: it is excluded from the consent; others continue.

REVIEW

☐ Design OK

☐ Copy OK

☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

7. Consent (summary)

Improved §3.1.ii §3.1.iii §3.1.iv §3.2.i §3.2.iv §3.2.v

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Listen** Reads mandatory fields aloud (optional)
- 4 **What is Consent start?** Opens meaning of this field (every ⓘ)
- 5 **Reject** → 9. Reject confirmation
- 6 **Approve** → 7d. Confirm consent

WHAT CHANGED & WHY

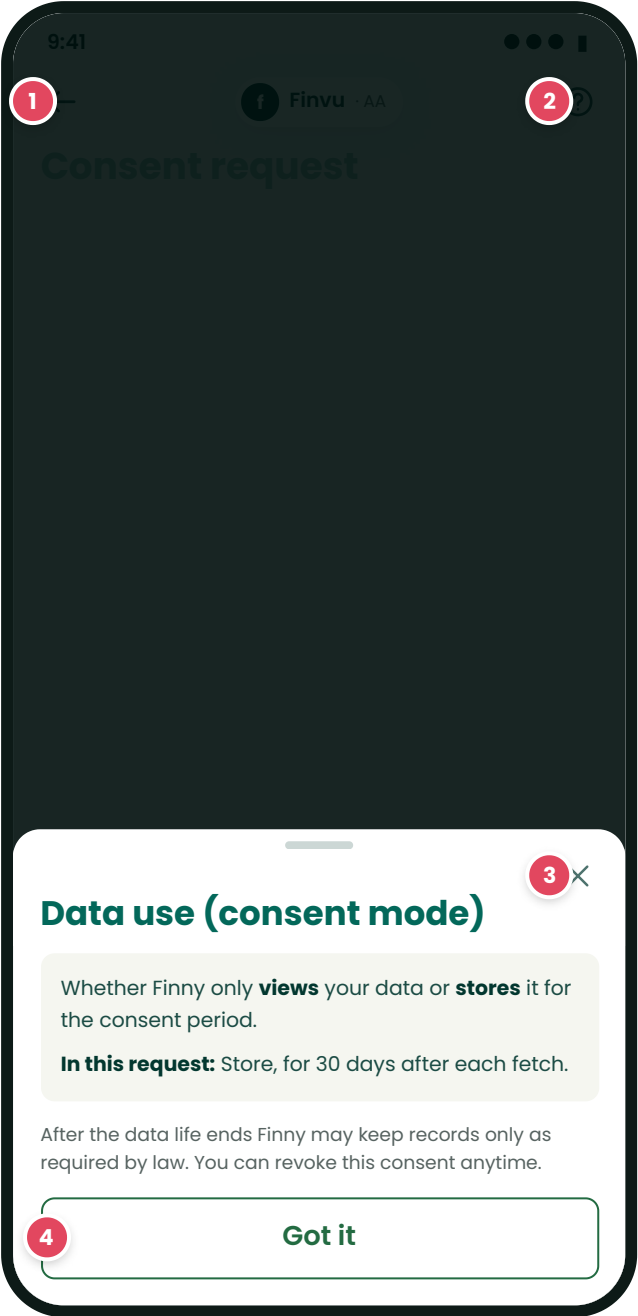

- All 8 mandatory fields are visible before the decision: start, expiry, fetch type, FI types, requester, purpose, data period, frequency.
- Every field has an ⓘ with its plain-language meaning; Profile, Summary and Transactions get a superscript explainer.
- “View all details” expands on the same screen (no separate page).
- Approve and Reject are the same size; neither is pre-selected. Optional “Listen” reads the mandatory fields aloud.

EDGE CASES & STATES TO VERIFY

- Long purpose text wraps; all 8 mandatory fields stay visible above the decision.
- Approve is never pre-selected; nothing happens on screen load.
- Listen read-out is optional and fails silently to a toast if audio is unavailable.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

7b. What does this field mean?

New §3.1.iii §3.1.vi

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Close** → Previous screen
- 4 **Got it** → Previous screen

WHAT CHANGED & WHY

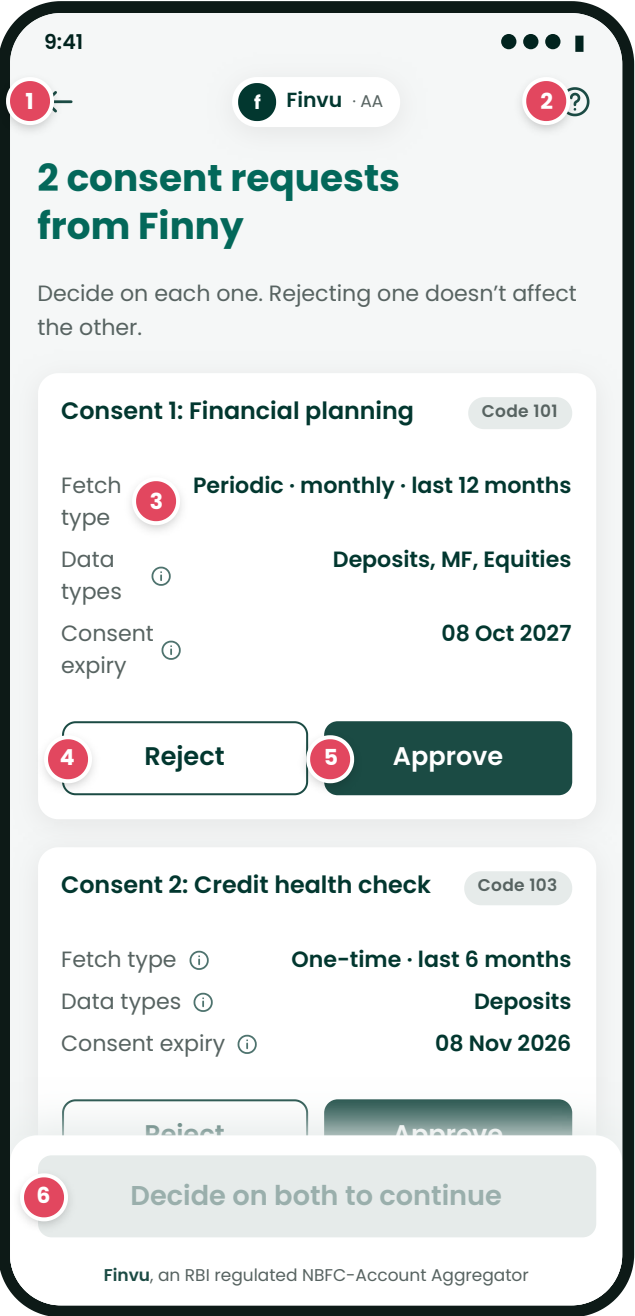

- Tap any ⓘ on the consent screen to get the meaning and an example in plain language.
- Opens as a sheet so the person never loses their place.

EDGE CASES & STATES TO VERIFY

- Every field in the consent artefact must have a meaning entry; missing entries are a content bug.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

7c. Two consents, decided separately

New §3.1.iv §3.2.iii §3.2.vi

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **What is Fetch type?** Opens meaning of this field (every ⓘ)
- 4 **Reject** Records this consent's decision
- 5 **Approve** Records this consent's decision
- 6 **Decide on both to continue** → 7d. Confirm consent

WHAT CHANGED & WHY

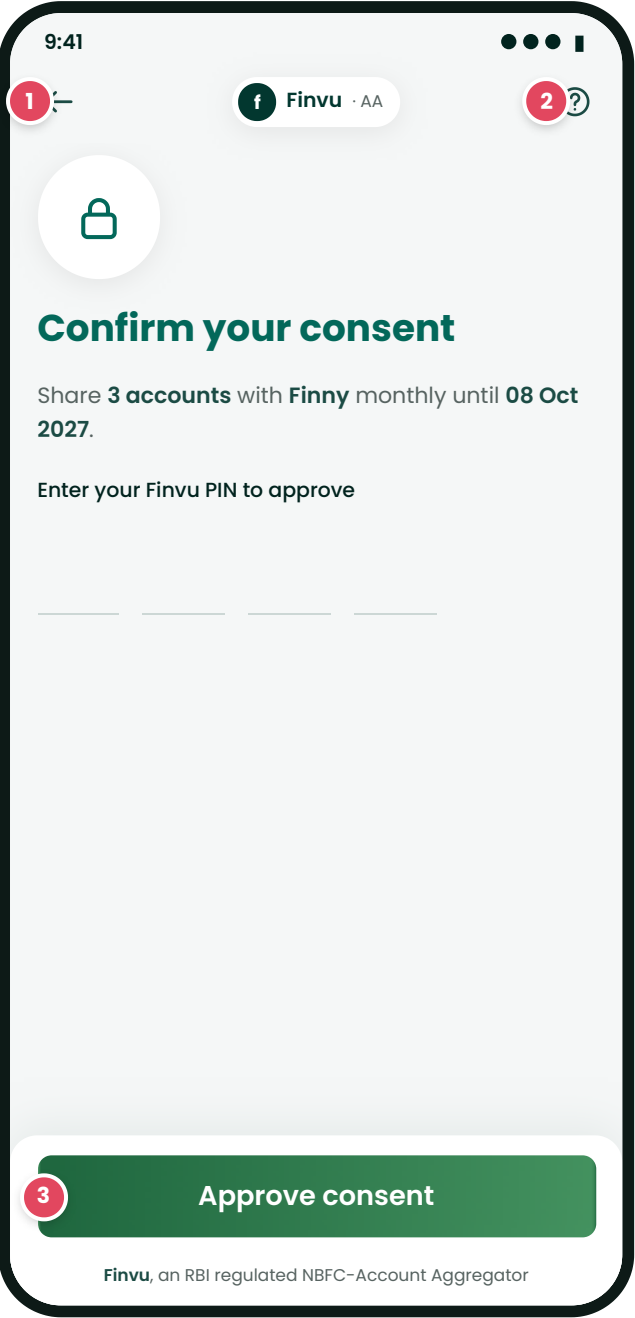

- When an app asks for two purposes, each consent is its own card with its own Approve / Reject.
- The final button stays disabled until each consent has a decision.

EDGE CASES & STATES TO VERIFY

- One approved and one rejected: only the approved consent is created.
- The CTA stays disabled until every consent has a decision.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

7d. Confirm consent

New §3.2.iii §5.1.i §5.1.ii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Approve consent → 10. Connecting accounts

WHAT CHANGED & WHY

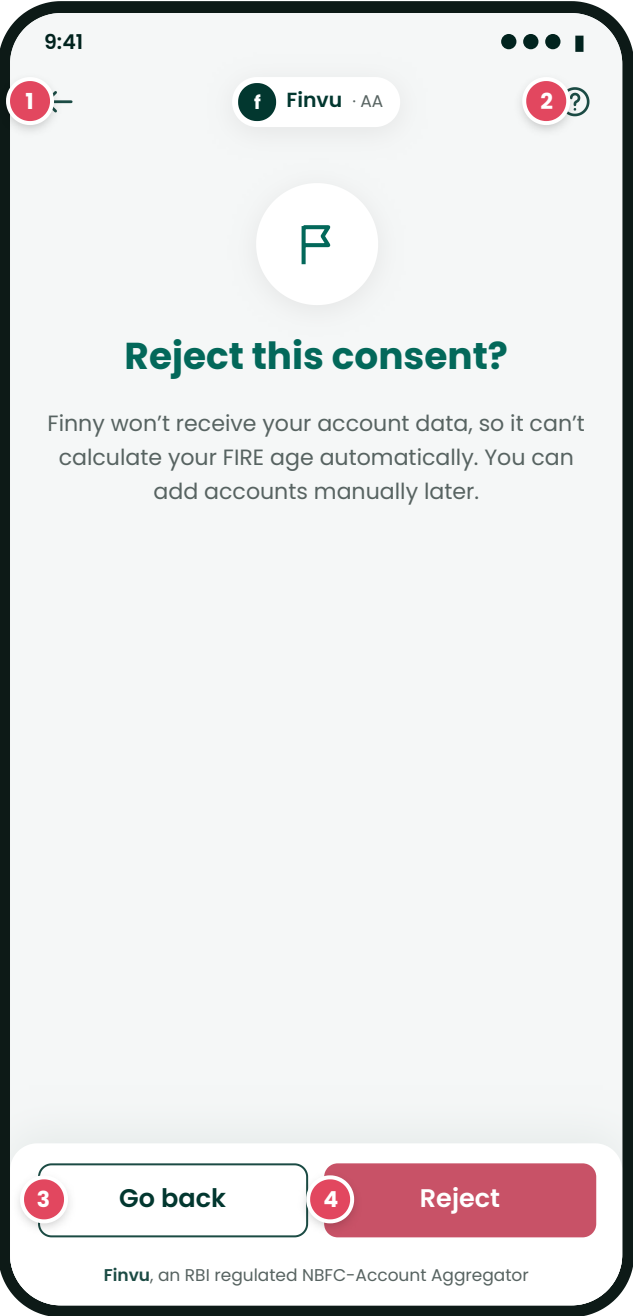

- Approval is its own deliberate step, confirmed with the user's Finvu PIN, not bundled with linking.
- Restates what is being approved in one line.

EDGE CASES & STATES TO VERIFY

- Wrong PIN: attempts left; after the limit, the consent request stays pending (not rejected).

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

9. Reject confirmation

Improved §3.2.ii §4.1.viii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Go back** → Previous screen
- 4 **Reject** → 9b. Consent rejected

WHAT CHANGED & WHY

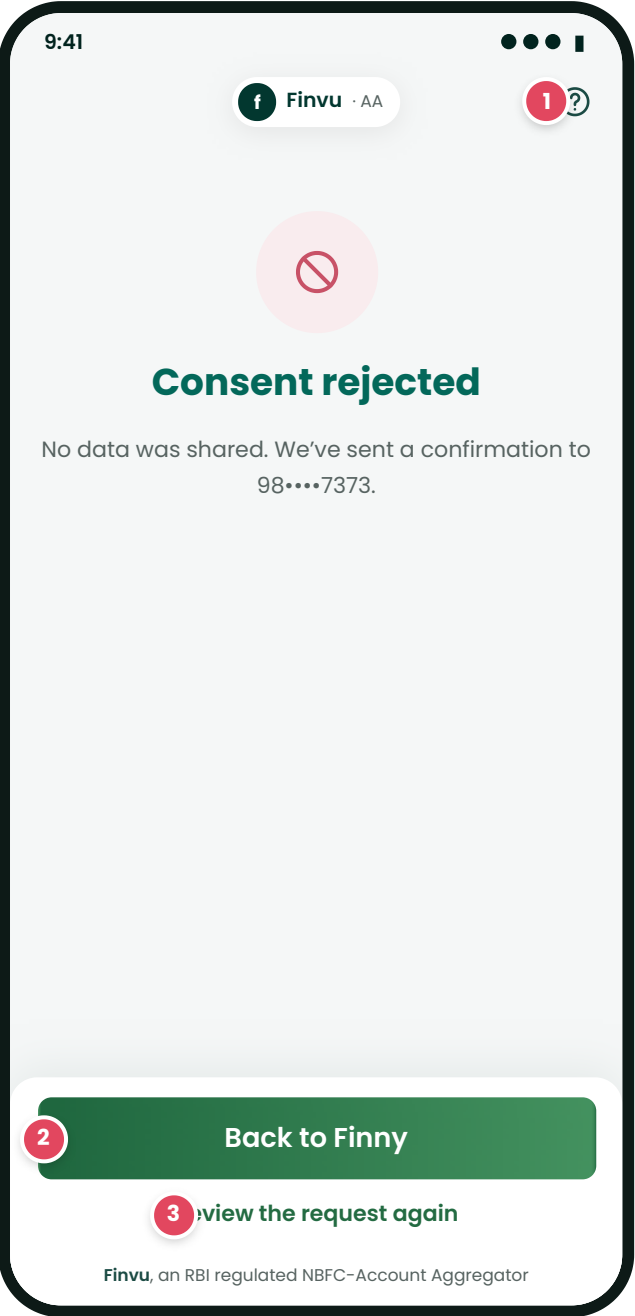

- Honest consequence in one sentence, no guilt-tripping.
- Both actions equal weight; “Go back” returns to the request unchanged.

EDGE CASES & STATES TO VERIFY

- Go back returns to the consent unchanged.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

9b. Consent rejected

New §4.3.i §4.3.iii

INTERACTIONS

- 1 Help and complaints → Help & complaints
- 2 Back to Finny → Hand-off to Account Aggregator
- 3 Review the request again → 7. Consent (summary)

WHAT CHANGED & WHY

- Confirms the outcome and the SMS/email the user will get.
- Offers the manual path back in Finny.

EDGE CASES & STATES TO VERIFY

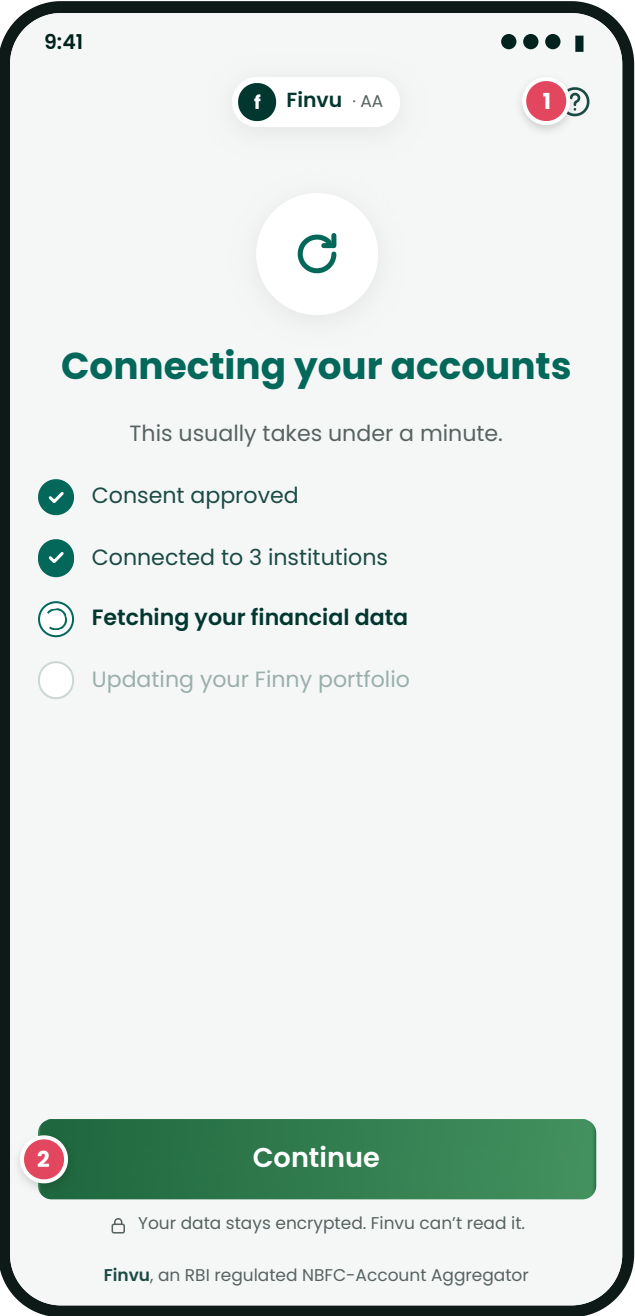

- A rejection SMS and email are sent (§4.3.iii); Finny is told the consent was rejected.

REVIEW

☐ Design OK

☐ Copy OK

☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

10. Connecting accounts

Improved §4.1.viii

INTERACTIONS

- 1 Help and complaints → Help & complaints
- 2 Continue → 11. Success

WHAT CHANGED & WHY

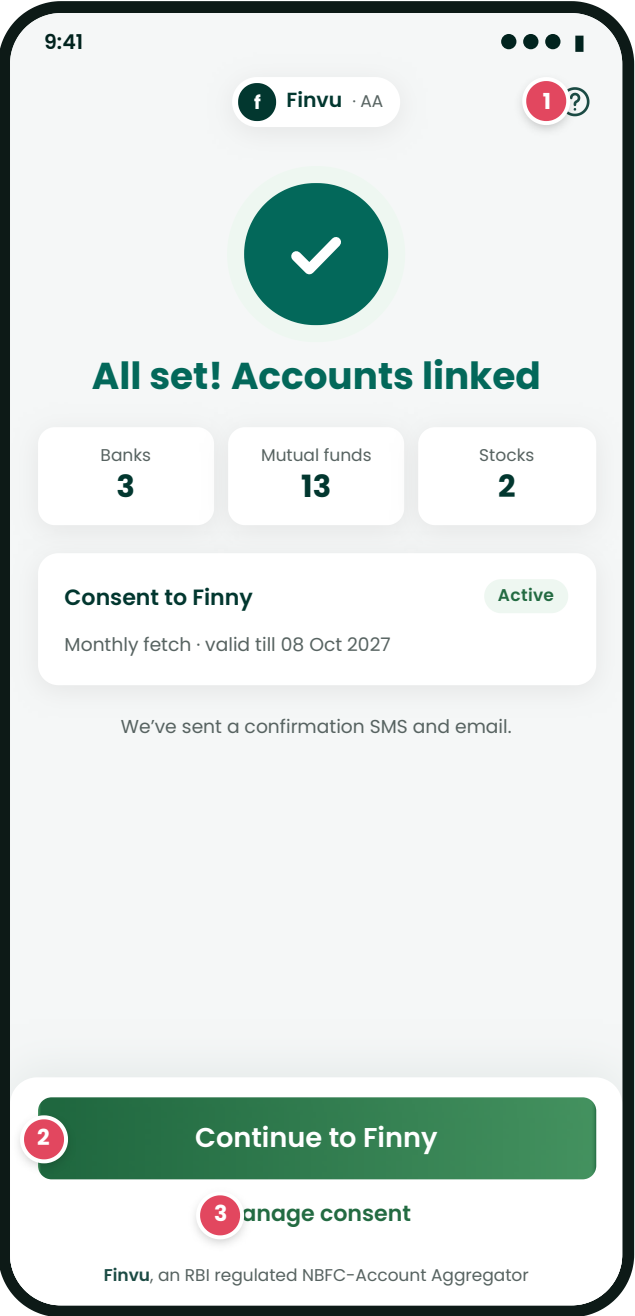

- Four honest steps with live status; the current one animates.
- Reassurance line at the bottom, not a spinner alone.

EDGE CASES & STATES TO VERIFY

- One FIP times out: continue and show Partial failure.
- All FIPs fail: show Bank unavailable.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

11. Success

Improved §4.3.i §4.3.ii §3.2.x

INTERACTIONS

- 1 **Help and complaints** → Help & complaints
- 2 **Continue to Finny** → Hand-off to Account Aggregator
- 3 **Manage consent** → 17. Your consents (dashboard)

WHAT CHANGED & WHY

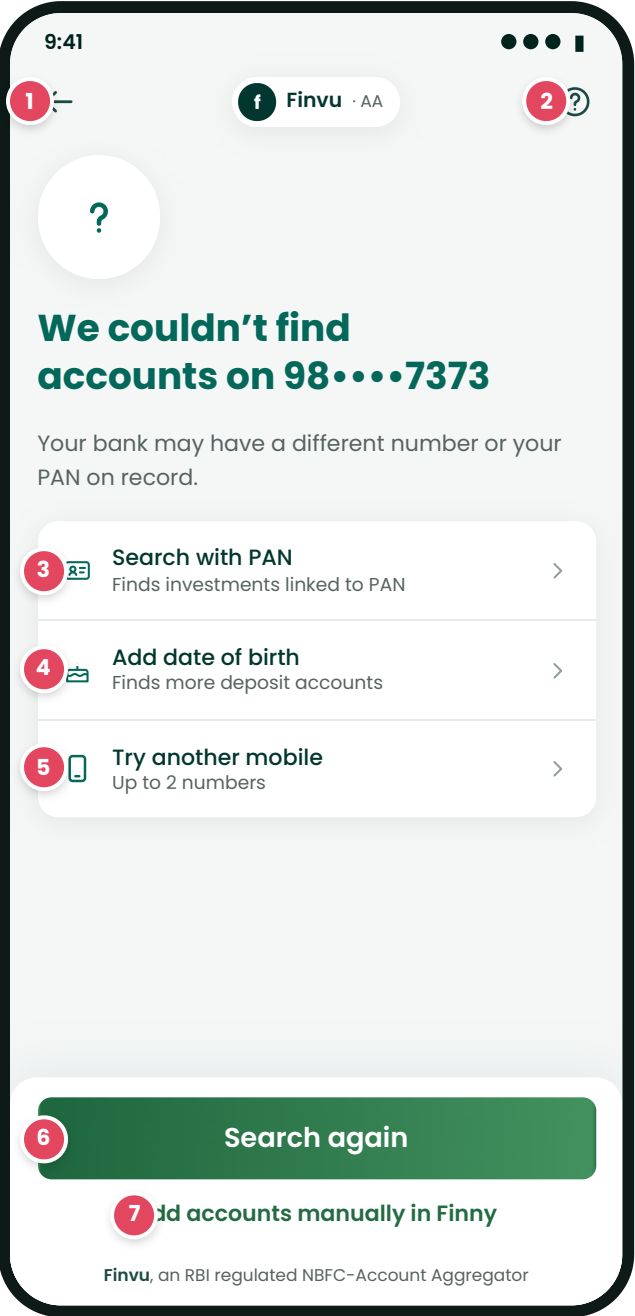

- Summary of what was linked and what consent is active, with a direct path to manage it.
- Mentions the notification sent, so the SMS isn't a surprise.

EDGE CASES & STATES TO VERIFY

- Counts reflect accounts actually fetched, not selected.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

12. No accounts found

Improved Edge case §2.1.ii §4.1.viii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Search with PAN**Finds investments linked to PAN → 4. Add identifiers (optional)
- 4 **Add date of birth**Finds more deposit accounts → 4. Add identifiers (optional)
- 5 **Try another mobile**Up to 2 numbers → 4b. Add a second mobile
- 6 **Search again** → 5. Discovering accounts
- 7 **Add accounts manually in Finny** → Hand-off to Account Aggregator

WHAT CHANGED & WHY

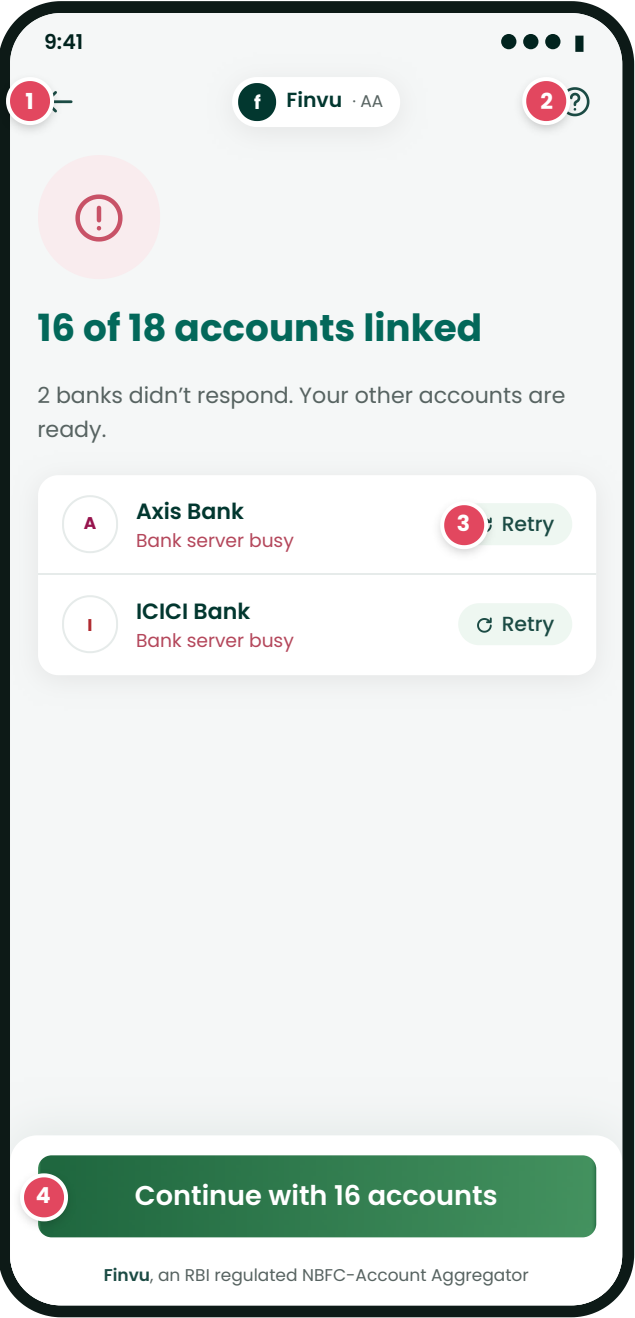

- Explains why (number mismatch) and offers the identifiers that actually help.
- Lets the user retry with a different number or continue without accounts.

EDGE CASES & STATES TO VERIFY

- After 2 empty searches suggest manual entry in Finny.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

13. Partial failure

Improved Edge case §4.1.viii §1.1.5

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Retry** → 10. Connecting accounts
- 4 **Continue with 16 accounts** → 11. Success

WHAT CHANGED & WHY

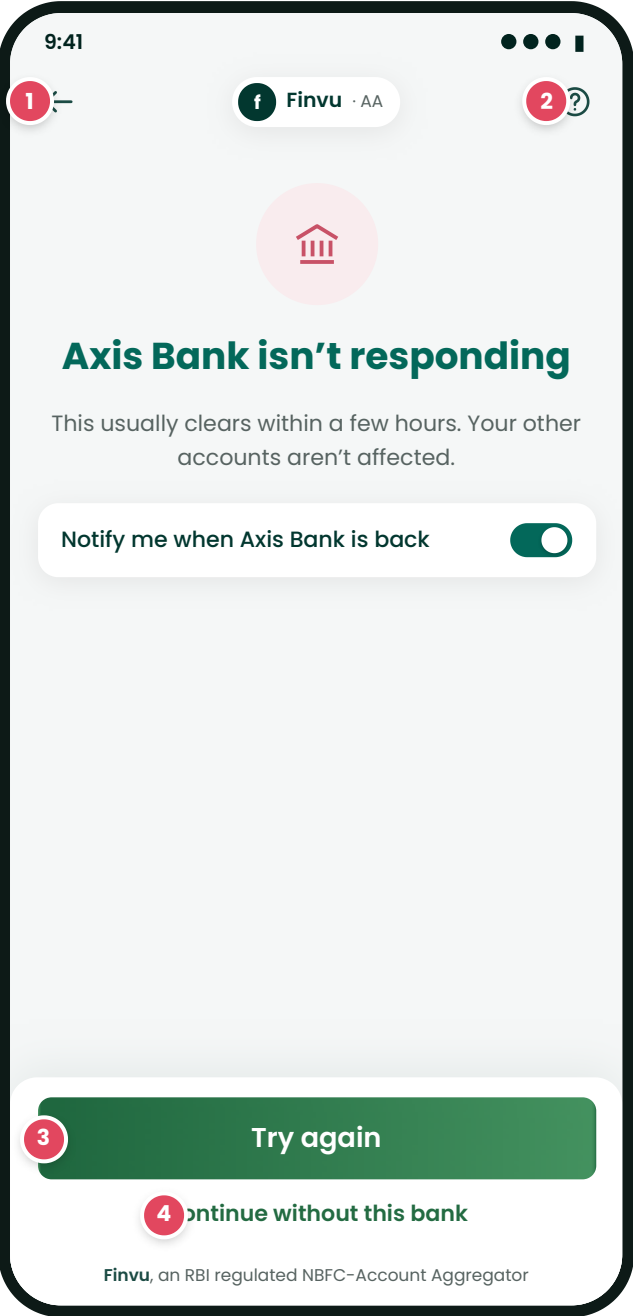

- Leads with what worked (16 linked), then lists the 2 that didn't with a per-row retry.
- Plain error reason, never a raw error code.

EDGE CASES & STATES TO VERIFY

- Retry is per bank; a repeated failure shows Bank unavailable.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

14. Bank unavailable

Improved Edge case §4.1.viii §4.3.i

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Try again → 10. Connecting accounts
- 4 Continue without this bank → 11. Success

WHAT CHANGED & WHY

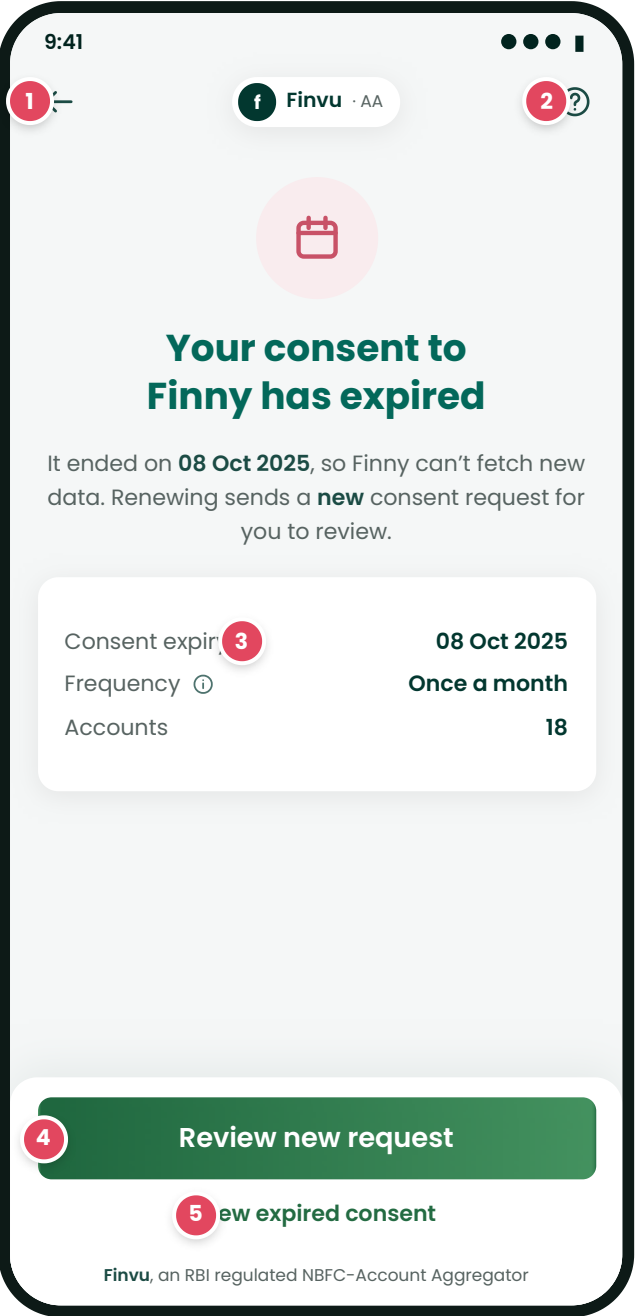

- Offers to notify when the bank is back instead of only “try later”.
- Continue without this bank stays available.

EDGE CASES & STATES TO VERIFY

- Notify toggle on by default; the notification fires once when the FIP is back.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

15. Consent expired

Improved Edge case §3.2.vii §3.3.ii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 What is Consent expiry? Opens meaning of this field (every ⓘ)
- 4 Review new request → 7. Consent (summary)
- 5 View expired consent → 17b. Consent details & controls

WHAT CHANGED & WHY

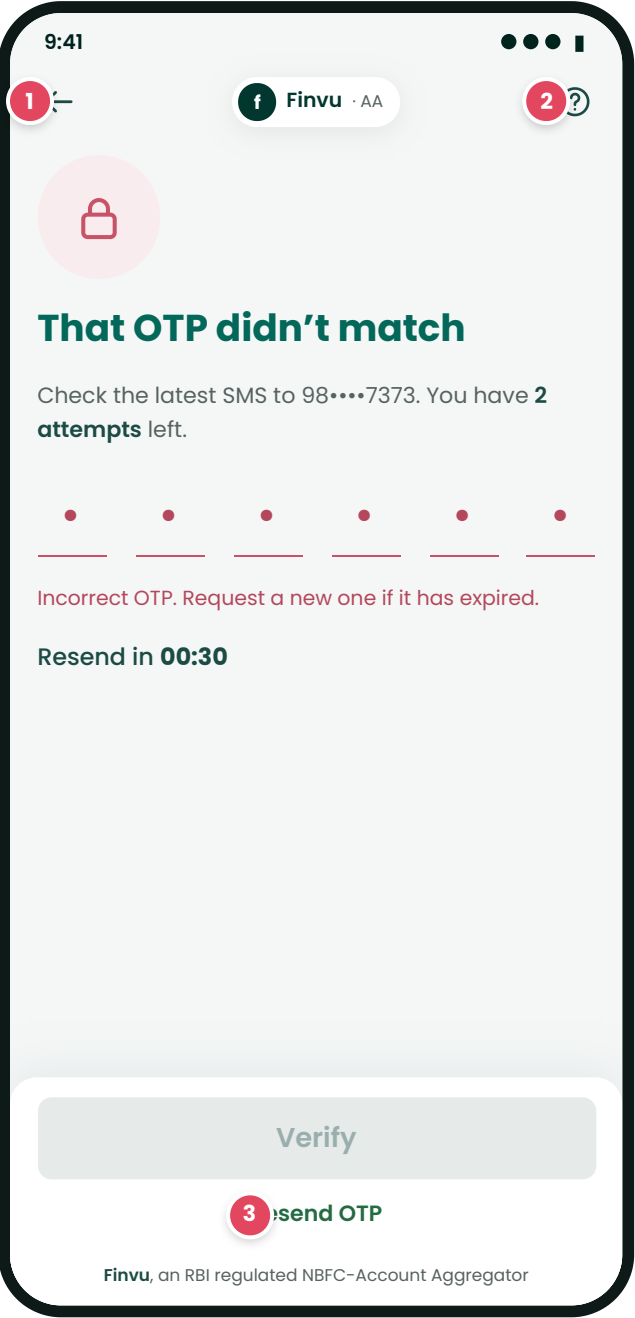

- Explains that a renewal is a new consent request (artefacts are immutable) and shows what will change.
- Old consent details reachable from here.

EDGE CASES & STATES TO VERIFY

- Renewal raises a new consent request; the expired artefact is never edited (§3.3.ii).

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

16. OTP failed

Improved Edge case §4.1.viii §5.1.ii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Resend OTP → 2. Verify mobile (SIM binding)

WHAT CHANGED & WHY

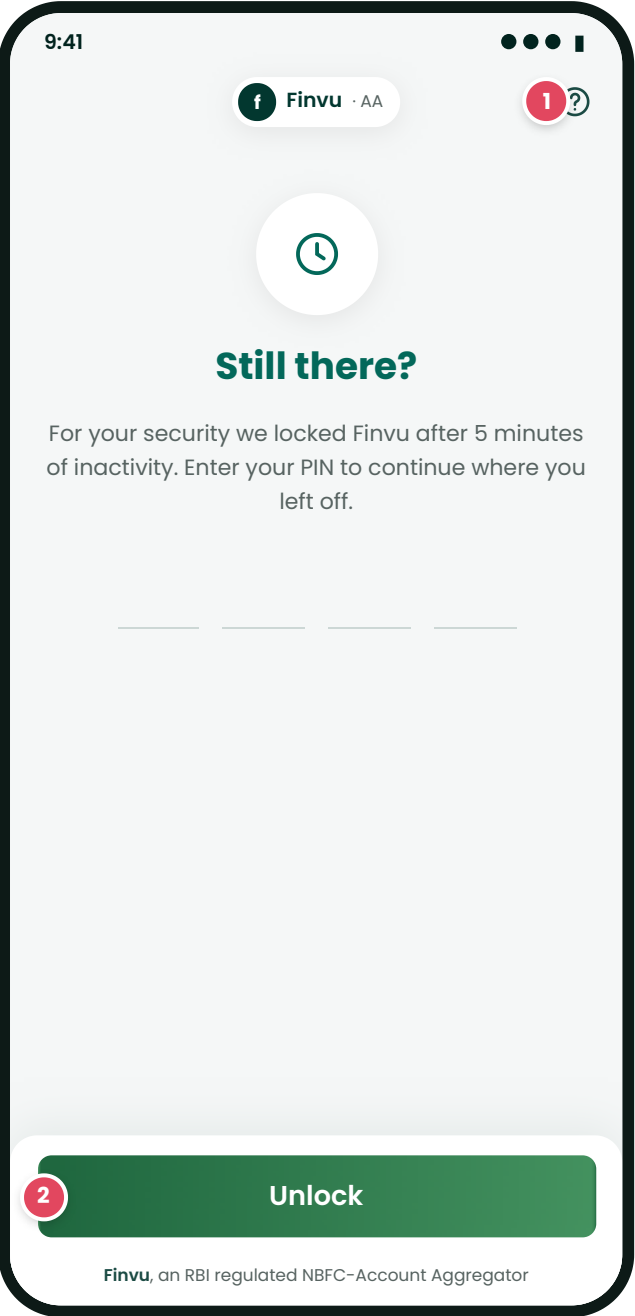

- Shows attempts left and a cool-down instead of a blank error.
- Masked cells highlight red; error text says what to do next.

EDGE CASES & STATES TO VERIFY

- After the final attempt: lock with a countdown and offer Resend only after the cool-down.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

Session timed out

- New
- Edge case
- \$1.2.1.v
- \$5.1.i

INTERACTIONS

- 1 Help and complaints → Help & complaints
- 2 Unlock → 17. Your consents (dashboard)

WHAT CHANGED & WHY

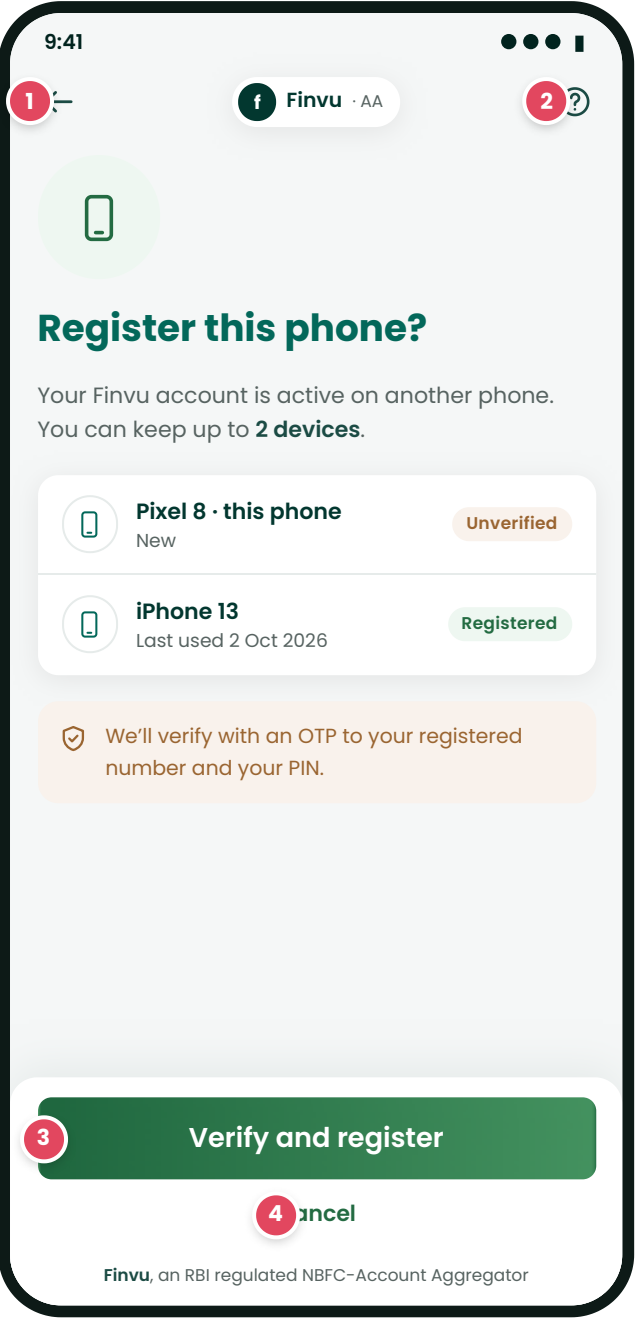

- After inactivity the AA client asks for the PIN again.
- Nothing in progress is lost.

EDGE CASES & STATES TO VERIFY

- Timeout configurable (default 5 min); in-progress step resumes after unlock.

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK

NEW SCREEN

New device detected

- New
- Edge case
- \$1.6.1.ii
- \$1.6.3.v
- \$1.6.3.vii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Verify and register → 2. Verify mobile (SIM binding)
- 4 Cancel → Previous screen

WHAT CHANGED & WHY

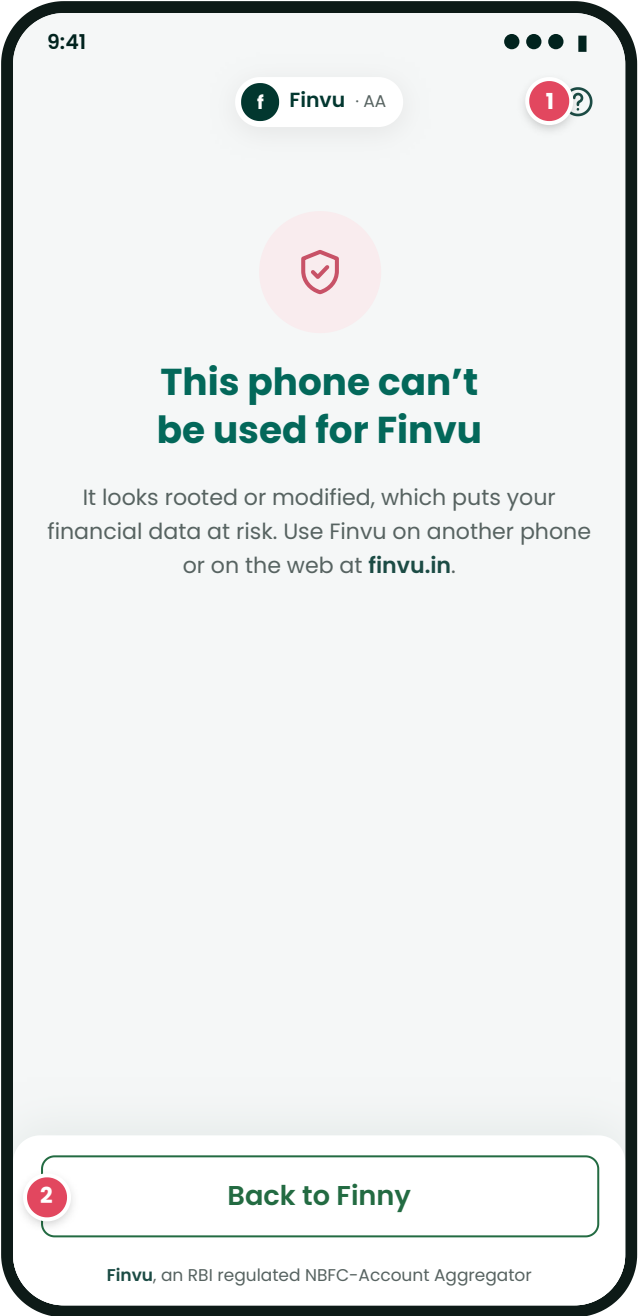

- Signing in on an unregistered phone triggers an extra check and shows the device limit.
- User sees which device will be replaced.

EDGE CASES & STATES TO VERIFY

- Device limit reached: the user must remove a device before adding this one.

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK
-

-

NEW SCREEN

Device not secure

- New
- Edge case
- \$1.2.1.ii
- \$1.4.3.iii

INTERACTIONS

- 1 Help and complaints → Help & complaints
- 2 Back to Finny → Hand-off to Account Aggregator

WHAT CHANGED & WHY

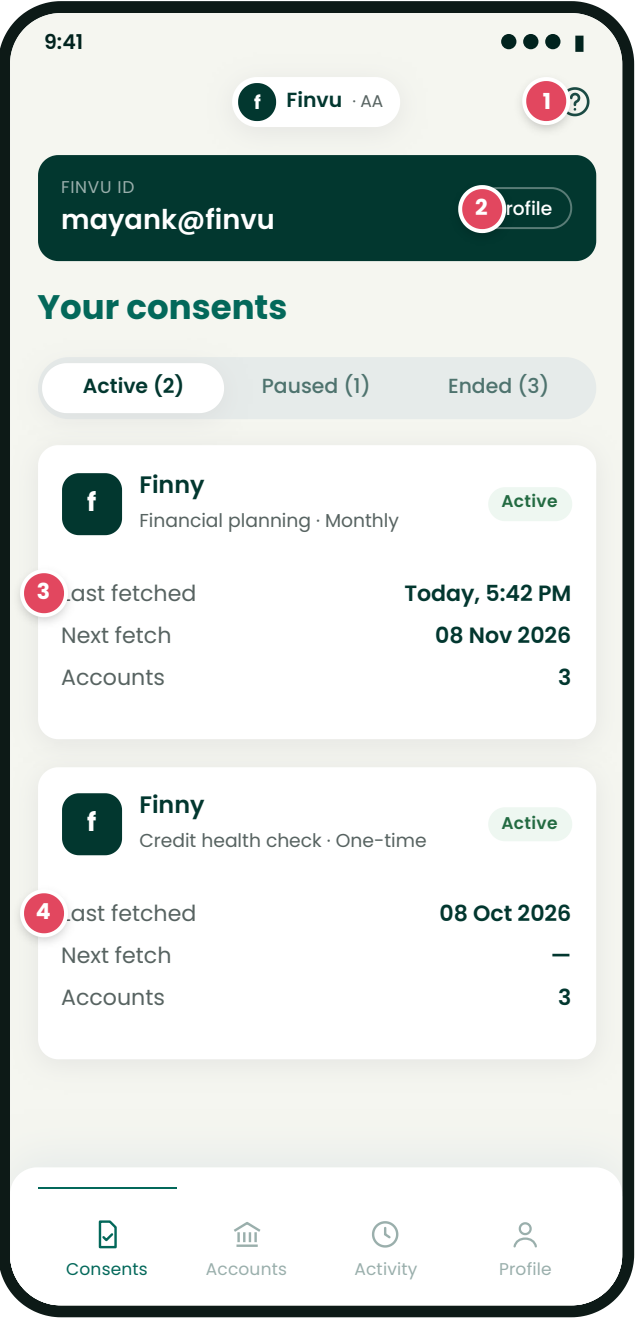

- Rooted or jailbroken phones are blocked, with a plain explanation and a safe alternative.

EDGE CASES & STATES TO VERIFY

- Root or jailbreak detection runs at install and at runtime; there is no bypass.

REVIEW

- ☐ Design OK
- ☐ Copy OK
- ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

17. Your consents (dashboard)

Improved §3.2.x §3.2.ii §4.2.vi

INTERACTIONS

- 1 **Help and complaints** → Help & complaints
- 2 **Profile** → Profile & VUA
- 3 **fFinnyFinancial planning · MonthlyActive Last fe** → 17b. Consent details & controls
- 4 **fFinnyCredit health check · One-timeActive Last** → 17b. Consent details & controls

WHAT CHANGED & WHY

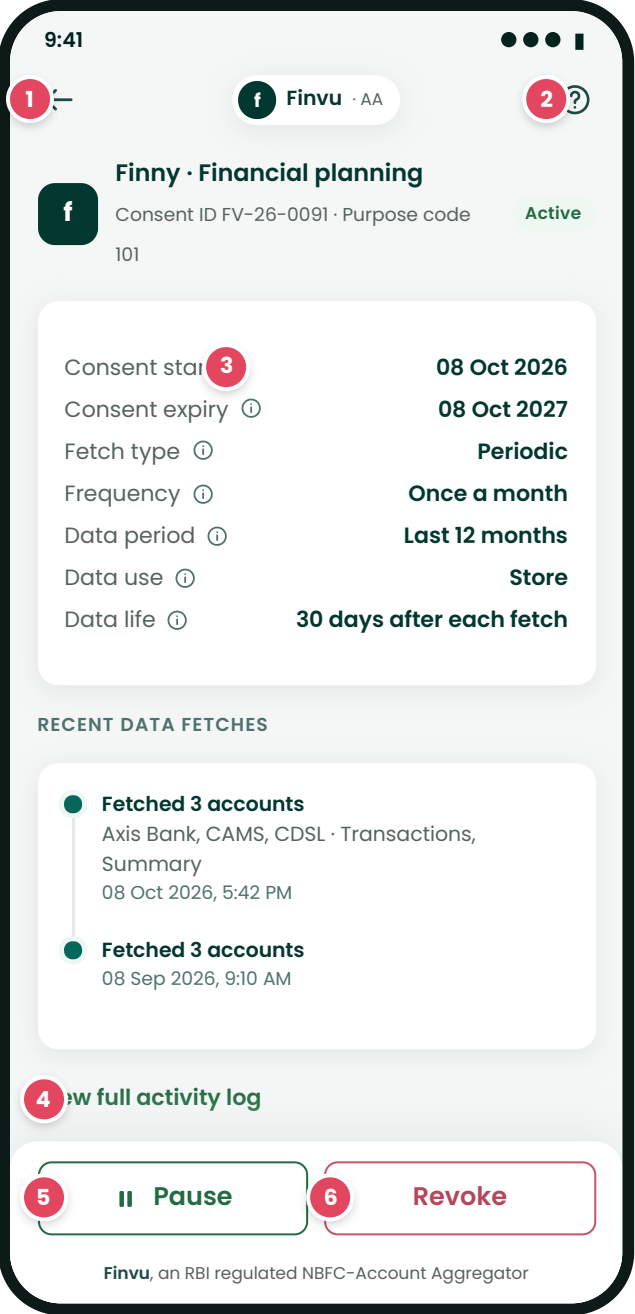

- Tabs by state: Active, Paused, Ended (expired / revoked / rejected).
- Each card shows purpose, last fetch and next fetch, the snapshot the standard asks for.
- VUA shown at the top of the dashboard.

EDGE CASES & STATES TO VERIFY

- Empty state: no consents, with explanation and link back to Finny.
- Ended tab groups expired, revoked and rejected consents with their end reason.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

17b. Consent details & controls

New §3.2.ii §3.2.x §3.3.i

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **What is Consent start?** Opens meaning of this field (every ⓘ)
- 4 **View full activity log** → 18. Consent activity (audit trail)
- 5 **Pause** → 17c. Pause consent
- 6 **Revoke** → 17e. Revoke consent

WHAT CHANGED & WHY

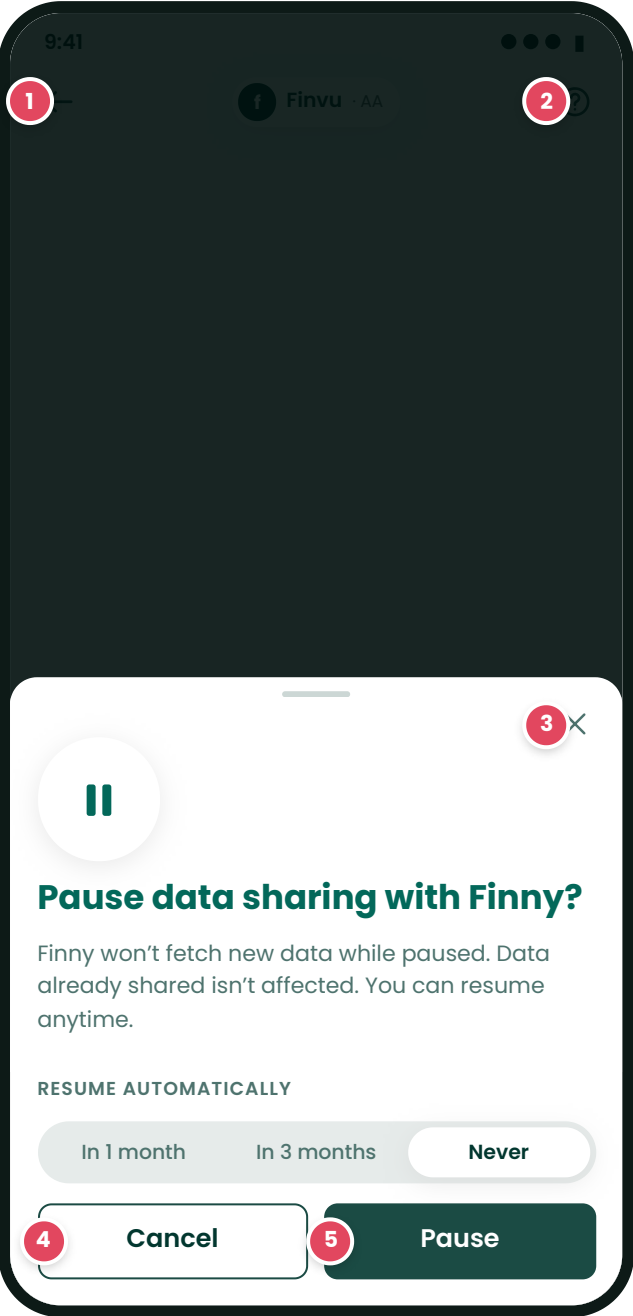

- Pause, Resume and Revoke are all here, each with a confirmation step.
- Data-fetch history for this consent (what was fetched, when, from whom).
- Link to the immutable audit trail.

EDGE CASES & STATES TO VERIFY

- Paused consent shows Resume in place of Pause.
- Expired consent shows no controls, only Renew.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

17c. Pause consent

New §3.2.ii §4.3.iii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Close** → Previous screen
- 4 **Cancel** → Previous screen
- 5 **Pause** → 17d. Paused state

WHAT CHANGED & WHY

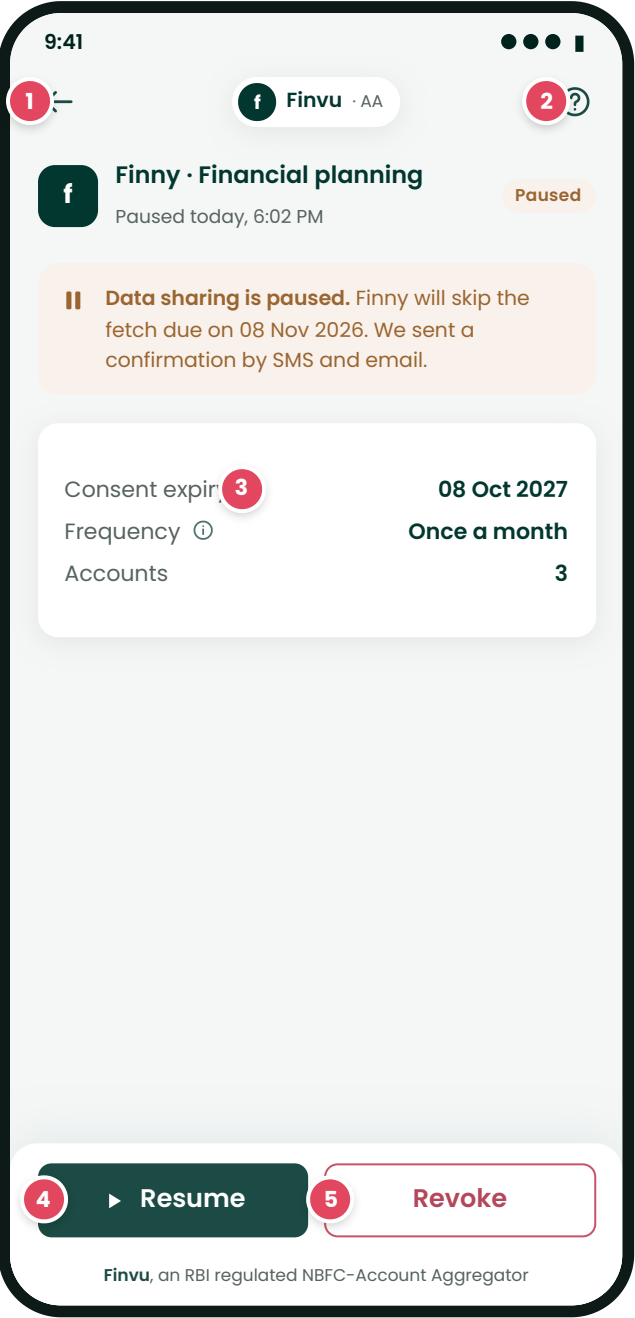

- Pause is reversible and says so; user can choose an auto-resume date.
- Revoke is offered as the permanent alternative.

EDGE CASES & STATES TO VERIFY

- Auto-resume date is optional; default Never.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

17d. Paused state

New §3.2.ii §4.3.iii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 What is Consent expiry? Opens meaning of this field (every ⓘ)
- 4 Resume → 17b. Consent details & controls
- 5 Revoke → 17e. Revoke consent

WHAT CHANGED & WHY

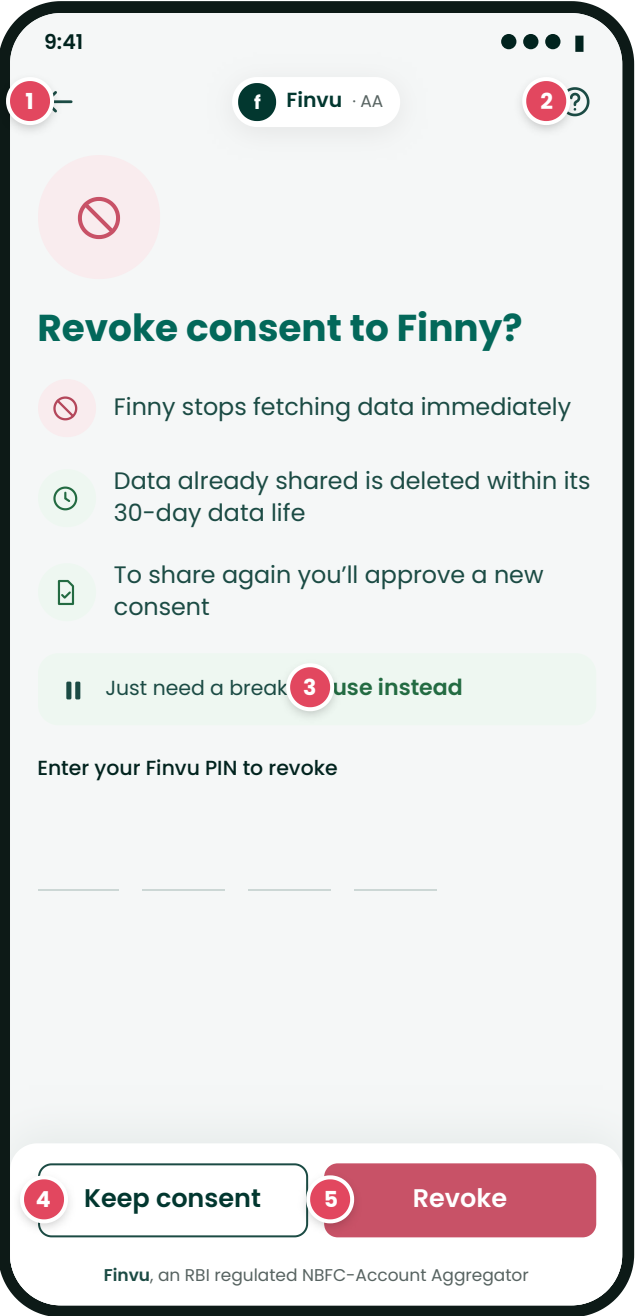

- Clear paused status with a single prominent Resume.
- Confirmation SMS/email mentioned.

EDGE CASES & STATES TO VERIFY

- Scheduled fetch dates during the pause are skipped, not queued.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

17e. Revoke consent

New §3.2.ii §3.3.ii §4.3.iii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Pause instead → 17c. Pause consent
- 4 Keep consent → Previous screen
- 5 Revoke → 17. Your consents (dashboard)

WHAT CHANGED & WHY

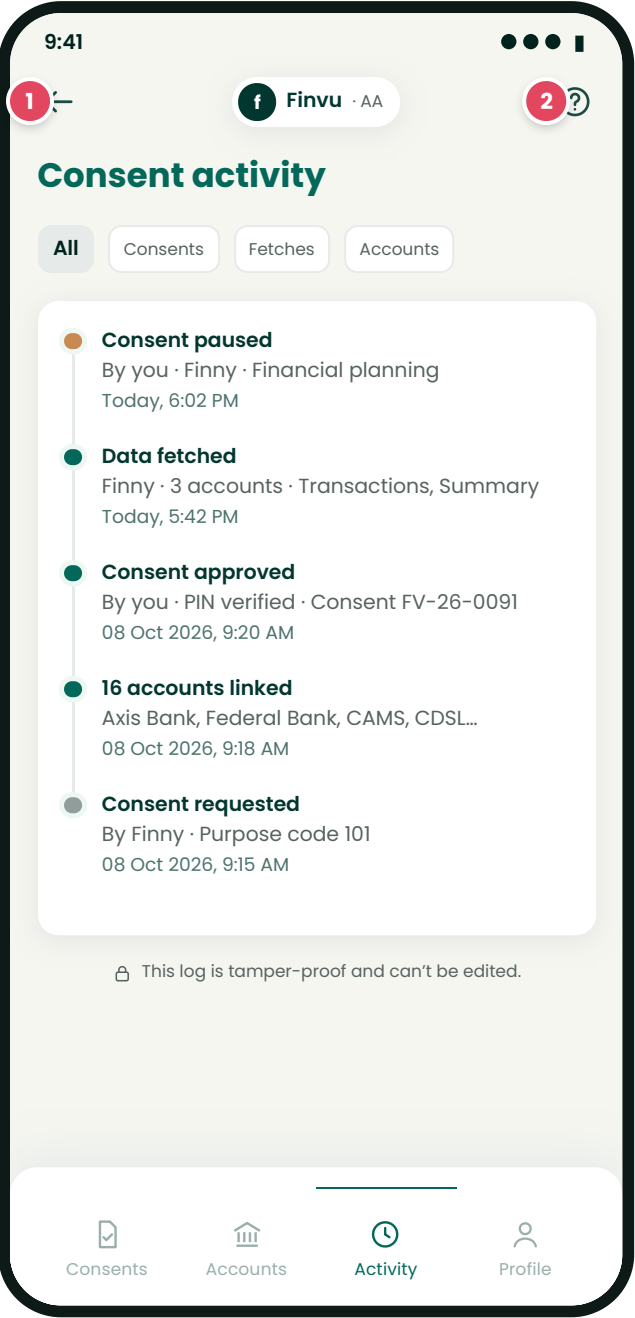

- Permanent action: explains consequences, offers Pause instead, confirms with PIN.
- States what happens to data already shared (data life).

EDGE CASES & STATES TO VERIFY

- Wrong PIN: attempts left; revoke is not applied until verified.
- Revoke is immediate and logged in the audit trail.

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

18. Consent activity (audit trail)

Improved §3.3.i §3.3.ii §4.3.i

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints

WHAT CHANGED & WHY

- Tamper-proof log of every request, approval, pause, resume, revoke, link and fetch, with timestamps and actor.
- Filter by type; entries can't be edited or deleted (stated on screen).

EDGE CASES & STATES TO VERIFY

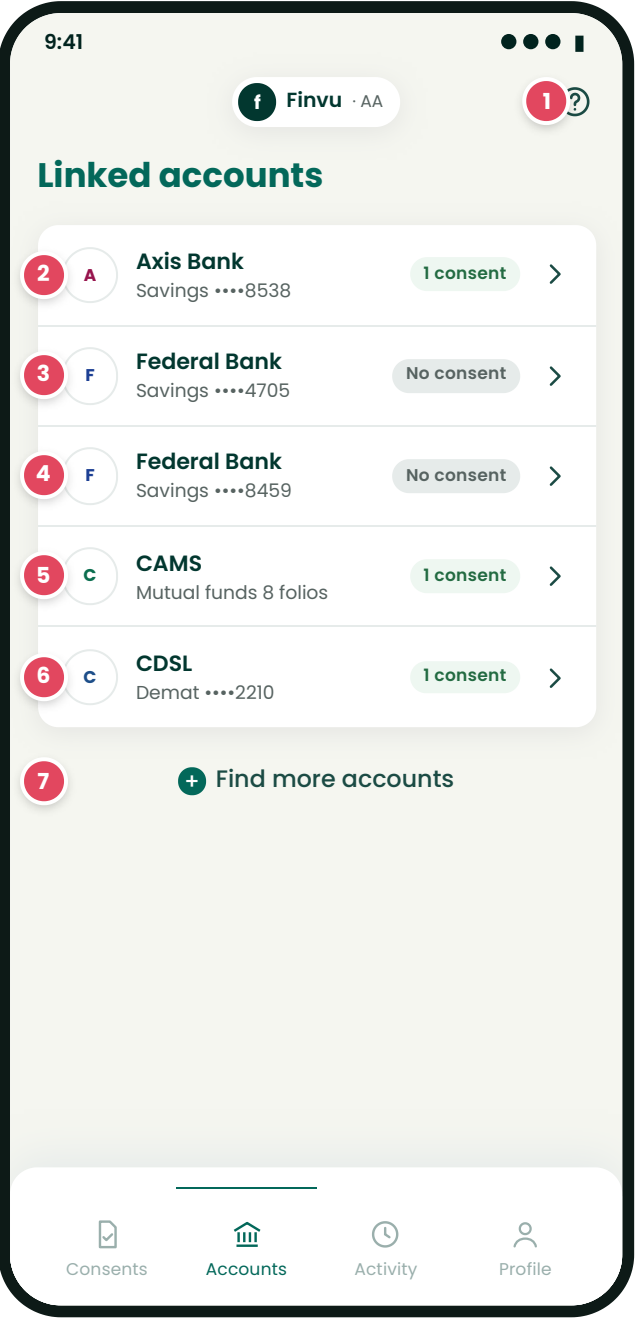

- Entries are append-only; filters never hide the fact an entry exists.

NEW SCREEN

Linked accounts

New \$2.1 \$3.2.x

INTERACTIONS

- 1 **Help and complaints** → Help & complaints
- 2 **AAxis BankSavings ****85381 consent** → 19. Delink account (blocked)
- 3 **FFederal BankSavings ****4705No consent** → 19. Delink account (blocked)
- 4 **FFederal BankSavings ****8459No consent** → 19. Delink account (blocked)
- 5 **CCAMSMutual funds 8 folios1 consent** → 19. Delink account (blocked)
- 6 **CCDSLDemat ****22101 consent** → 19. Delink account (blocked)
- 7 **Find more accounts** → 4. Add identifiers (optional)

WHAT CHANGED & WHY

- Every linked account with how many consents use it, so delinking consequences are visible upfront.

EDGE CASES & STATES TO VERIFY

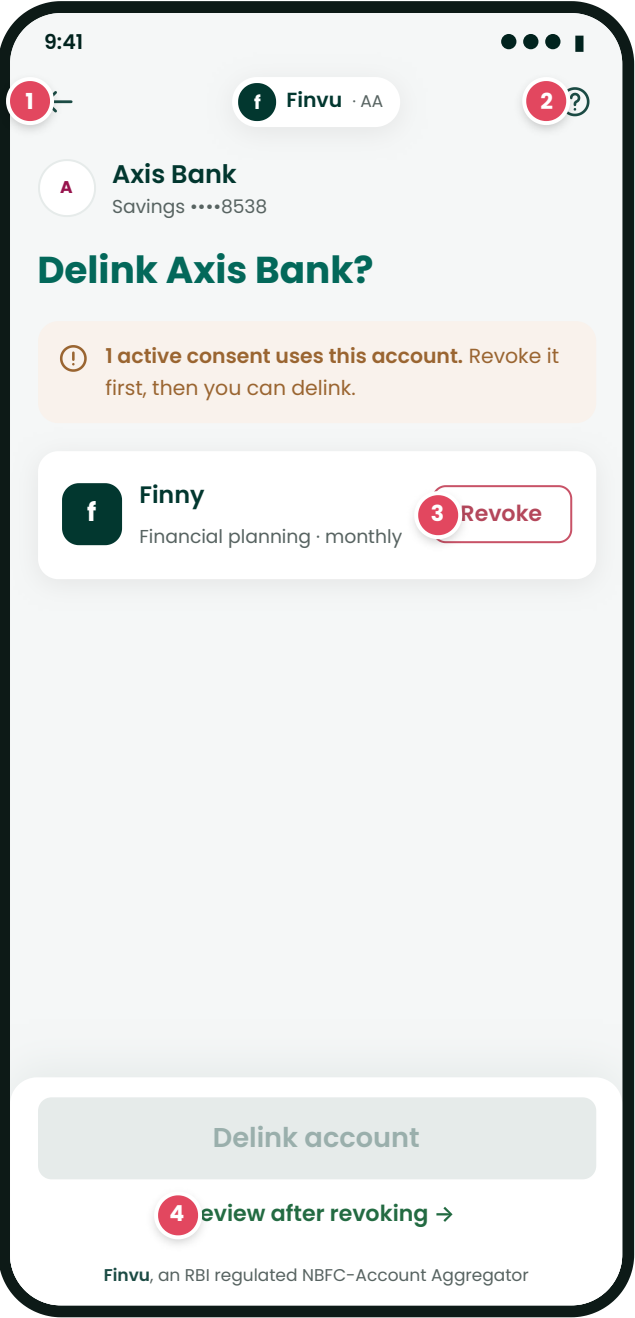

- Account with active consents shows count; tapping opens Delink.

REVIEW

☐ Design OK

☐ Copy OK

☐ Compliance OK

IMPROVED FROM CURRENT DESIGN

19. Delink account (blocked)

Improved §2.1 §4.1.viii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Revoke → 17e. Revoke consent
- 4 Preview after revoking → 19b. Delink: verify

WHAT CHANGED & WHY

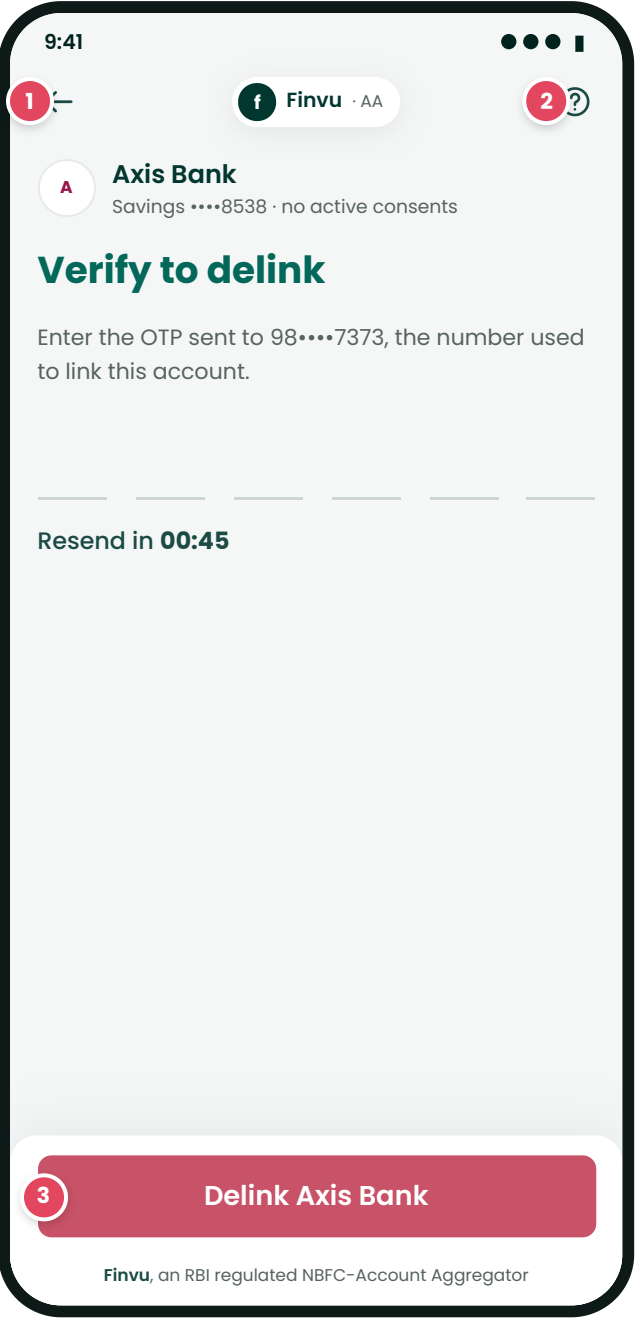

- Standard: all active consents on the account must be revoked before delinking. The screen lists them with a revoke action, instead of letting the user fail later.
- Delink button stays disabled until the list is empty.

EDGE CASES & STATES TO VERIFY

- Delink stays disabled while any active consent uses the account (§2.1).

REVIEW

☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

19b. Delink: verify

New \$2.1

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Delink Axis Bank → 19c. Delinked

WHAT CHANGED & WHY

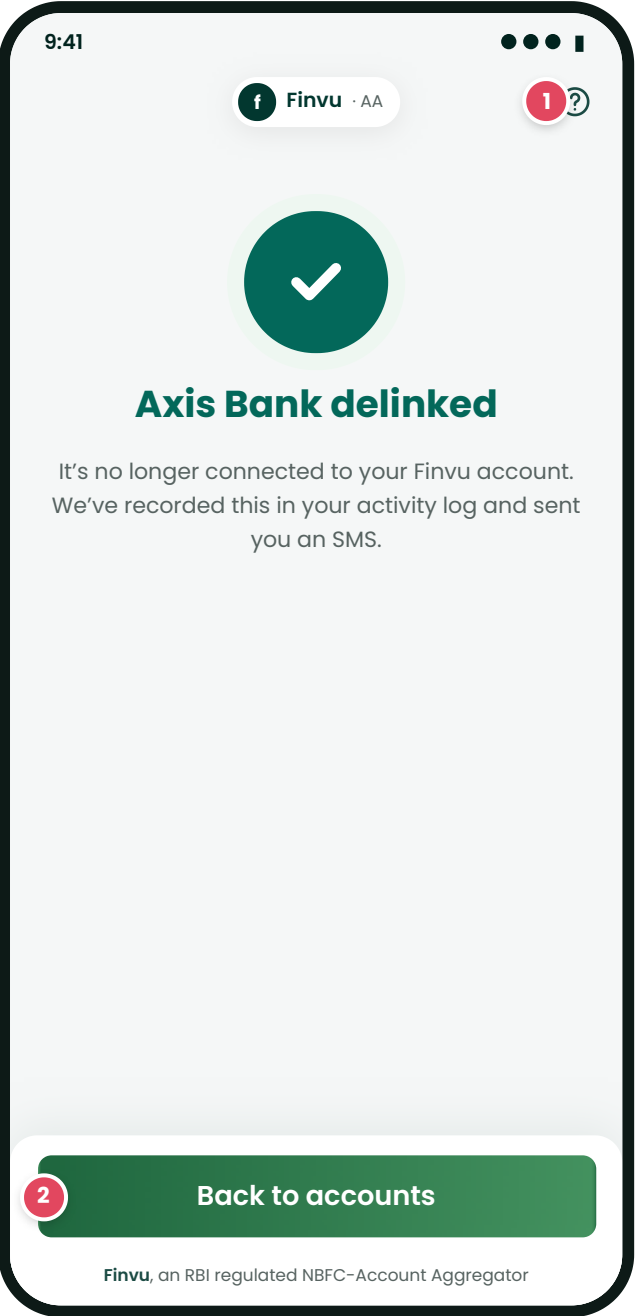

- Once no consents remain, delinking needs authentication with the same verified identifier used to link (mobile OTP).

EDGE CASES & STATES TO VERIFY

- OTP goes to the identifier used for linking; a different number is not accepted.

REVIEW

- ☐ Design OK ☐ Copy OK ☐ Compliance OK

NEW SCREEN

19c. Delinked

New §4.3.i

INTERACTIONS

- 1 **Help and complaints** → Help & complaints
- 2 **Back to accounts** → Linked accounts

WHAT CHANGED & WHY

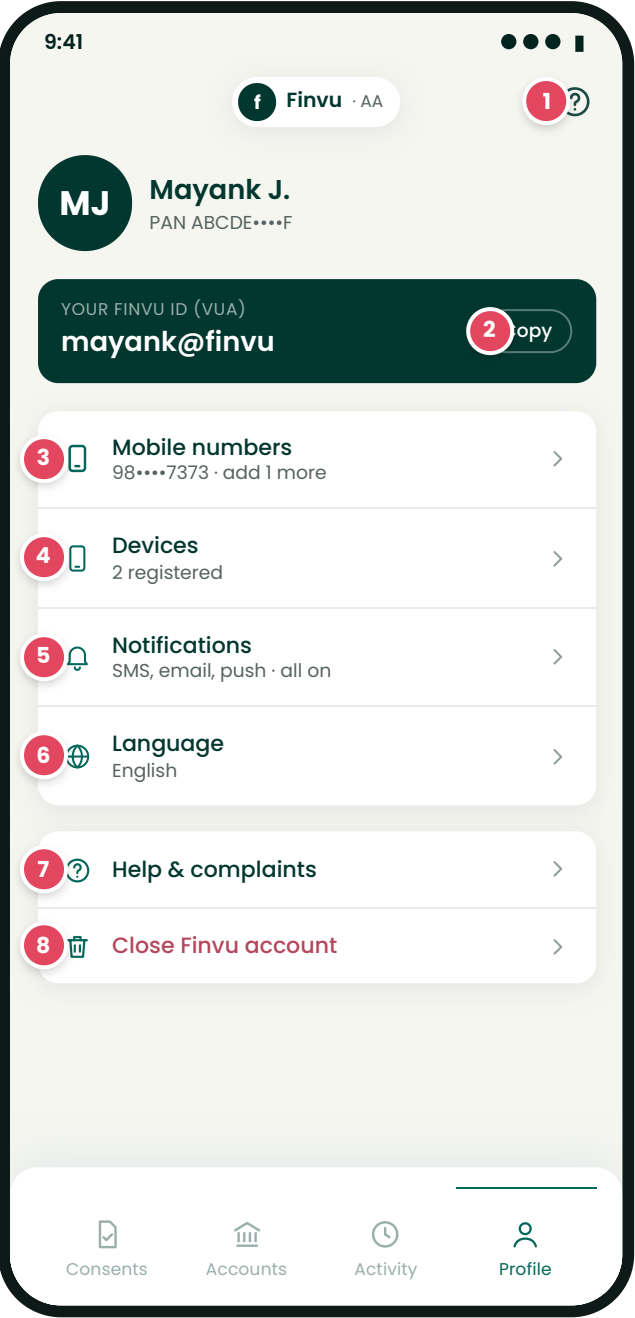

- Confirms and logs the action; notification sent.

EDGE CASES & STATES TO VERIFY

- SMS sent and activity logged.

REVIEW

NEW SCREEN

Language

New §4.1.vi

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Save → Profile & VUA

WHAT CHANGED & WHY

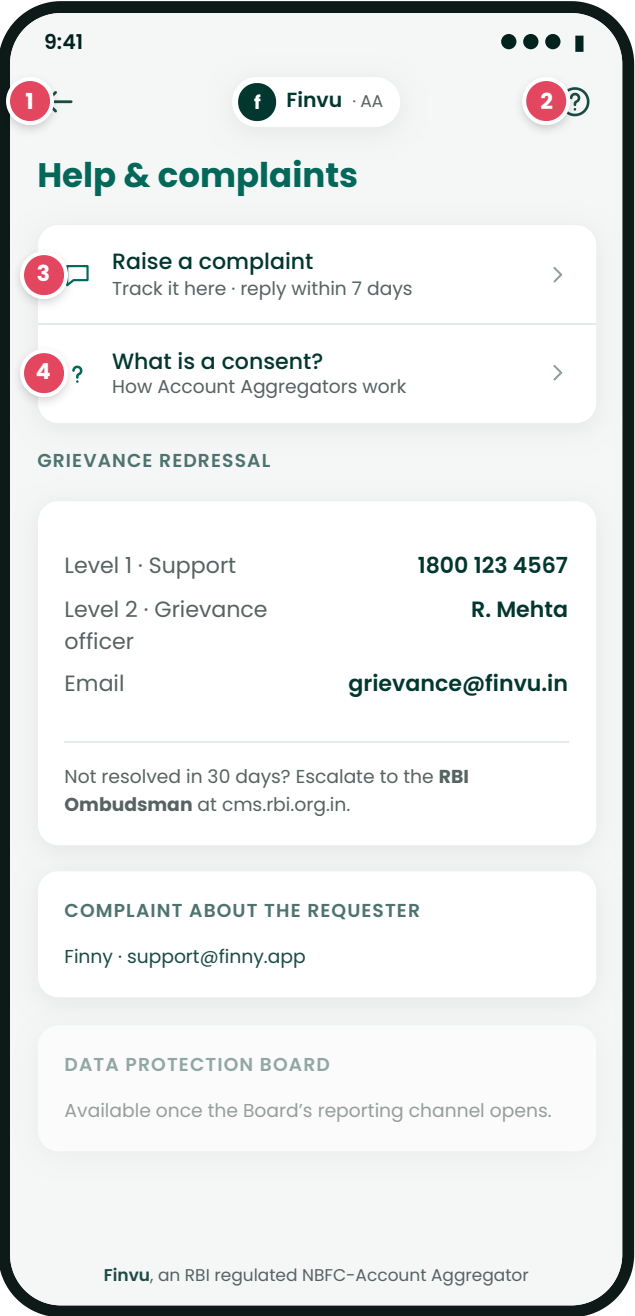

- Regional language options, each written in its own script.

EDGE CASES & STATES TO VERIFY

- Untranslated strings fall back to English, never to a key.

REVIEW

NEW SCREEN

Help & complaints

- New
- §4.2.vii
- §4.2.viii
- §3.1 (complaints)

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints
- 3 Raise a complaintTrack it here · reply within 7 → Raise a complaint
- 4 What is a consent?How Account Aggregators work → 7b. What does this field mean?

WHAT CHANGED & WHY

- Grievance redressal matrix and officer details shown prominently, contact info as selectable text.
- Raise and track a complaint in-app; Data Protection Board slot reserved for when it opens.

EDGE CASES & STATES TO VERIFY

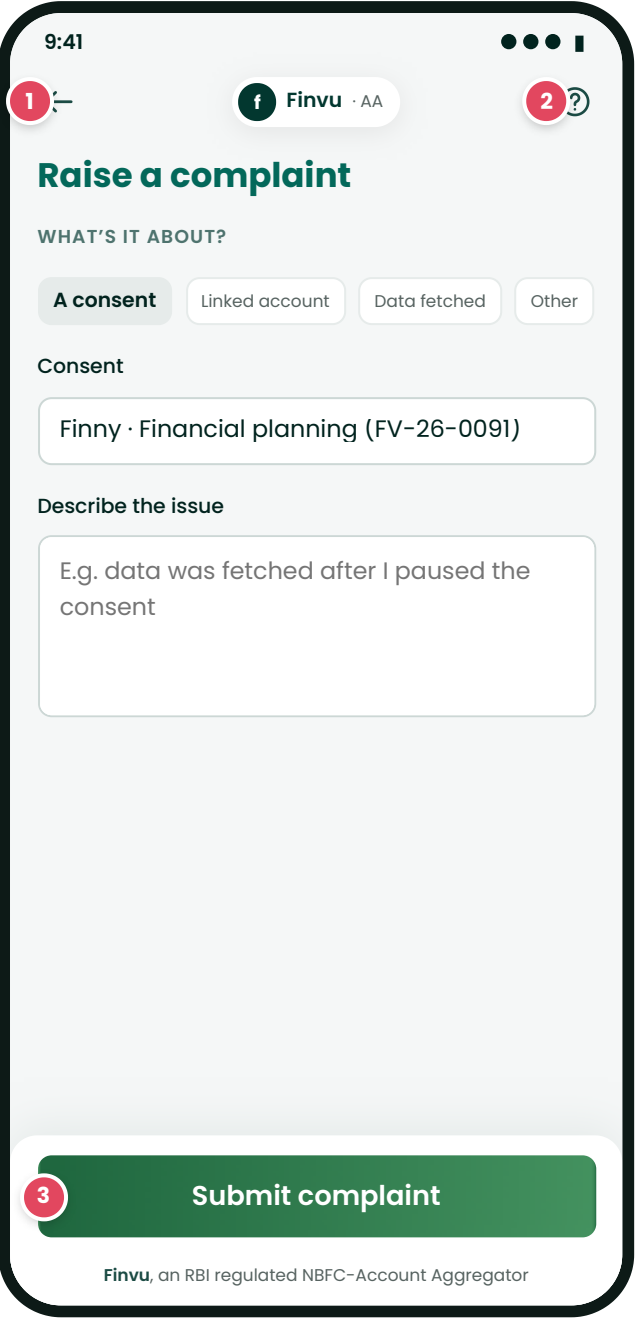

- Data Protection Board entry stays disabled until the channel exists.

NEW SCREEN

Raise a complaint

New

§4.2.viii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **Submit complaint** → Help & complaints

WHAT CHANGED & WHY

- Pre-filled consent reference, category chips and a tracking ID on submit.

EDGE CASES & STATES TO VERIFY

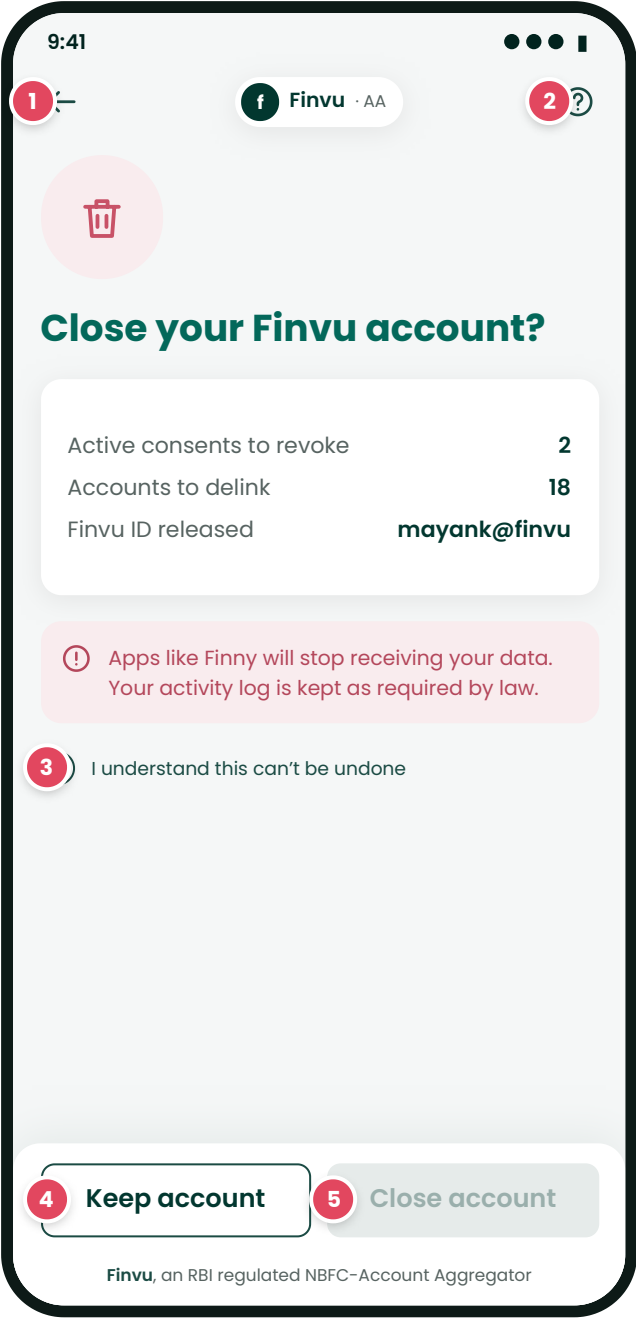

- Submission shows a tracking ID and appears in Help with its status.

NEW SCREEN

Close Finvu account

New §2.2.iii

INTERACTIONS

- 1 **Back** → Previous screen
- 2 **Help and complaints** → Help & complaints
- 3 **I understand** Enables the destructive action
- 4 **Keep account** → Previous screen
- 5 **Close account** → Hand-off to Account Aggregator

WHAT CHANGED & WHY

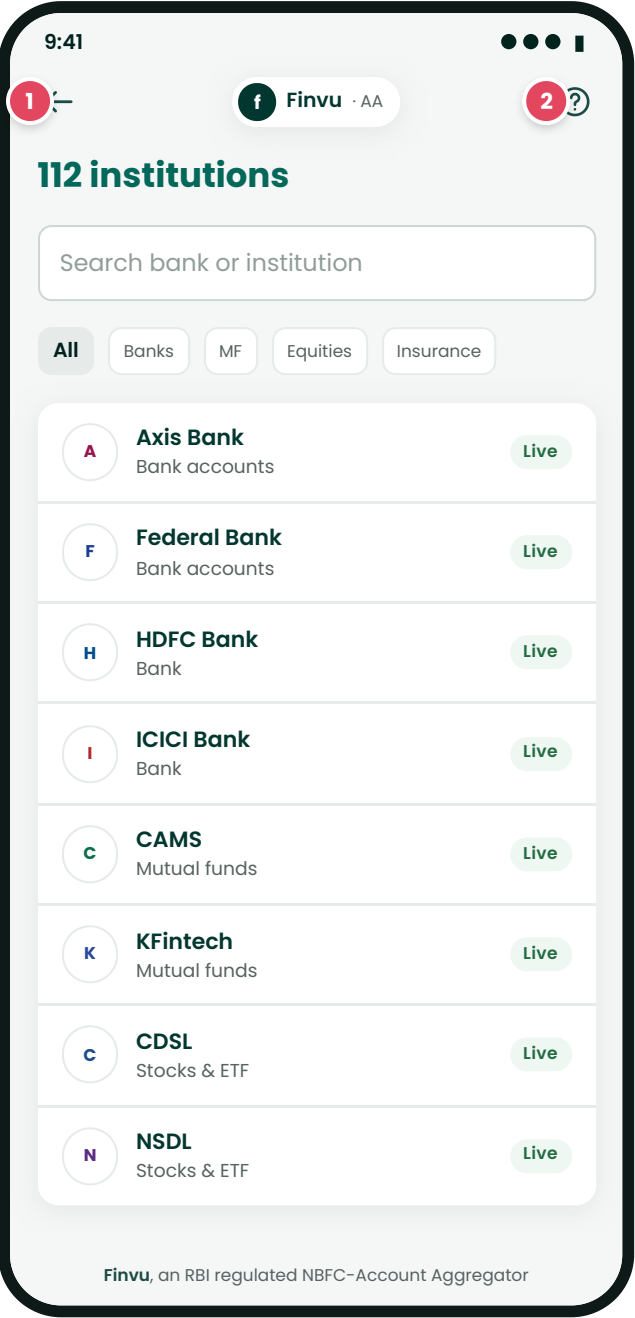

- Closing revokes every active consent and delinks every account. The screen lists exactly what will happen before the user confirms.

EDGE CASES & STATES TO VERIFY

- Close stays disabled until 'I understand' is ticked; it revokes all consents and delinks all accounts.

NEW SCREEN

Institutions on Finvu

New §4.1.vii

INTERACTIONS

- 1 Back → Previous screen
- 2 Help and complaints → Help & complaints

WHAT CHANGED & WHY

- Searchable list of all FIPs available through the AA, for transparency.

EDGE CASES & STATES TO VERIFY

- FIPs that are down show a 'Down' tag instead of 'Live'.
